

Spot that Ditto

by A Giant Hacksaw

#1: After the host collects everyone to join the game it begins. The host determines the player order using the ~shuffle command

#2 The victim chosen will be given three trivia facts, one of which is false, the other two are real or vice versa with one real fact, and two false facts. Your job is to spot the real or false fact in 15 seconds.

Example:

@Host:TriviaUser1, of the following select the false statement

@Host: #1 Milk has lactose #2: Larvesta can learn a move at level 100. #3 Pikachu was the first pokemon shown in the anime

+TriviaUser1: #3 is the ditto

@Host: You are correct moving on to the second player

If they get the question wrong however, or run out of time, they are out, and become devoiced

The host will go through the order until everyone has gone once, then the remaining players will be re-shuffled into a new order and the next round will begin.

This repeats until there are two people remaining

#3 Final round: The remaining two players will be re-shuffled, and the host will alternate between the two until one is eliminated.
