Good Morning Abigail,

I watched your presentation yesterday at the LPL 2021 Focus Live virtual conference.

So inspiring!

I'm a legacy Waddell and Reed, inc. employee preparing to go back out into the job market after 11 years.

I really loved the 4 hashtags as a jumping off point for my preparation to wow my next firm!

Everything you passed on to us truly resonated with me.

I have been in the financial services area for over 35 years and am always looking for ways to be more creative and expand and grow my view into the business.

You're an inspiration in a world of constant movement and I wanted to say thank you for the jolt of energy.

Any suggestions to reinvent or dig deeper into my abilities would be welcome.

Stay happy and hopeful,

- Christi Hyatt

Hi Abigail,

Thank you for speaking for the LPL Financial Conference. Did you ever work with Creative Commons?

Google is an incredible company, and I certainly hope they are protected against the raid on big tech going on right now. Hope to connect and follow your work.

Best,

Hello Abigail,

You are a dynamic speaker with so much confidence. They way you speak alone is powerful, your content is intersectional and easily applicable for all listeners. I got to hear you today at LPL's conference and after I made a post for my advisor about it. You liked and commented on it which made my day.

Thank you so much for your time, grateful that something I made is being hosted on your activity page!

LPL Financial Presentation

Abigail, that was a great, engaging and clear presentation. I think it helped me connect the various ideas and concepts that I had come across over the years and put them in an actionable framework. I was impressed by the books on the shelf behind you. Many looked like the Jewish seforim I own. Where they and how does your jewishness influence you? Thank you again for a great speech! Jack

Abigail,
As a right-brained financial consultant, I found your presentation today at LPL Focus to be so interesting and aligned with how I believe that business should be conducted. Finding a way to link my interests, talents and background is what I have been inadvertently trying to do, so now I will do that on purpose! Great presentation! Thank you so much for sharing your ideas with us.
All the best,
Beth Morgan

My pleasure, your commentary on anthropology reminded me of George Lucas and that being his focus in his first two years in his undergrad. He attributes the anthropology to making him such a effective storyteller and Director. Please message me if you're in the LA area and we can get coffee☺
