

MAFFKAM MEDICARE CHARITY ORGANIZATION
(MaffKam-SL)

Charity Healing Program

HIV/AIDS Patient at Mabayla slum community Freetown western Area Urban District

HIV/AIDS unlike other critical illnesses/sicknesses is difficult to contain by affected individuals. This young woman accused her husband of infecting her with the virus. She was abandoned by the husband and left to fend for herself and the children. She contacted MAFFKAM for support in May, 2022. The organization supported her treatment for four months and she disappeared in the community. Provocation was the only reason stated for her disappearance

in the community. Therefore, she could not continue her treatment with MAFFKAM.
