

## Hyssop Essential Oil

Steam-distilled from the *Hyssopus officinalis* leaves and flowers, Hyssop Essential Oil is known for its dynamic aroma profile and versatility in personal care formulations. As a member of the Lamiaceae family, it shares botanical lineage with other widely used essential oils such as Lavender and Rosemary, making it a familiar yet unique addition to high-end cosmetic and hair care products.

In product formulations, Hyssop Essential Oil adds a fresh, green, and slightly camphoraceous note. Its well-balanced chemical composition—including Pinocamphone, Limonene, and Isopinocamphone—enhances its stability and effectiveness across various applications.

From premium facial serums and body lotions to scalp treatments and luxury hair care formulations, Hyssop Essential Oil enhances the sensory experience and final results of cosmetic and personal care formulations.

**Botanical Name:** *Hyssopus officinalis*

**Plant Part:** Leaves & Flowers

**Main Constituents:** Isopinocamphone: 25-45%, Pinocamphone: 8-25%,  $\beta$ -Pinene: 7-20%

**Origin:** Slovenia / Serbia

**Processing Method:** Steam Distilled

**Aromatic Summary / Note / Strength of Aroma:** Fresh, herbaceous, and subtly camphoraceous with green and slightly woody undertones.

**Blends Well With:** Rosemary, Lavender, Cedarwood, Eucalyptus, Bergamot, and Clary Sage.

## **BENEFITS**

Premium Skin Care Ingredient: Rich in naturally occurring compounds such as Pinocamphone, Isopinocamphone, and Limonene, Hyssop Essential Oil enhances the skin's vitality and promotes a refreshed appearance.

Scalp and Hair Conditioning: Hyssop Oil's unique composition support a balanced scalp environment while improving the softness and manageability of the hair.

Aromatic Sophistication: With its fresh, herbaceous, and subtly camphoraceous scent, Hyssop Oil adds depth to natural perfumes and aromatic blends. It pairs well with woody, citrus, and floral notes for a refined scent profile.

Versatile in Formulations: Hyssop Essential Oil integrates seamlessly into serums, lotions, massage oils, and cleansing products that deliver naturally noticeable results.

## **DIRECTIONS AND USES**

- Advanced Skin Care Ingredient: Blend Hyssop Essential Oil at 0.5% to 1.5% in serums, creams, and facial oils to complement skin conditioning properties. Mix with carrier oils such as Jojoba or Sweet Almond for optimal integration.
- Scalp and Hair Treatments: Incorporate 2-3 drops of Hyssop Essential Oil per tablespoon of a carrier oil, such as Argan or Coconut, for targeted scalp applications. Add to shampoos and conditioners for an enhanced botanical profile.
- Perfume Development: Enhance natural fragrances by blending Hyssop with complementary essential oils such as Lavender, Cedarwood, Eucalyptus, and Bergamot. Use in diffuser blends or botanical perfumes for a balanced and refreshing scent.
