

very cool google, thank you

NotJustYou Oxygen Software Developer (Job Description)

Job Summary

The software developer position for the NotJustYou Oxygen mobile application is a chance for you to showcase your skills and abilities relating to mobile application development. Oxygen is a mobile application where individuals with chronic illness can track their ongoing medical journey and communicate with their caregivers in one convenient app. If you have an interest in healthcare and have skills in mobile application development, you will find this position to be rewarding and will be providing help to patients and their caregivers.

Job Responsibilities

- Maintaining existing code for both Android and iOS.
- Ensuring product quality by fixing bugs.
- Adding new features as requested from NotJustYou.
- Deploy new builds of the application when new features are added.
- Ensuring functionality on all mobile devices through testing.
- Maintaining a noSQL database.

Job Requirements & Qualifications

Required:

- Bachelor's degree in Computing Science or equivalent.
- Experience in working with React Native.
- Experience in working with TypeScript.
- Experience in working with JavaScript.
- Experience in working with a MongoDB database or equivalent noSQL.
- Experience in working with GitHub.

Preferred:

- Experience in full-stack development.
