

Ejacutrol Frequently Asked Questions

Do I need a prescription?

Do I need a prescription? No. Ejacutrol is an all natural herbal supplement containing only the finest botanicals, there is no need to obtain a prescription or have any embarrassing doctors visits. However this product contains Hypericum perforatum (st johns wort) and can effect the way some medications work. If you are on any medications check with your doctor first. People taking psychotropic drugs classified as selective serotonin reuptake inhibitors, or SSRI, such as Prozac, or any other anti-depressant medication should not take this product.

How do I take it?

The usual dose is 1 pill, at least 2hrs before sexual activity. For extreme cases of premature ejaculation you may take 2 pills, and wait 3 hrs before having sex. Ejacutrol can stay in your system for 24 hrs, so because of the potency of this formulation we suggest to not have more than 2 pills each 2 days.

How long will It last?

That depends on the severity of your problem, usually you should be able to last 5 - 10 times longer from a single dose.
