(5) Community Issues

5a) Replace ISMs with Discord Forum Channel - Frumple

Approved as-is. GSM/ISM topics 6-10--as well as 4k waivers, airport proposals, and ferries carrying warp transit--will be moved to a forum channel, though MRT openings will be left to the discretion of the builder. ISMs will no longer be held. However, for members not in the discord, they (and only they) can email staff to post a topic on their behalf.

At least 50% of all staff must vote (Yes/No) on every proposal for them to be approved (we will review this later), and a majority of those must vote "Yes". Admins can vote to extend or defer the vote if need be. Votes can be changed at any time. Furthermore, an admin based on their best judgment can vote to approve a topic early if there is a clear consensus.

For technicality and simplicity reasons, staff can vote on their own proposals.

5b) Omnibus of Miscellaneous Discord Changes - Frumple

5b i) Add new #programming channel under "IRL Things" category

Approved.

5b ii) Add links to 3rd-party MRT tools to #information

Approved.

5b iii) Remove Hydra music bot

Approved.

5b iv) Cleanup obsolete invites in #auxiliary-discords

Perfectly deleted, as all things should be.

5c) Assigning a Map World caretaker - MIKE24DUDE

The map world caretaker would maintain the map world spawn and catalogs, and curating the maps displayed there.

At this, **AP_Red** has volunteered to fill this role.

(6) Transport Projects

6a) A746 Renumber and Extension - MIKE24DUDE

Conditionally approved -- the corridor project will be transferred to Mike and this extension approved, pending clarification regarding the contactability of zefunman.
