

Georgetown Broadband Internet Program Information

Subscription Package Rates

Axiom will be offering multiple packages so you can choose the service that's right for you. **Symmetrical speeds (equal upload/download) are being offered, which is really terrific!**

Residential – Monthly Rate	
25Mbps/25Mbps	\$64.99 per month
50Mbps/50Mbps	\$79.99 per month
100Mbps/100Mbps	\$114.99 per month

Seasonal – Annual Rate*	
25Mbps/25Mbps	\$662.99 annual fee
50Mbps/50Mbps	\$815.99 annual fee
100Mbps/100Mbps	\$1,172.99 annual fee

**Seasonal rates are paid in full annually, at the beginning of the summer season and reflect a 15% discount off the regular rate. Seasonal rates are for 6 months from May 1st to October 30th.*

Business – Monthly Rate	
50Mbps/50Mbps	\$99.99 per month
100Mbps/100Mbps	\$159.99 per month
200Mbps/200 Mbps	\$229.99 per month

If you are a business, contact us to learn about our solutions for you.

Need more? Pricing for higher speed packages up to 1000Mbps (1 Gigabyte) and business solutions that provide enhanced technical support options are also available upon request.

Initial Installation Period – Subscription Reservation Deposit

Leading up to and throughout the network buildout, low fixed cost installation reservations are available. If you own a property, this is your opportunity to ensure the property is wired for fiber at NO ADDITIONAL COST. To secure your installation, you'll only make a \$99, non-refundable, subscription reservation deposit and commit to one year of internet service with Axion (you can upgrade or downgrade your service depending on your needs) and at the end of the one-year term you are free to switch to another provider.

What if I don't sign up for service during this initial installation period?

After this initial reservation period closes, the cost of wiring a home that is not included in the initial build out will be the responsibility of the property owner. Installation requires a visit from Axion to run fiber to the home and splice into the network, as well as purchase of the electronics hardware associated with the installation.

Those who do not secure their low-cost installation by placing a deposit during the construction phase will need to pay for installation should they desire service in the future. Although the fees for one-off installations after the network is deployed have not yet been determined, they are expected to be, at a minimum, several hundreds of dollars **or more** per property (it's not cheap, folks, take advantage of this great deal!).

Georgetown Broadband and Axion strongly recommends taking service during the initial deployment period to ensure connectivity at your location and to avoid future high install costs.

Timing of Installation

The \$99 deposit guarantees you installation, but it does not secure a particular date or sequence for your installation. Installation of the Georgetown Broadband network will occur in the order dictated by the logistics of the fiber-buildout process once the construction phase commences. Axion will be moving diligently to wire the island as quickly as possible. Current plans, subsequent to weather, etc., are the entire island will be wired by the end of 2022.

How does fiber get to my home?

Most common – The fiber will be hung throughout the town on existing utility poles. For installation to your home, we will follow the existing aerial telephone service lines that come from the road to your house, where a small box will be installed on the side of the home to provide fiber connectivity.

Special circumstances – For some homes that do not have utility poles, or are down long private roads, we will investigate bringing fiber on top of the ground to the home. If you think this applies to you, please inform Axiom when paying your deposit. We will follow up with you directly to make a plan best suited for the unique circumstances of your home.

Underground installation – Underground fiber service is an option at the expense of the homeowner. With some limitations, Axiom will run fiber through a properly installed conduit that is installed by the homeowner. Axiom recommends working with a local contractor to install and prepare the conduit to accept service and will provide specifications to the homeowner for this type of installation upon request.

Axiom will work with individual homeowners to address reasonable concerns about cable routing and other issues while running the fiber, however additional costs may be incurred if the homeowner's request is determined to require significant additional staff time for installation. Axiom will not be responsible for landscape restoration, replanting, repairing turf damage, or other remediation required as a result of any additional work completed at the request of the homeowner.

Additional Dwellings/Family compounds – Two options are available:

- No-cost installations to as many buildings as are desired may be ordered as described above, by paying a \$99 deposit and signing a 1-year contract for service at that building; or
- You may share a connection between buildings on your property (garage, guest house, etc., provided they are all on the same tax map lot), but wiring connections between the buildings will be your sole responsibility.

Sharing service between multiple properties (different tax map lots) is not permitted. Should you so desire, Axiom is available, at our customary rates, to consult on and construct customized solutions to integrate additional buildings on your property into a wired or wireless network, connecting back to your fiber connection.
