

# WEALTH TRANSFER TOKEN

04/11/2022

# Turning Speculation into Empowerment

## Introduction: A Movement Disguised as a Token

In a world where meme coins dominate headlines and speculation fuels market frenzies, Wealth Transfer Token (WTT) stands out by doing something rare: making crypto meaningful.

WTT is a blockchain-powered initiative with a bold mission—to bridge the global digital divide by delivering affordable internet access, financial education, and digital learning tools to underserved children around the world. While many tokens promise moonshots, WTT promises measurable change.

**Here, investors don't just chase gains—they change lives.**

## 1) THE VISION

We believe in a world where your ZIP code doesn't determine your future.

Right now, millions of children with raw potential live disconnected from opportunity. They lack access to the internet, basic digital skills, and the kind of mentorship that transforms lives. Yet the tools to bridge that gap already exist.

## 2) HOW ARE WE DIFFERENT?

WTT is the access.

We're creating a token economy where the act of buying, staking, or holding a digital asset fuels:

- Internet infrastructure projects
- Financial literacy for kids
- Gamified learning platforms
- Mentorship networks
- Scholarships funded by token rewards

### The Problem: The Global Digital Divide

- Over 2.7 billion people still lack internet access.
- In Sub-Saharan Africa, only 1 in 5 children has access to a connected device.
- Most underfunded schools don't have Wi-Fi, let alone modern edtech.
- The result? Lost potential, broken dreams, and perpetuated poverty.

# Turning Speculation into Empowerment

## 3) WHY WILL WE DO WELL?

### 1. Social Impact Investing Is Exploding

Impact-focused investments hit **\\$1.2 trillion in 2023**. Investors are hungry for purpose. WTT gives them an on-chain way to see their money create measurable, lasting change.

### 2. Meme Coin Culture Meets Meaning

Retail investors have shown they'll rally around hype—imagine when that hype is backed by humanity. WTT offers all the memetic energy of SHIB or PEPE, but with a mission that builds schools instead of just buzz.

### 3. Decentralization for Social Good

WTT introduces **"DeSocFi"**—decentralized social finance. We connect blockchain tools with grassroots change. This isn't charity—it's community-powered economic transformation.

## 4) WHERE ARE YOU BASED?

The CEO and Founder is based in Tralee, County Kerry in the Republic of Ireland where he's been living for the past 11 years. The other two team members originally from Zimbabwe are based in Johannesburg, South Africa.

## 5) WHEN WAS THE COMPANY LAUNCHED?

The Token is yet to be launched, we are still in the presale phase so that we can be able to raise funds for marketing and liquidity for the token. **PRESALE WEBSITE is [www.wttpresale.live](http://www.wttpresale.live)**

## 6) BIGGEST WINS TO DATE?

- Token development completed and audited
- Strategic partnerships forming with African ISPs, NGOs, and edtech firms
- Educational dApp prototype in development
- Built core team across Ireland, South Africa.
- Secured advisory input from blockchain, nonprofit, and finance experts.

## 7) WHO ARE YOU TRYING TO ATTRACT?

- **"Crypto Speculators"** – seeking a token that might moon, but won't disappear the next day
- **"Impact Investors"** – seeking ESG exposure with on-chain transparency
- **"Philanthropists & Donors"** – seeking scalable, tech-driven change
- **"Tech Partners & ISPs"** – looking to break into underserved regions
- **"Mentors, Educators, Storytellers"** – who believe education is freedom

Wealth Transfer Token (WTT) is designed to Discovering Children's Talents & Maximizing Potential through the Invention of Mind-Developing Games and Brain Boosting Apps and also aims to provide affordable and accessible internet to children in underprivileged regions of the world, enabling them to access quality educational resources. By leveraging blockchain technology and cryptocurrency, the project creates a decentralized platform that connects local

communities with internet service providers at lower costs. The initiative seeks to bridge the digital divide, empowering children with the tools they need to enhance their learning and improve their future opportunities.

We are not just a cryptocurrency; we're a force for change. We are here to CREATE WEALTH & BUILD a community committed to (1) Helping TALENTED CHILDREN from Africa and other less privileged parts of the World to access funding to Nourish and Grow their TALENTS & (2) Help building accessible and affordable INTERNET INFRASTRUCTURE. Also many people missed becoming millionaires or multiplying their investments over 10000x with Pepe & Shiba e.t.c This is the Opportunity for another chance. We are not just going to the Moon but we are going PAST the Moon.

We encourage you to buy our **coin not only because** you will reap tremendous rewards, but also because you will be **supporting** many **underprivileged** children from **all walks** of life.

## The Vision

The best part of my life is seeing others win and live their best. It is my dream to see millions of people doing what they love and buying what they've always dreamed of owning, without constantly worrying about finances.

In my lifetime, I envision inspiring millions of people to pursue their passions, take action, and accomplish their dreams. The roadmap to success in this life is what I intend to achieve by learning as much as I can and teaching others how it can be achieved.

In my future, I'd like to see millions of people travel the world, earn lots of money from investments, and have a life that is free from stress. (Michael Blessing)

## **The reason we are here**

To achieve immediate and lasting change in the way the world treats children. Aiming to establish high-quality, one-stop community learning centers for the poor. Providing specialised learning environments that enable children to develop academically and socially, empowering them to become productive citizens.

A World in which every child attains the right to survival, protection, development & participation. We take personal responsibility for using our resources efficiently, achieving measurable results, and being accountable to supporters, partners and, most of all, children.

Africa and other less privileged places across the world have a lot of gifted children that need support to nurture their talents, and we will do our best by providing funds to foster their talents. There's nothing sadder than seeing a lot of talent perish and most of those children end up doing what they don't enjoy.

## **Digital infrastructure challenges in Africa**

Technology based distance learning is becoming more popular through-out the world and is seen as a promising cost effective & cost efficient answer to expansion of access to education. We aim to contribute in building a great and affordable digital infrastructure and fulfill the region's dream of creating societies in which every child regardless of gender will have access to education

either through participating in conventional classroom-based learning activities or through use of technology-based learning platforms.

## **FUTURE PROJECTS**

Hiring and working with TELECOMMUNICATION companies to build an inexpensive and accessible INTERNET for children throughout Africa.

## **BUILDING FREE REHAB FACILITIES**

Many countries are battling growing drug addiction among the youth and the problem has gone beyond imported drugs. Reports indicate some young people take local concoctions, others even dip diapers and bleach products in boiling water and then inhale the vapours as intoxicants.

Now the major problem is that many youths have become addicted and are seeking ways to give up and seeking help. At the moment many rehab facilities currently require large sums of money for their services. Which is the reason why it is one of our goals in future to build many rehab facilities which will be available for free or at most affordable price depending on each situation.

## **Wealth Transfer Token (WTT)**

The WTT coin is a BEP20 compatible token on the Binance blockchain, distributed by The Distributor during the stages of token sale. The WTT token will be essential for its system to function and will be independent of any cryptocurrencies.

WTT Token was developed using ANTI-RUG system(Vesting System).

Liquidity will be locked for 1 year and the rest of the remaining tokens will all beLOCKED and will be released gradually for a period of up to more than 2 years.

There will be a total of 70 Billion tokens altogether. The tokens in the Public Token Sale will facilitate the entire ecosystem, giving an instantaneous business model to various projects. The distribution of the tokens is displayed below:

## **Distribution of WTT Tokens**

**Presale: 80%**

**Liquidity : 20%**

**4% Buying & Selling Fees : This is how we are going to raise funding for the projects. THERE ARE NO TEAM TOKENS OR ANYTHING LIKE THAT.**

## **PRESALE NOW LIVE**

A total of 80% tokens will be sold at our Presale & preferential rates will be given to early investors.

[PRESALE LINK](#)

## **WTT SYSTEM CRITERIA**

The WTT token is a BEP20 token on the BSC blockchain. The WTT token will be the native cryptocurrency of the WTT system. Funds collected through the token sale will be used to develop the WTT system.

The value of WTT tokens is fully dependent upon the developments of WTT and market demand. The WTT token does not represent or confer any ownership right or stake, share or security or equivalent rights, voting right or any right to receive future revenue shares, intellectual property rights or any other form of participation in or relating to the WTT system, other than rights relating to the use of the platform.

### **WTT EXCHANGE SYSTEM**

### **CRYPTOCURRENCY MARKET ANALYSIS**

Currently, the customer demands are changing and are looking to have less time-consuming financial services to make their life easier and effortless. Due to this, people are moving to online transactions such as Cryptocurrency

Transactions as a form of payment. Cryptocurrencies are virtual currencies that can be used by anyone across the world for various purchases. It is a medium of exchange using cryptography technology, so as to secure the transactions and to control the creation of additional units of the currency to stop inflation.

Cryptocurrencies are the future revenue stream in the digital financial world. Cryptocurrency addresses are established by using public and private keys. They are politically neutral as they are not bound by any rules or regulations of any specific government, exchange rates, interest rates, and country to country transaction fee, which makes international transactions and remittances fastest and cheapest compared to any other form of payment.

Cryptocurrency are said to be more secure than conventional financial instruments, eliminating the chances of identity theft and other issues that currently plague fiat based electronic payment infrastructure.

### **Cryptocurrency Market: Drivers and Challenges**

Cryptocurrencies provide proper security, authentication, and ease of use allowing the cryptocurrency holder to send exactly what they wish without any other identification information which is one of the major hurdles of the market. Apart from this the increasing online transactions over mobile phones, the cryptocurrency holder can expect less transaction fees and faster transactions. Changing consumer and business landscapes. have led the demand for the market growth. Other factors for the rising online business market is the use of mobile based wallet.

### **Cryptocurrency Market:**

#### **Segmentation:**

The Cryptocurrency market can be segmented on the basis of end-user, Such End users may be sectors such as retail, media & entertainment, gaming, healthcare, travel & tourism, transportation & logistics sector and education. On the basis of a worldwide region, the cryptocurrency market is believed to be decentralized, that means it covers all the areas of the world connected to the internet.

#### **Regional Outlook:**

The North America and Europe market is in the advanced stage of adoption of Cryptocurrency. However, the Asia Pacific and MEA are expected to be emerging. In places like India and Africa, the popularity and the usage of various cryptocurrencies are expected to increase gradually in the coming years.

#### **Key Market Exchanges:**

Some of the leading players of Cryptocurrency exchanges are: Coinbase, Poloniex, LocalBitcoins, Cex.io, Kraken, Coinmama, Bitfinex, Yobit, Bitstamp, Bitsquare, Zebpay, GDAX, Unocoin etc. However, there are a lot of new players entering the market as it holds huge business opportunities.

### **ECONOMICAL ASPECTS**

A number of internet based digital currency platforms based on decentralized public ledger have come into the picture since the inception of Bitcoin in 2008. An essential aspect of these public ledger platforms is an incentive system that brings out efforts from a distributed global workforce to authenticate and record transactions on the public ledger and a governance system for the platform. The mechanics of being able to transfer an entry from one person to another are based on advances in cryptology that use open-architecture algorithms to convert one string of data into another. Although the formulas by which the output is calculated are totally open and public, it is essentially infeasible to do the operation in reverse.

Cryptocurrencies have two potential advantages over credit cards and other payment methods for providing such liquidity services. The supporting network only needs to verify that the private code is valid, which is cheaper than verifying the rightful owner of a credit card or a check slip. With a conventional credit card, pay slip etc. the merchant needs to pay the card company or the bank a significant fee for the transaction which in an economic sense results from that high cost of verifying everybody's compliance. This is the reason why many merchants are embracing Cryptocurrencies.

These public ledger platforms generally have the following features.

#### **Internet-based:**

Cryptocurrencies rely on the Internet as the physical network for sending and receiving currency. That is different from most payment platforms, such as Visa, which typically rely on private secure communication networks.

#### **Public Ledger Protocol:**

Cryptocurrencies have a protocol for sending, receiving and recording value. The protocol is based on a public ledger that uses cryptographic methods to secure the values that are sent and received and provides a public record of transactions. The operation of the public ledger is decentralized. A collective pool of Individuals verify and record transactions. The valid public ledger is essentially a consensus among these individuals. This public ledger is called the blockchain and is widely recognized as the key disruptive innovation.

#### **Container for Value:**

There is a container that is used to carry value on the public ledger. The container is used to send and receive value. The container is usually called a “coin“ or “token“ which suggests that it is intended to be a currency or store of value.

### **Incentive Scheme for Labour Force:**

There is an incentive scheme for the effort and contribution of resources for people to conduct various record-keeping and verification activities to maintain the public ledger. At this stage, the public-ledgers for digital currencies are intensive in labour and computer processing time. The incentive scheme provides a reward to people for providing labour, computing power, and other resources.

### **Open-Source Licensing Model:**

There is a licensing model to enable people to make changes to the software for the platform. Typically, public ledger currency platforms use one of the standard open source licenses so that people can use the software underlying the public ledger and make changes to it. Platform Governance System: There is a governance system to determine key operating principles for the platform, to adopt changes to the protocol and other add features to the software, and to drive the evolution of the platform.

### **The WTT Wallet will be stacked with features like:**

1. WTT Wallet will be an Open-Source Wallet.
2. It can be accessed on Mobile platforms like on iPhone, Android devices as well as on the Desktop by any Web browser.
3. Our Wallet is decentralized and thus all of the user’s information will be safe and protected on our servers, therefore, WTT will provide a highly secured free Wallet platform.
4. WTT Wallet will support Cryptocurrencies like Bitcoins, Ripple, Litecoin and Ethereum.
5. Saving Securely: WTT Wallet users can safeguard their assets in the form of digital currencies, and over a time, can even earn a considerable amount of profit for it.
6. Global Approach: WTT Wallet allows users to accept and transfer around the globe, and exchange with their local fiat currencies.
7. Personal Control: The WTT Wallet permits the user to have full access over their private keys, thus making it a trustworthy and user-friendly wallet.

WTT Exchange shall allow users to buy, sell, send, receive, and manage crypto contributions. The WTT crypto exchange platform will be launched in future. As a result of the recent trends of cryptocurrencies, WTT will permit the users to trade in major cryptocurrencies like Bitcoin, Ethereum, Ripple, Litecoin, and WTT. Further, to enhance our services, WTT can start to support other cryptocurrencies as well.

The key differentiator of WTT Exchange will be that 40% of the total collected brokerage fees will be donated. Users will be paying an average of 0.15% of the transaction value as brokerage fees to existing crypto exchanges every time they purchase crypto currencies and another 0.15% of the transaction value when they sell. At WTT exchange, 30% of these fees will be passed on to qualifying charity organisations.

## **Our Conscience**

### **INNOVATION**

As we develop sustainable solutions for and with children, we welcome new ideas, embrace change, and take disciplined risks.

### **EXCELLENCE**

In every aspect of our lives, we strive to live up to the highest standards of honesty and behaviour; we never compromise our reputation and always act in the best interests of children.

### **OBJECTIVES**

Every day, we strive to improve the quality of everything we do for children by setting high goals and demanding high standards from ourselves and our colleagues

### **COLLABORATION**

We respect and value each other, thrive on our diversity, and work with partners to leverage our global strength in making a difference for children.
