

## Picasso Portraits

1. Get a sheet of paper and oil pastels, crayons, or colored pencils.
2. Decide whether you'll draw your own face or a partner's face.
3. Draw an oval to represent the face.
4. On half of the face, draw what the face looks like from the front view.
5. On the other half of the face, draw what the face looks like from the side view.
6. Color in your self-portrait with bright wacky colors.
