

Attachment 6 - Letters of Support

While letters of support are encouraged but optional, a letter of support must be included for every collaboration between the proposal team and any entity outside the proposal team. The support letter from the collaborating entity should state the name of the proposal, the lead proposal organization, the type of collaboration the entity will provide, and any other caveats or limitations the entity will impose on the collaboration. The letter should be signed by a cognizant officer of the entity. For example, if the proposal utilizes data produced by Entity X, a signed support letter from Entity X that acknowledges the proposal by name and briefly describes the data that will be provided must be included. **Letters of support must not exceed one page in length per letter.**
