

Privacy Policy for Quantum QR Lab & Custom Generator

Effective Date: July 20, 2026

Your privacy is of utmost importance to us. This Privacy Policy outlines how "Quantum QR Lab & Custom Generator" (referred to as "the Extension") handles information when installed and used in your browser.

1. Information We Do NOT Collect

The Extension operates on a strict serverless model. We do NOT collect, harvest, store, log, or transmit any user data, personal information, credentials, or browsing histories. We have zero external servers or cloud databases, meaning all data stays entirely on your local machine.

2. Browser Permissions and Usage

The Extension requests specific permissions strictly to facilitate its single core purpose:

- activeTab & tabs: Used exclusively to auto-fetch the URL of the active browser tab when the popup opens, allowing you to instantly generate a QR code for that page.
- clipboardRead: Used solely to allow you to easily paste copied text from your clipboard into the input generation field.

3. Third-Party Disclosures

Since the Extension does not capture or collect any user information, your data is never sold, traded, or shared with any third-party advertisers, corporations, or analytics providers.

4. Changes to This Policy

We reserve the right to modify this Privacy Policy at any time. Any revisions will be updated directly on the Chrome Web Store official item detail page.

5. Contact Support

If you have any questions or require technical assistance regarding this policy, feel free to contact the publisher via the developer profile on the store listing.
