Personality

Lea is a confident and sassy molly who believes she is the best around. She knows she is amazing and is not afraid to let everyone know, and it probably doesn't help that she is naturally talented at almost everything she does. Despite this snobbish side of her, she is very ambitious about things, if it's something she wants to learn she is determined to learn it and see it through. She's grown to be a bit of a flirt.

History

Early Life

Lea was born in the Frost Colony to Strawberry, alongside her siblings Pepper, Burgeon, and Bane. Lea loved her family, especially her mother Strawberry. She was glad to look as beautiful as her mother and hoped she'd grow up to be even prettier. She often liked to show how amazing she was by getting her siblings to either sit and watch her or join her in showing off, as Lea believed her whole family was amazing. It wasn't long until Sapling and Pineberry's kittens were old enough to play with Lea and her siblings. Everyone got along well, maybe partially due to Sapling, Pineberry, and Strawberry all being close themselves.

Lea was still a young kitten when a major earthquake struck the colonies. Despite that, it was difficult to forget that day, as it was the day she lost her mother. The Frost Colony was devastated by the deaths of Spring, Strawberry, and Snail, and left anxious about Tux's leadership due to his poor condition. Additionally, their territory had been changed by the earthquake and the issue of their resource shortages worsened. The colony's future seemed grim, which was a terrifying reality for four kittens who now had no mother. Pineberry and Sapling knew how uncertain things seemed for them especially and didn't hesitate to step in for their late friend's kittens, continuing to raise them alongside both of their own litters.

Although it didn't feel like it for Lea and her siblings, things were fairly ordinary after the earthquake. The colony struggled but they all had each other, and that was enough to get through the worst of times. Lea was now a juvenile alongside all the others, learning the ways of the world under the giver. Shortly after Bubble started teaching them, a molly named Snowdrop joined the Frost Colony after the falling of the Fire Colony. She was immediately given the special rank of giver due to her distant familial connection to Bubble. It seemed a little unfair... of course, some Frost Colony cats weren't pleased with the nepotism.

A new colony called the Pyre Colony welcomed all other colony cats to visit them so they could learn about their leader's alleged powers. Of the Frost Colony, Sage, Sapling, and Tree decided to go and see what all the fuss was about. Lea would be missing out on her lessons if she went to the Pyre Colony, so it seemed like a fine idea to stay in the Frost Colony. After all, she could continue to show off her talented mind to her teachers and peers! Plus, the three cats going would be able to tell her about the Pyre Colony once they returned anyway.

Adulthood

Lea was made a commoner and oh, how nice it felt to be truly free! Things had turned out pretty alright in the Frost Colony after all, so maybe Lea's future *wasn't* doomed. Pineberry announced that she was expecting yet another litter and Cobra was having her own as well. Other than that, it was strange how much time had passed without any sign of the Pyre Colony visitors... though there'd been no word of things going poorly there, so maybe everything was fine?
