

Dear administrative team of School #23,

I hope this letter finds you well. I am reaching out to you as a student within the school community to express my concern and reflections on an issue that I consider of vital importance: the situation of homeless children within our educational community.

It is undeniable that in our society there are families and children facing extreme difficulties, including homelessness. We recognize that this situation significantly impacts the emotional, psychological, and academic well-being of the affected students. As part of the educational team at School #23, it is important that we reflect on how we can effectively and compassionately address this issue.

We would like to form or create an emotional and psychological support club where we can establish an open and respectful dialogue space where we can discuss ideas, share resources, and work collaboratively to develop effective support strategies for homeless students in our school.

We are available to discuss these ideas in further detail and collaborate on any initiatives that may arise in this regard.

Sincerely,

Class 8-11
