2025-09-04

Attendees:

- Kevin Martens
- Bruno Verachten
- Mark Waite

Agenda

- Contributor spotlight
 - Latest spotlight, [featuring Allan Burdajewicz](#), published
 - One response currently being transferred into an .adoc for submission.
 - Discussed with Advocacy & Outreach about potential spotlights
 - Provided updated list of top contributors, Alyssa will follow up with people
 - Thanks to Bruno for providing the data!
 - Have received several responses from those asked, thanks to those who have submitted responses
- [Java 25 documentation](#)
 - Thanks to Kris Stern for creating this issue
 - Kevin created [list of areas](#) that will need Java 25 update when it is available
 - Based on Java 21 updates, may need further additions if discovered
 - Full Java 25 support planned for Fall '25
 - Java 25 early access now in use on [ci.jenkins.io](#) and available in agents
- [Jenkins Board & Officer Elections](#)
 - Nomination period currently open until September 22
 - Anyone can nominate anyone
 - 2 governance board positions & all officer positions are eligible for nomination
 - Key time frames for election
 - Nomination of candidates (August 8 - September 22)
 - Voter registration is open now (September 16 - October 31)
 - Voting (November 1 - November 30)
 - Results announcement (December 1)
 - Voting does require registering an account on [community.jenkins.io](#) and we encourage people to [contribute](#) as part of the process.
- [Gradle Convention Plugin for Jenkins plugin development](#) - Aarav Mahajan
 - Blog from a Gradle GSoC contributor
 - Thanks to Aarav for the work done on creating the plugin and providing some background on what the plugin does/why it came to be.
- Google Summer of Code 2025
 - 2 projects are complete, others have been granted extensions to continue their work.
 - End of term presentations delivered September 3

- Recording will be made available and linked in [GSoC page](#)
- End of term blog posts from contributors will be published as they are approved & merged
 - [Improving Plugin Modernizer - Raunak Madan](#)
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58,000 installations of the [Chinese localization plugin](#)
 - Runxia Ye and Mark discussed at FOSDEM
 - Check the actual usage of the Chinese with analytics
 - Check the actual usage of Chinese localization
 - Alternative would be to find a funding source to translate latest messages to Chinese
 - Kris has created a new issue to initiate adding native Chinese (both traditional and simplified) localization to Jenkins core natively
 - <https://issues.jenkins.io/browse/JENKINS-75364>
 - Started to work on planning the best way to approach this, will add details to issue over the next few weeks
 - The localization is planned to start sometime Summer 2025
 - Kris recently adopted the Chinese docs site
 - Modernization and updates will happen along with localization efforts starting in summer 2025
 - Will need to have a meeting with [Mark Waite](#) to discuss details later when Mark will be free
 - Planning to happen in parallel to the GSoC [jenkins.io](#) retooling project, as we will need to match in terms of tech stack for the versioned docs capability, or have some variants of this.
 - May not use the exact same tooling as the [docs.jenkins.io](#) site, but will follow as much as possible what can be done. Propose to use Docusaurus – <https://docusaurus.io/> for the revamped Chinese site.
 - Planning on starting later this month (August, relative to work being done in GSoC)
 - Are the Jenkins users already English speakers and don't need Chinese localization?
 - Potentially include Chinese localization in core and deprecate/disable plugin once it is complete
 - Not enough data to determine one way or another just yet
- [Good first issues on Jenkins.io](#)
 - Looking to restock the good first issues
 - A number of work in progress pages
 - Kris [created issue for this](#)
 - Thanks to Meg for creating some good first issues
 - Need to review feedback to see if there are any additional good first issues

- Kevin to generate a summary of the feedback from 2025 to discovery any good first issues
- LTS and Weekly releases
 - LTS 2.516.3 planned for release on Sep 17, 2025
 - [Changelog available for review](#)
 - [2.525 changelog](#) - Aug 26, 2025
 - [2.526 changelog](#) - Sep 2, 2025
 - [2025-09-03 Security Advisory](#)
 - Plugins only, Jenkins core not affected
- IRC Bot documentation removed
 - <https://github.com/jenkins-infra/jenkins.io/pull/8361>
 - [Page currently instructs](#) users to use alternative communication channels and that the IRC Bot is deprecated
- Recent work
 - Thanks to [Pierre Beitz](#) for updating the [CD workflow link](#)
 - Thanks to [jtnord \(James Nord\)](#) for [creating a support page for Jenkins](#)
 - Thanks to [Kellie Freeman](#) for adding [information about pipeline step error handling](#)
 - Thanks to [Samarth Mali](#) for [updating the AWS tutorial to use Java 21](#)
 - Thanks to all the GSoC contributors for their presentations and work over the term.
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.
 - Not likely to happen until end of 2025/beginning 2026

2025-08-21

Attendees:

- Kevin Martens
- Bruno Verachten
- Meg McRoberts
- Mark Waite

Agenda

- Contributor spotlight
 - Latest spotlight, [featuring Jay Francis](#), published
 - One response currently being transferred into an .adoc for submission.
 - Discussed with Advocacy & Outreach about potential spotlights

- Provided updated list of top contributors, Alyssa will follow up with people
 - Thanks to Bruno for providing the data!
 - Have received several responses from those asked, thanks to those who have submitted responses
- [Java 25 documentation](#)
 - Thanks to Kris Stern for creating this issue
 - Kevin created [list of areas](#) that will need Java 25 update when it is available
 - Based on Java 21 updates, may need further additions if discovered
 - Full Java 25 support planned for Fall '25
 - Java 25 early access now in use on [ci.jenkins.io](#) and available in agents
 - If you want to explore with Java 24, make sure to use **latest**
- [Jenkins Board & Officer Elections](#)
 - Nomination period currently open until September 22
 - Anyone can nominate anyone
 - 2 governance board positions & all officer positions are eligible for nomination
 - Key time frames for election
 - Nomination of candidates (August 8 - September 22)
 - Voter registration (September 16 - October 31)
 - Voting (November 1 - November 30)
 - Results announcement (December 1)
 - Voting does require registering an account and we encourage people to [contribute](#) as part of the process.
- [Redesigning Jenkins pt 2](#)
 - Jumbotron updated to include this as first item
 - Second blog post from Jan Faracik on redesigning Jenkins/UI updates for Jenkins
 - Highlights the changes to the UI brought with 2.516.1 & previous weekly releases
 - Shares link for the [livestream that Jan & Darin Pope hosted](#)
 - Kevin currently working on updating images in documentation to reflect updated UI
 - [Tracking sheet for work done so far](#)
 - Recently submitted [PR for updating Using Agents](#)
 - Removing unnecessary noise from screenshots (old Breadcrumb nav that is not relevant to the content, etc) is helpful if the rest of the UI is still correct
- Google Summer of Code 2025
 - All 5 projects are currently in the Standard Coding Period, completed midterm presentations, final presentation to take place at beginning of September
 - Recording will be made available and linked in [GSoC page](#)
 - Mid term blog posts from contributors will be published as they are approved & merged
 - [Build retooling of jenkins.io - Birajit Saikia](#)

- [Building an AI-Powered chatbot - Giovanni Vaccarino](#)
 - [An AI Agent for Jenkins Failure Diagnosis - Chirag Gupta](#)
 - [Improving Plugin Modernizer - Raunak Madan](#)
 - [Modernizing and Stabilizing the Jenkins Tekton Plugin - Maeve Ho](#)
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58,000 installations of the [Chinese localization plugin](#)
 - Runxia Ye and Mark discussed at FOSDEM
 - Check the actual usage of the Chinese with analytics
 - Check the actual usage of Chinese localization
 - Alternative would be to find a funding source to translate latest messages to Chinese
 - Kris has created a new issue to initiate adding native Chinese (both traditional and simplified) localization to Jenkins core natively
 - <https://issues.jenkins.io/browse/JENKINS-75364>
 - Started to work on planning the best way to approach this, will add details to issue over the next few weeks
 - The localization is planned to start sometime Summer 2025
 - Kris recently adopted the Chinese docs site
 - Modernization and updates will happen along with localization efforts starting in summer 2025
 - Will need to have a meeting with Mark Waite to discuss details later when Mark will be free
 - Planning to happen in parallel to the GSoC [jenkins.io](#) retooling project, as we will need to match in terms of tech stack for the versioned docs capability, or have some variants of this.
 - May not use the exact same tooling as the [docs.jenkins.io](#) site, but will follow as much as possible what can be done. Propose to use Docusaurus – <https://docusaurus.io/> for the revamped Chinese site.
 - Planning on starting later this month (August, relative to work being done in GSoC)
 - Are the Jenkins users already English speakers and don't need Chinese localization?
 - Potentially include Chinese localization in core and deprecate/disable plugin once it is complete
 - Not enough data to determine one way or another just yet
- [Good first issues on Jenkins.io](#)
 - Looking to restock the good first issues
 - A number of work in progress pages
 - Kris [created issue for this](#)
 - Thanks to Meg for creating some good first issues
 - Need to review feedback to see if there are any additional good first issues
- LTS and Weekly releases

- LTS 2.516.2 released on Aug 20, 2025
 - [Changelog available](#)
 - [2.523 changelog](#) - Aug 12, 2025
 - [2.524 changelog](#) - Aug 19, 2025
- IRC Bot documentation removed
 - <https://github.com/jenkins-infra/jenkins.io/pull/8361>
 - [Page currently instructs](#) users to use alternative communication channels and that the IRC Bot is deprecated
- Recent work
 - Thanks to [Vastal-Verma](#) for adding a new [Jenkins logo](#)
 - Thanks to [jtnord \(James Nord\)](#) for [creating a support page for Jenkins](#)
 - Thanks to all the GSoC contributors for their blog posts and ongoing work.
- Linux Foundation, [scarf.sh](#) and tracking documentation page reading
 - LF has a contract with [scarf.sh](#)
 - Would we (as a group) be okay with documentation reader tracking
 - Based on public data (nothing spooky or nefarious happening)
 - OK that Mark Waite submits a test pull request to the [www.jenkins.io](#) repository to test the idea
 - Mark then invite Docs SIG members to click the link so that we can confirm the tracking works
- [Docs feedback thread from gitter](#)
 - Feedback/issue would not be connected to anyone (no way to confirm the issue is resolved)
 - Feedback submitted for steps would be unhelpful in [jenkins.io](#) repo (would need to be pushed/moved to respective plugins and then have maintainers fulfil requests [not ideal])
 - Forcing readers to create a github account to submit feedback so that it is connected would cause users to disengage/not submit feedback
 - A lot of feedback asking for examples (needs extensive knowledge of the plugin/workflow and ability to create said example)
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.

- Not likely to happen until end of 2025/beginning 2026

2025-08-07

Attendees:

- Kevin Martens
- Birajit Saikia
- Kris Stern
- Meg McRoberts
- Mark Waite

Agenda

- Contributor spotlight
 - Latest spotlight, [featuring Jay Francis](#), published
 - Discussed with Advocacy & Outreach about potential spotlights
 - Provided updated list of top contributors, Alyssa will follow up with people
 - Thanks to Bruno for providing the data!
 - Have received several responses from those asked, thanks to those who have submitted responses
- [Java 25 documentation](#)
 - Thanks to Kris Stern for creating this issue
 - Kevin created [list of areas](#) that will need Java 25 update when it is available

 - If you want to explore with Java 24, make sure to use **latest**
- [Redesigning Jenkins pt 2](#)
 - Jumbotron updated to include this as first item
 - Second blog post from Jan Faracik on redesigning Jenkins/UI updates for Jenkins
 - Highlights the changes to the UI brought with 2.516.1 & previous weekly releases
 - Shares link for the [livestream that Jan & Darin Pope hosted](#)
 - Kevin currently working on updating images in documentation to reflect updated UI
 - [Tracking sheet for work done so far](#)
 - Recently submitted [PR for updating Using Agents](#)
 - All screenshots updated, instructions/documentation more uniform/standardized
 - Tested all steps to ensure they work as described
 - Removing unnecessary noise from screenshots (old Breadcrumb nav that is not relevant to the content, etc) is helpful if the rest of the UI is still correct

- Google Summer of Code 2025
 - All 5 projects are currently in the Standard Coding Period, just completed midterm presentations
 - Recording will be made available and linked in [GSoC page](#)
 - Mid term blog posts from contributors will be published as they are approved & merged
 - [Build retooling of jenkins.io - Birajit Saikia](#)
 - [Building an AI-Powered chatbot - Giovanni Vaccarino](#)
 - [An AI Agent for Jenkins Failure Diagnosis - Chirag Gupta](#)
 - [Improving Plugin Modernizer - Raunak Madan](#)
 - [Modernizing and Stabilizing the Jenkins Tekton Plugin - Maeve Ho](#)
- [Enforced HTTPS for Update Center](#)
 - Thanks to Damien Duportal for the blog and update
 - Should not have any noticeable functional change
 - plain-HTTP requests will be redirected as expected, but upgraded to HTTPS scheme
 - No news is best news
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58,000 installations of the [Chinese localization plugin](#)
 - Runxia Ye and Mark discussed at FOSDEM
 - Check the actual usage of the Chinese with analytics
 - Check the actual usage of Chinese localization
 - Alternative would be to find a funding source to translate latest messages to Chinese
 - Kris has created a new issue to initiate adding native Chinese (both traditional and simplified) localization to Jenkins core natively
 - <https://issues.jenkins.io/browse/JENKINS-75364>

 - May not use the exact same tooling as the [docs.jenkins.io](#) site, but will follow as much as possible what can be done. Propose to use Docusaurus – <https://docusaurus.io/> for the revamped Chinese site.
 - Planning on starting later this month (July)

- Are the Jenkins users already English speakers and don't need Chinese localization?
 - Potentially include Chinese localization in core and deprecate/disable plugin once it is complete
 - Not enough data to determine one way or another just yet
- Good first issues on [Jenkins.io](https://jenkins.io)
 - Looking to restock the good first issues
 - A number of work in progress pages
 - Kris [created issue for this](#)
 - Thanks to Meg for creating good first issues
 - Need to review feedback to see if there are any good first issues
- LTS and Weekly releases
 - LTS 2.516.2 planned for Aug 20, 2025
 - [Changelog available for review](#)
 - [2.521 changelog](#) - Jul 29, 2025
 - [2.522 changelog](#) - Aug 5, 2025
- Recent work
 - Thanks to [Basil Crow](#) for adding a link to [the Nord Theme plugin](#) to the Redesigning Jenkins blog post.
 - Theming now available on ci.jenkins.io
 - Thanks to Markus Winter for [adding a note about the customizable header plugin](#) to the 2.516.1 upgrade guide.
 - Thanks to all the GSoC contributors for their blog posts and ongoing work.
- Linux Foundation, [scarf.sh](#) and tracking documentation page reading
 - LF has a contract with [scarf.sh](#)
 - Would we (as a group) be okay with documentation reader tracking
 - Based on public data (nothing spooky or nefarious happening)
 - OK that Mark Waite submits a test pull request to the www.jenkins.io repository to test the idea
 - Mark then invite Docs SIG members to click the link so that we can confirm the tracking works
- [Docs feedback thread from github](#)
 - Feedback/issue would not be connected to anyone (no way to confirm the issue is resolved)
 - Feedback submitted for steps would be unhelpful in jenkins.io repo (would need to be pushed/moved to respective plugins and then have maintainers fulfil requests [not ideal])
 - Forcing readers to create a github account to submit feedback so that it is connected would cause users to disengage/not submit feedback

- Lots of warning signs in the documentation saying “work in progress”
- How can this be updated/enhanced and provide a more confident experience
- What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.

2025-07-24

Attendees:

- Kevin Martens
- Birajit Saikia
- Kris Stern
- Meg McRoberts
- Bruno Verachten

Agenda

- Contributor spotlight
 - Latest spotlight, [featuring Meg McRoberts](#), published
 - Discussed with Advocacy & Outreach about potential spotlights
 - Provided updated list of top contributors, Alyssa will follow up with people
 - Thanks to Bruno for providing the data!
 - Have received several responses from those asked, thanks to those who have submitted responses
 - Mentors from GSoC (Berviento, V Sreenias, Vihbav, Phillipp Glanz)
- [Java 25 documentation](#)
 - Thanks to Kris Stern for creating this issue
 - Kevin creating list of areas that will need Java 25 update when it is available
 - Java 21 updates have helped spotlight areas that will need to be updated
 - Full Java 25 support planned for Fall '25
 - Java 25 early access now in use on [ci.jenkins.io](#) and available in agents
 - If you want to explore with Java 24, make sure to use **latest**
- [Redesigning Jenkins pt 2](#)
 - Second blog post from Jan Faracik on redesigning Jenkins/UI updates for Jenkins
 - Highlights the changes to the UI brought with 2.516.1 & previous weekly releases
 - Shares link for the [livestream that Jan & Darin Pope hosted](#)

- Kevin currently working on updating images in documentation to reflect updated UI
 - [Tracking sheet for work done so far](#)
 - Multiple PRs for updating submitted, still more to go
 - Removing unnecessary noise from screenshots (old Breadcrumb nav that is not relevant to the content, etc) is helpful if the rest of the UI is still correct
- [YourKit](#), [JetBrains](#), and [AWS](#) sponsorship blog posts
 - Thanks to Alexander Brandes for writing these up and working with both parties.
 - Thanks to YourKit for providing free licenses for the YourKit Java Profiler
 - Thanks to JetBrains for providing free annual All products Pack subscriptions
 - For Jenkins core maintainers & active contributors
 - To request a license/access, reach out to Alex via his email (in [his GitHub profile](#))
 - Thanks to AWS for their continued support and sponsorship of Jenkins
 - Crucial for Jenkins continued function, recent migration from Azure to AWS for [ci.jenkins.io](#) was important to ensure service is provided
- Google Summer of Code 2025
 - All 5 projects are currently in the Standard Coding Period, just completed midterm presentations
 - Recording will be made available later and linked in [GSoC page](#)
 - Mid term blog posts from contributors will be published as they are approved & merged
 - [Build retooling of jenkins.io - Birajit Saikia](#)
 - [Building an AI-Powered chatbot - Giovanni Vaccarino](#)
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58,000 installations of the [Chinese localization plugin](#)
 - Runxia Ye and Mark discussed at FOSDEM
 - Check the actual usage of the Chinese with analytics
 - Check the actual usage of Chinese localization
 - Alternative would be to find a funding source to translate latest messages to Chinese
 - Kris has created a new issue to initiate adding native Chinese (both traditional and simplified) localization to Jenkins core natively
 - <https://issues.jenkins.io/browse/JENKINS-75364>
 - Started to work on planning the best way to approach this, will add details to issue over the next few weeks
 - The localization is planned to start sometime Summer 2025
 - Kris recently adopted the Chinese docs site
 - Modernization and updates will happen along with localization efforts starting in summer 2025

- Will need to have a meeting with [Mark Waite](#) to discuss details later when Mark will be free
 - Planning to happen in parallel to the GSoC [jenkins.io](#) retooling project, as we will need to match in terms of tech stack for the versioned docs capability, or have some variants of this.
 - May not use the exact same tooling as the [docs.jenkins.io](#) site, but will follow as much as possible what can be done. Propose to use Docusaurus – <https://docusaurus.io/> for the revamped Chinese site.
 - Planning on starting later this month (July)
- Are the Jenkins users already English speakers and don't need Chinese localization?
- Potentially include Chinese localization in core and deprecate/disable plugin once it is complete
- Not enough data to determine one way or another just yet
- Good first issues on [Jenkins.io](#)
 - Looking to restock the good first issues
 - A number of work in progress pages
 - Kris [created issue for this](#)
 - Thanks to Meg for creating good first issues
- [Remove GSOD label](#)
 - Multiple thoughts on this
 - Removing label from the actual repo, not any of the documentation or pages
- LTS and Weekly releases
 - LTS 2.516.1 released July 23, 2025
 - [Changelog](#) and [Upgrade Guide](#) available
 - Thanks to Meg, Mark, & Tim Jacomb for feedback and assistance with these
 - [Livestream with Darin & Jan](#) (July 16, 2025)
 - [2.519 changelog](#) - Jul 15, 2025
 - [2.520 changelog](#) - Jul 22, 2025
 - [Jenkins Security Advisory - 2025-07-09](#)
 - Only affects plugins
- Recent work
 - Thanks to [Nitin Gupta](#) for [updating the "Configuring the system" docs to match the UI](#) in the mirrors docs
 - Thanks to [Stephane Merle](#) for [adding a note about HTTPS redirection](#) for mirrors
 - Thanks to [Xianzhan-Yang](#) for [updating the `stash` retention documentation](#)
 - Thanks to [Ipshita Patel](#) for [fixing the thank you image size](#)
 - Thanks to Mark Waite for [updating the Condorcet IVS link](#)
 - Thanks to [Josh Soref](#) for [correcting the PuTTY link](#) to the official site
- New success story & adopter
 - [Amarula Solutions](#)

- Thanks to [Michael Trimarchi](#) for submitting the story & adopter request
- Removing Java 11 upgrade instructions
 - [Issue Closed](#)
 - [Opened PR to resolve this issue and “hide” the Java 8 to 11 instructions](#)
 - Solution: Include the Java 8 to 11 upgrade instruction link on the index page, but remove it from the navigation. Include a note saying that Java 11 is not supported by LTS or weekly so that it is not misunderstood.
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.
- Linux Foundation, [scarf.sh](#) and tracking documentation page reading
 - LF has a contract with [scarf.sh](#)
 - Would we (as a group) be okay with documentation reader tracking
 - Based on public data (nothing spooky or nefarious happening)
 - OK that Mark Waite submits a test pull request to the [www.jenkins.io](#) repository to test the idea
 - Mark then invite Docs SIG members to click the link so that we can confirm the tracking works
- Wiki migration redirect instructions
 - Currently, developer docs instruct users [to create a redirect for the content migrated](#)
 - No instructions on how to actually create the redirect
 - Kevin partnering with Mark Waite & Damien Duportal on what the process involves and steps needed to create and test
 - Once there are multiple examples, instructions will be updated to include more direct steps/information.
 - Redirects do not account for URL variation so trying to figure out the best way to capture these and redirect as intended.
 - Kevin has created [a couple redirects](#), but has found that if there are multiple URLs that contain the same string, it may confuse the redirect behavior
 - Had to pause for a bit to address updated header documentation/screenshots
- [Docs feedback thread from github](#)

2025-07-10

Attendees:

- Kevin Martens
- Birajit Saikia
- Kris Stern
- Meg McRoberts
- Mark Waite
- Bruno Verachten

Agenda

- Contributor spotlight
 - Latest spotlight, [featuring Meg McRoberts](#), published
 - Discussed with Advocacy & Outreach about potential spotlights
 - Provided updated list of top contributors, Alyssa will follow up with people
 - Thanks to Bruno for providing the data!
 - Lance Albertson from OSUOSL as potential spotlight
 - Mentors from GSoC (Berviento, V Sreenias, Vihbav, Phillipp Glanz)
- [Java 25 documentation](#)
 - Thanks to Kris Stern for creating this issue
 - Kevin creating list of areas that will need Java 25 update when it is available
 - Java 21 updates have helped spotlight areas that will need to be updated
 - Java 25 support planned for Fall '25
- [2025 Jenkins Community awards](#)
 - Winners announced via blog post & cdCon
 - 3 Categories:
 - Most Valuable Contributor - Jan Faracik
 - Most Valuable Advocate - Stefan Spieker
 - Security MVP - Daniel Beck
 - Congratulations to the winners and thanks to the community for voting
- [YourKit](#) & [JetBrains](#) sponsorship blog posts
 - Thanks to Alexander Brandes for writing these up and working with both parties.
 - Thanks to YourKit for providing free licenses for the YourKit Java Profiler
 - Thanks to JetBrains for providing free annual All products Pack subscriptions
 - For Jenkins core maintainers & active contributors
 - To request a license/access, reach out to Alex via his email (in [his GitHub profile](#))
- Google Summer of Code 2025
 - All 5 projects are currently in the Standard Coding Period, with work currently underway

- July 14 - 18 UTC mid-term evaluations to be conducted by mentors (still about 2+ weeks to go)
- Projects all making great progress and looking forward to midterm presentations
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58,000 installations of the [Chinese localization plugin](#)
 - Runxia Ye and Mark discussed at FOSDEM
 - Check the actual usage of the Chinese with analytics
 - Check the actual usage of Chinese localization
 - Alternative would be to find a funding source to translate latest messages to Chinese
 - Kris has created a new issue to initiate adding native Chinese (both traditional and simplified) localization to Jenkins core natively
 - <https://issues.jenkins.io/browse/JENKINS-75364>
 - Started to work on planning the best way to approach this, will add details to issue over the next few weeks
 - The localization is planned to start sometime Summer 2025
 - Kris recently adopted the Chinese docs site
 - Modernization and updates will happen along with localization efforts starting in summer 2025
 - Will need to have a meeting with Mark Waite to discuss details later when Mark will be free
 - Planning to happen in parallel to the GSoC [jenkins.io](#) retooling project, as we will need to match in terms of tech stack for the versioned docs capability, or have some variants of this.
 - May not use the exact same tooling as the [docs.jenkins.io](#) site, but will follow as much as possible what can be done. Propose to use Docusaurus – <https://docusaurus.io/> for the revamped Chinese site.
 - Planning on starting later this month (July)
 - Are the Jenkins users already English speakers and don't need Chinese localization?
 - Potentially include Chinese localization in core and deprecate/disable plugin once it is complete
 - Not enough data to determine one way or another just yet
- Good first issues on [Jenkins.io](#)
 - Looking to restock the good first issues
 - A number of work in progress pages
 - Kris [created issue for this](#)
- LTS and Weekly releases
 - LTS 2.516.1 scheduled for July 23, 2025
 - [Changelog & Upgrade Guide for review](#)
 - Upcoming Livestream (July 16, 2025)
 - First YouTube livestream featuring Darin Pope & Jan Faracik

- [2.517 changelog](#) - Jul 1, 2025
- [2.518 changelog](#) - Jul 8, 2025
- [Jenkins Security Advisory - 2025-07-09](#)
 - Only affects plugins
- Introducing the header redesign as part of the July LTS
 - Lots of changes to be aware of
 - Benefit from a blog post pointing out the new header
 - What's new LTS broadcast informing users (next .1)
 - Entries in the upgrade guide reflecting the updated header
 - Screenshots will need to be updated to reflect new UI
 - [Tracking sheet with screenshots that need to be updated](#)
- Recent work
 - Thanks to [Matthew Lien](#) for [fixing an rsync syntax error](#) in the mirrors docs
 - Thanks to [Lewis Birks](#) for [updating the share buttons](#) and [aligning ruby version & dependencies](#)
 - Thanks to Mark Waite for [fixing links using markdown formatting](#)
 - Thanks to Briajit Saikia for [fixing some event links](#)
- New success story & adopter
 - [Amarula Solutions](#)
 - Thanks to [Michael Trimarchi](#) for submitting the story & adopter request
- Wiki migration redirect instructions
 - Currently, developer docs instruct users [to create a redirect for the content migrated](#)
 - No instructions on how to actually create the redirect
 - Kevin partnering with Mark Waite & Damien Duportal on what the process involves and steps needed to create and test
 - Once there are multiple examples, instructions will be updated to include more direct steps/information.
 - Redirects do not account for URL variation so trying to figure out the best way to capture these and redirect as intended.
 - Kevin has created [a couple redirects](#), but has found that if there are multiple URLs that contain the same string, it may confuse the redirect behavior
 - Had to pause for a bit to address updated header documentation/screenshots
- Potentially removing Java 11 upgrade instructions
 - <https://github.com/jenkins-infra/jenkins.io/issues/8152>
 - Issue created by Birajit, provides good points on why it could be removed/archived
 - Discussed with Mark, instead of removing the documentation, potentially removing it from the navigation so that it is still accessible but not misleading to think Java 11 is still supported. There are users still on Java 8 that need to upgrade and may want to take an incremental approach.

- [Opened PR to resolve this issue and “hide” the Java 8 to 11 instructions](#)
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.
- Linux Foundation, [scarf.sh](#) and tracking documentation page reading
 - LF has a contract with [scarf.sh](#)
 - Would we (as a group) be okay with documentation reader tracking
 - Based on public data (nothing spooky or nefarious happening)
 - OK that Mark Waite submits a test pull request to the [www.jenkins.io](#) repository to test the idea
 - Mark then invite Docs SIG members to click the link so that we can confirm the tracking works

2025-06-26

Attendees:

- Kevin Martens
- Birajit Saikia
- Kris Stern
- Meg McRoberts

Agenda

- Contributor spotlight
 - Latest spotlight, [featuring Ilan Rabinovitch/SCaLE](#), published
 - Meg McRoberts to be featured in next spotlight
 - [Opened PR, hoping to publish before July](#)
 - Melissa from JFrog has been sent questionnaire
 - Not sure if she'll provide a response at this time
 - Lance Albertson from OSUOSL as potential spotlight
 - Mentors from GSoC (Berviento, V Sreenias, Vihbav, Phillipp Glanz)
- [Java 25 documentation](#)
 - Thanks to Kris Stern for creating this issue
 - Kevin creating list of areas that will need Java 25 update when it is available
 - Java 21 updates have helped spotlight areas that will need to be updated

- [2025 Jenkins Community awards](#)
 - Winners announced via blog post & cdCon this past week
 - 3 Categories:
 - Most Valuable Contributor - Jan Faracik
 - Most Valuable Advocate - Stefan Spieker
 - Security MVP - Daniel Beck
 - Congratulations to the winners and thanks to the community for voting
- [Android and Jenkins: What is the limit? \(Part 2\)](#)
 - Thanks to Bruno Verachten for writing this up
 - Second part to [the original Android & Jenkins blog post](#)
 - Reviews running Jenkins on an Android device (including adding agents and building a project from GitHub)
- Google Summer of Code 2025
 - Participant bonding period/introduction blog posts
 - [Maeve Ho - Enhancing Tekton integration in Jenkins](#)
 - [Giovanni Vaccarino - AI-Powered chatbot for Jenkins resources](#)
 - [Raunak Madan - Improving plugin modernizer tool](#)
 - [Birajit Saikia - Complete build retooling of jenkins.io](#)
 - [Chirag Gupta - Building and LLM for Jenkins failure diagnosis](#)
 - Followed up with tweets & posts on socials for “GSoC week” last week
 - All 5 projects are currently in the Standard Coding Period, with work currently underway
 - July 14 - 18 UTC mid-term evaluations to be conducted by mentors (still about 2+ weeks to go)
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58,000 installations of the [Chinese localization plugin](#)

 - Not enough data to determine one way or another just yet
- Good first issues on [Jenkins.io](https://jenkins.io)
 - Looking to restock the good first issues
 - A number of work in progress pages
 - Kris to create issue for this
- LTS and Weekly releases
 - [2.504.2 Changelog](#) (no notable entries in Upgrade Guide) May 28, 2025
 - [2.511 changelog](#) - May 20, 2025
 - [2.512 changelog](#) - May 27, 2025
 - Includes [packaging update from Alex Earl](#)
 - [2025-05-14 Security Advisory](#)
 - Plugins only
- Recent work
 - Thanks to Jesse Glick for [updating the developer docs](#) and [adding the `ControllerToAgentCallable`](#) to the callable-remoting docs.
 - Thanks to [Birajit](#) for [fixing some important links](#), [some grammar adjustments](#), and [additional docs updates](#). These will all help towards the GSoC project work.
- Google Season of Docs program is closed - Mark Waite
 - Announced in a [Google Group](#)
 - Six years of Google Season of Docs - Jenkins participated in one year of Season of Docs (Kubernetes docs)
 - Kevin updated the [pages mentioning GSoD](#) to indicate its conclusion.
 - One more [page](#) that needs an update
- Introducing the header redesign as part of the July LTS
 - Lots of changes to be aware of
 - Benefit from a blog post pointing out the new header
 - What's new LTS broadcast informing users (.2, .3, next .1)
 - Entries in the upgrade guide reflecting the updated header
- Screenshot updates/review for July LTS
 - New header in July LTS baseline
 - Will Need screenshots where applicable
 - Needs to be determined what will be updated

- Kevin also working on more specific screenshot guidelines (dimensions, potential tools to use, additional best practices)
- Wiki migration redirect instructions
 - Currently, developer docs instruct users [to create a redirect for the content migrated](#)
 - No instructions on how to actually create the redirect
 - Kevin partnering with Mark Waite & Damien Duportal on what the process involves and steps needed to create and test
 - Once there are multiple examples, instructions will be updated to include more direct steps/information.
 - Redirects do not account for URL variation so trying to figure out the best way to capture these and redirect as intended.
- Alpha Omega idea - improving open source security for Jenkins users - Mark Waite
 - Further discussions had at Jenkins Contributor Summit - 31 Jan 2025
 - Not expecting any additional projects yet, but Wadeck is working with them periodically
 - Not right now, but maybe later
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation

 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.

- Google Season of Docs program is closed - Mark Waite
 - Announced in a [Google Group](#)
 - *The 84 Google Season of Docs case studies (and the final project reports from the 2019-2020 seasons) will continue to be accessible on the [program website](#). Additional materials, including a [documentation maturity audit tool](#) and guidance for working with technical writers, are available in the [Open Docs Repo](#) on GitHub. We're also excited to release two new resources based on analysis of the Google Season of Docs case studies: a set of [new documentation project archetypes](#) to help open source maintainers identify and scope typical projects and (coming soon) a guide to running documentation projects for open source maintainers. More information will be announced via the [Google Open Source Blog](#).*
 - Six years of Google Season of Docs - Jenkins participated in one year of Season of Docs (Kubernetes docs)
 - Kevin to update the [Google season of docs page](#) to indicate that it has ended, as well as [Documentation SIG page](#).
- Screenshot updates/review for July LTS
 - New header in July LTS baseline
 - Need some screenshots

2025-05-01

Attendees:

- Kevin Martens
- Birajit Saikia
- Meg McRoberts
- Mark Waite

Agenda

- Contributor spotlight
 - Latest spotlight, [featuring Sacha Labourey](#), published
 - Ilan Rabinovitch for May spotlight
 - Meg McRoberts shared her response for a future spotlight
 - Spotlights to be published once per month
- Documentation fixes implemented
 - Added [Java 21 upgrade instructions](#) as they were absent
 - Updated all installation guides (as needed) for Java 21
 - Updated [Jenkinsfile runner tutorial](#) for Java 21
 - Updated Docker tutorial partial for Java 21

- Only remaining mentions of Java 17 are historical (blog posts, older changelogs, etc)
 - Compiling all areas changed for Java 21 for eventual update to Java 25
- [Java 25 documentation](#)
 - Thanks to Kris Stern for creating this issue
 - Kevin creating list of areas that will need Java 25 update when it is available
 - Java 21 updates have helped spotlight areas that will need to be updated
- [2025 Jenkins Community awards](#)
 - 3 Categories:
 - Most Valuable Contributor
 - Most Valuable Advocate
 - Security MVP
 - Voting started on April 22 and will close on June 5
 - Winners will be announced at cdCon 2025 (June 23 - 25 2025)
 - Last year's winners are not eligible for the same award this year
 - 2024 Security MVP cannot win 2025 Security MVP again, but could win Most Valuable Contributor
- [Redesigning Jenkins](#) by Jan Faracik
 - Part 1 of indepth look into the process/work that UX SIG and others have been doing and continues to do
 - Explains the challenges of updating Jenkins due to legacy technologies & the expansive nature of the project
 - Part 2 to come
- Upcoming blog post for latest Pipeline Graph View/revamped Pipeline visualization
- Google Summer of Code 2025 - Kris Stern
 - Proposal rankings completed and submitted
 - More than a total of 200 submissions this year
 - 160+ valid proposals submitted and being reviewed
 - Planning to have 5 projects ideas to be selected by Jenkins mentoring team this year, with final number of projects to go ahead to be determined by Google
 - Confirmed contributors will be announced on May 8th UTC by Google
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58,000 installations of the [Chinese localization plugin](#)
 - Runxia Ye and Mark discussed at FOSDEM
 - Check the actual usage of the Chinese with analytics
 - Check the actual usage of Chinese localization
 - Alternative would be to find a funding source to translate latest messages to Chinese
 - Kris has created a new issue to initiate adding native Chinese (both traditional and simplified) localization to Jenkins core natively
 - <https://issues.jenkins.io/browse/JENKINS-75364>
 - The localization is planned to start sometime Summer 2025

- Kris recently adopted the Chinese docs site
 - Modernization and updates will happen along with localization efforts
- Are the Jenkins users already English speakers and don't need Chinese localization?
- Potentially include Chinese localization in core and deprecate/disable plugin once it is complete
- Not enough data to determine one way or another just yet
- LTS and Weekly releases
 - [2.504.1. Released](#) yesterday (April 30)
 - [2.507 changelog](#) - Apr 22, 2025
 - [2.508 changelog](#) - Apr 29, 2025
 - [2025-04-10 Security Advisory](#)
 - Jenkins Docker images
- Recent work
 - Thanks to [Mark](#) for [fixing the example Docker plugin definition](#)
 - Thanks to [Basil](#) for [updating the linux installation guide keyring location](#)
 - Thanks to [Alex Brandes](#) for [updating the archetypes in the developer tutorial docs](#) in [Plugin Management docs](#)
 - Thanks to [Pierre](#) for [removing an out of date note](#)
 - Thanks to [Birajit](#) for the continued work on [renaming the jenkins.io master branch to main](#) and [Groovy best practices/administrative capabilities](#)
 - Lots of work done, lots of work still to be done for branch rename
 - Found/filtered through most areas of jenkins-infra org where the current naming is used
 - Commented on jenkins.io issue to keep up visibility with Infra team and figure out what needs to be done elsewhere
- Alpha Omega idea - improving open source security for Jenkins users - Mark Waite
 - Further discussions had at Jenkins Contributor Summit - 31 Jan 2025
 - Not expecting any additional projects yet, but Wadeck is working with them periodically
 - Not right now, but maybe later
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying "work in progress"
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.

- Google Season of Docs program is closed - Mark Waite
 - Announced in a [Google Group](#)
 - *The 84 Google Season of Docs case studies (and the final project reports from the 2019-2020 seasons) will continue to be accessible on the [program website](#). 2025-03-20

Attendees:

- Kevin Martens
- Bruno Verachten
- Birajit
- Meg McRoberts
- Patrik Mane
- Mark Waite

Agenda

- Contributor spotlight
 - Next spotlight, featuring Yaroslav Afenkin, will be published by the end of this week or beginning of next week.
 - Will also be performing additional interviews over the coming weeks for further spotlights.
 - Spotlights to be published once per month
- Documentation developer experience - Meg McRoberts
 - Initial documentation development setup was not working
 - Can't build based on the instructions
 - Mark uses Docker CE (Docker Desktop for Ubuntu 22.04 - make run)
 - Kris uses a macOS with Docker (make run)
 - Kevin also using this setup and seems to work
 - Others have shared that they have run things successfully
 - Meg is seeing many complaints about file permissions
 - Meg opened [an issue to track it](#) (record what others need to do)
 - Docker minimum version is much older than the version she has
 - Kevin added links to various docker installation instructions (Docker engine & docker desktop)

- Potentially work with Mark on initial setup/run
- Documentation fixes implemented
 - Disable search indexing of the docs.jenkins.io prototype site
 - Oleg Nenashev detected that docs.jenkins.io is appearing in Google search results
 - Searched for “Jenkins documentation officer” and outdated page on docs.jenkins.io was returned as 2nd link
 - Kris opened a pull request to add the needed robots.txt file at <https://github.com/jenkins-infra/docs.jenkins.io/pull/249> and <https://github.com/jenkins-infra/docs.jenkins.io/pull/250>
 - Appears to have resolved the issue

 - Potentially include Chinese localization in core and deprecate/disable plugin once it is complete
 - Not enough data to determine one way or another just yet
- LTS releases
 - [2.492.3 changelog & upgrade guide for review](#), scheduled for [Apr 2, 2025](#)
 - RC available today
 - [2025-03-05 Security Advisory published](#)
 - Jenkins Core
 - [2025-03-19 Security Advisory published](#)
 - Only plugins
- Jenkins Contributor Summit
 - Very successful, lots of work in the breakout groups and discussions overall
 - Blog post recap to come from Mark Waite
- Recent work
 - Thanks to [Jim](#) for additional [updates to the Jenkins on Kubernetes docs](#)
 - Thanks to [Kris](#) for the [updates/adjustments](#) for the [Thank you feature](#)
 - Thanks to [Raviraj](#) for updating the [Apache reverse proxy docs with Unix Domain Socket info](#)
 - Thanks to [Clinton](#) & [Pratik](#) for their work on the merchandise page to [remove broken shops](#) and [update with additional links](#) respectively
 - Thanks to [Colleen](#) for creating the [Leeroy Jenkins logo](#)

- Alpha Omega documentation project idea - improving open source security for Jenkins users - Mark Waite
 - Further discussions had at Jenkins Contributor Summit - 31 Jan 2025
 - Not sure about second collaboration yet, still time for them to make decisions
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.

2025-03-06

Attendees:

- Kris Stern
- Kevin Martens
- Bruno Verachten
- Birajit
- Meg McRoberts
- Soham
- Manash
- Mark Waite

Agenda

- [Contributor spotlight for Kohsuke Kawaguchi published](#)
 - Great to share Kohsuke’s background and stories about Jenkins
 - Kevin has interviewed Yaroslav Afenkin for the next spotlight
 - Will also be performing additional interviews over the coming weeks for further spotlights.
 - Spotlights to be published once per month
- Documentation developer experience - Meg McRoberts
 - Initial documentation development setup was not working
 - Can’t build based on the instructions
 - Mark uses Docker CE (Docker Desktop for Ubuntu 22.04 - make run)
 - Kris uses a macOS with Docker (make run)
 - Kevin also using this setup and seems to work
 - Others have shared that they have run things successfully

- Meg is seeing many complaints about file permissions
 - Meg opened [an issue to track it](#) (record what others need to do)
 - Docker minimum version is much older than the version she has
 - Kevin added links to various docker installation instructions (Docker engine & docker desktop)
 - Potentially work with Mark on initial setup/run
- Documentation fixes needed
 - Disable search indexing of the docs.jenkins.io prototype site
 - Oleg Nenashev detected that docs.jenkins.io is appearing in Google search results
 - Searched for “Jenkins documentation officer” and outdated page on docs.jenkins.io was returned as 2nd link
 - Proposal: Create a robots.txt file on docs.jenkins.io root that excludes indexing of all pages
 - Still a prototype site, best not to confuse readers by how good looking it is
 - A volunteer to create that robots.txt file as a pull request to the [repository](#)?
 - Kris volunteered to set this up to prevent indexing on docs.jenkins.io
 - Post meeting follow-up: Kris opened a pull request to add the needed robots.txt file at <https://github.com/jenkins-infra/docs.jenkins.io/pull/249> and <https://github.com/jenkins-infra/docs.jenkins.io/pull/250>
 - Appears to have resolved the issue
- [Command palette blog post](#)
 - Also sent out as tweet/post from Jenkins account to increase visibility
 - Search docs [updated to reflect command palette](#)
- Google Summer of Code - Kris Stern
 - [Blog announcing Jenkins in GSoC 2025](#)
 - New project ideas
 - Chatbot plugin inside Jenkins to answer user question
 - Mostly Jenkins resources/where to find, not necessarily how to do things in Jenkins
 - Improving Tekton Client Plugin for Jenkins
 - Kris plans to interview candidates to mentored projects
 - New potential mentors
 - V. Sreenivas
 - Vibhav Bobade
 - Completing versioned docs site/alternative build tools
 - Mentors would be Kris Stern and Kevin Martens (and maybe also Bruno)
 - Lots of activity in GSoC gitter channel, multiple people interested

- Potentially starting from scratch for the Gatsby part only vs working from what was done in '23, but definitely reusing the Antora part from the 2023 project
 - May be more consistent to start over but further discussions will be had
 - Stories site retooling/rebuild/modernize (to some degree)
 - May want to standardize how the stories site is (compared to spotlight)
 - Multiple people interested in this as well
 - Project overview meetings held (March 5 & 6)
 - Lots of interest in projects, recordings will be available
 - [Recording for Mar 5, 2025](#) available
 - [Recording for March 6, 2025 available](#)
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58,000 installations of the [Chinese localization plugin](#)
 - Runxia Ye and Mark discussed at FOSDEM
 - Check the actual usage of the Chinese with analytics
 - Check the actual usage of Chinese localization
 - Alternative would be to find a funding source to translate latest messages to Chinese
 - Kris will create a new issue to initiate adding native Chinese (both traditional and simplified) localization to Jenkins core natively
 - <https://issues.jenkins.io/browse/JENKINS-75364>
 - Are the Jenkins users already English speakers and don't need Chinese localization?
 - Potentially include Chinese localization in core and deprecate/disable plugin once it is complete
 - Not enough data to determine one way or another just yet
- LTS releases
 - [2.492.2 Changelog & Upgrade guide available](#)
 - 2.500(!) available
 - [2025-03-05 Security Advisory published](#)
- Jenkins Contributor Summit
 - Very successful, lots of work in the breakout groups and discussions overall
 - Blog post recap to come from Mark Waite
- Recent work
 - Thanks to [Jim Klimov](#) for submitting [updates to the Jenkins on Kubernetes docs](#)
 - Thanks to [Birajit](#) for their recent work on updating the changelog archive, and many other efforts.
 - Updates to "[Manage Users](#)", [Artwork](#), [System Information](#), [Books](#)
 - Submitted [building a C++ app with jenkins tutorial](#)
 - One very ambitious pull is to [update the master branch of jenkins.io to main](#)

- Kevin testing and checking various sites/locations that could cause something to break
 - Submitted some updates to Birajit's fork for things like links in the documentation, but this does not cover how other sites may interact with this sort of change
- Thanks to [Manash](#) for their work on [making the events calendar responsive](#)
 - Very nice to have, now responds to mobile devices and smaller window/screen sizes.
 - Great collaboration with the community.
- Thanks to [Lakshmi](#) for the [update to the jenkins.io thank you note styling](#)
- Alpha Omega documentation project idea - improving open source security for Jenkins users - Mark Waite
 - Further discussions had at Jenkins Contributor Summit - 31 Jan 2025
 - Not sure about second collaboration yet, still time for them to make decisions
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying "work in progress"
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.

2025-02-20

Attendees:

- Kris Stern
- Mark Waite
- Meg McRoberts
- Kevin Martens
- Bruno Verachten
- Soham Juneja
- Birajit
- Pratik Mane

Agenda

- [Contributor spotlight for Kohsuke Kawaguchi published](#)
 - Great to share Kohsuke's background and stories about Jenkins
- Documentation developer experience - Meg McRoberts

- Initial documentation development setup was not working
 - Can't build based on the instructions
 - Mark uses Docker CE (Docker Desktop for Ubuntu 22.04 - make run)
 - Kris uses a macOS with Docker (make run)
 - Meg is seeing many complaints about file permissions
- Meg opened [an issue to track it](#) (record what others need to do)
 - Docker minimum version is much older than the version she has
- Documentation fixes needed
 - Docs Office Hours are incorrectly described (once every two weeks, twice every week)
 - Kevin submitted a [pull request to](#) update, has been merged but not visible just yet
 - Disable search indexing of the docs.jenkins.io prototype site
 - Oleg Nenashev detected that docs.jenkins.io is appearing in Google search results
 - Searched for "Jenkins documentation officer" and outdated page on docs.jenkins.io was returned as 2nd link
 - Proposal: Create a robots.txt file on docs.jenkins.io root that excludes indexing of all pages
 - Still a prototype site, best not to confuse readers by how good looking it is
 - A volunteer to create that robots.txt file as a pull request to the [repository](#)?
 - Kris has volunteered to set this up to prevent indexing on docs.jenkins.io
 - Post meeting follow-up: Kris opened a pull request to add the needed robots.txt file at <https://github.com/jenkins-infra/docs.jenkins.io/pull/249> and <https://github.com/jenkins-infra/docs.jenkins.io/pull/250>
- [Command palette blog post](#)
 - Also sent out as tweet/post from Jenkins account to increase visibility
 - Search docs [updated to reflect command palette](#)
- Google Summer of Code - Kris Stern
 - New project ideas
 - Chatbot plugin inside Jenkins to answer user question
 - Mostly Jenkins resources/where to find, not necessarily how to do things in Jenkins
 - Improving Tekton Client Plugin for Jenkins
 - Kris plans to interview candidates to mentored projects
 - New potential mentors
 - V. Sreenivas
 - Vibhav Bobade
 - Completing versioned docs site/alternative build tools
 - Mentors would be Kris Stern and Kevin Martens (and maybe also Bruno)

- Stories site retooling/rebuild/modernize (to some degree)
 - May want to standardize how the stories site is (compared to spotlight)
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58000 installations of the [Chinese localization plugin](#)
 - Runxia Ye and Mark discussed at FOSDEM
 - Check the actual usage of the Chinese with analytics
 - Check the actual usage of Chinese localization
 - Alternative would be to find a funding source to translate latest messages to Chinese
 - ~~■ Kris could draft a project idea to maintain the Simplified Chinese (mainland China)~~
 - Kris will create a new issue to initiate adding native Chinese (both traditional and simplified) localization to Jenkins core natively
 - Are the Jenkins users already English speakers and don't need Chinese localization?
 - Potentially include Chinese localization in core and deprecate/disable plugin once it is complete
 - Not enough data to determine one way or another just yet
- LTS releases
 - LTS 2.492.1 released on February 5 2025
 - 2.492.2 release lead is Kris Stern
 - [2.492.2 Changelog & Upgrade guide PR available for review](#)
- Jenkins Contributor Summit
 - Very successful, lots of work in the breakout groups and discussions overall
 - Blog post recap to come from Mark Waite
- Recent work
 - Thanks to [Birajit](#) for their recent work on updating the changelog archive, and many other efforts.
 - One very ambitious pull is to [update the master branch of jenkins.io to main](#)
 - Kevin testing and checking various sites/locations that could cause something to break
 - Submitted some updates to Birajit's fork for things like links in the documentation, but this does not cover how other sites may interact with this sort of change
- Alpha Omega documentation project idea - improving open source security for Jenkins users - Mark Waite
 - Further discussions had at Jenkins Contributor Summit - 31 Jan 2025
 - Not sure about second collaboration yet, still time for them to make decisions
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying "work in progress"

- How can this be updated/enhanced and provide a more confident experience
- What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - Tutorials moved towards bottom of page and includes status note
 - Status notes have been updated to indicate alternatives/replacements for pipeline visualization.

2025-02-06

Attendees:

- Kris Stern
- Mark Waite
- Meg McRoberts

Agenda

- Documentation developer experience - Meg McRoberts
 - Initial documentation development setup was not working
 - Can't build based on the instructions
 - Mark uses Docker CE (Docker Desktop for Ubuntu 22.04 - make run)
 - Kris uses a macOS with Docker (make run)
 - Meg is seeing many complaints about file permissions
 - Meg opened an issue to track it (record what others need to do)
 - Docker minimum version is much older than the version she has
- Documentation fixes needed
 - Docs Office Hours are incorrectly described (once every two weeks, twice every week)
- Google Summer of Code - Kris Stern
 - New project ideas
 - Chatbot plugin inside Jenkins to answer user question
 - Content Security Policy implementation as a GSoC project idea
 - Mark is skeptical of this one, needs more discussion
 - Candidate strength is the biggest concern
 - Kris plans to interview candidates to mentored projects
 - New potential mentor
 - V. Sreenivas
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58000 installations of the [Chinese localization plugin](#)
 - Runxia Ye and Mark discussed at FOSDEM
 - Check the actual usage of the Chinese with analytics

- Check the actual usage of Chinese localization
 - Alternative would be to find a funding source to translate latest messages to Chinese
 - Kris could draft a project idea to maintain the Simplified Chinese (mainland China)
 - Are the Jenkins users already English speakers and don't need Chinese localization?
- LTS releases
 - LTS 2.492.1 released on February 5 2025
 - 2.492.2 release lead is Kris Stern
- Jenkins Contributor Summit - 31 Jan 2025 in Brussels, Belgium
- Alpha Omega documentation project idea - improving open source security for Jenkins users - Mark Waite
 - Further discussions at Jenkins Contributor Summit - 31 Jan 2025
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying "work in progress"
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun

2025-01-23

Attendees:

- Kris Stern
- Mark Waite
- Bruno Verachten
- Meg McRoberts
- Soham Juneja

Agenda

- Contributor Spotlight
 - Currently featuring [James Nord](#)
 - First spotlight of 2025 will be with Kohsuke Kawaguchi
 - Provided lots of great stories, insights, and content
 - Kevin still working through interview/transcripts to put together a complete story
 - Change up the publication cadence with historical spotlights
- Jenkins Contributor Summit - 31 Jan 2025 in Brussels, Belgium
 - Bruno Verachten has [shared the work in progress agenda](#)

- Draft agenda
 - Morning reports
 - Proposed to reduce from 3 hours to 2 hours
 - Allow more time for discussions and breakout sessions
 - Afternoon breakout sessions for specific topics
 - Maintenance
 - Infra
 - Security
 - UX SIG
 - Jenkins 3
 - Outcomes
 - Face to face discussions of important topics
 - Results from last year
 - Plugin health score
 - UX improvements (Pipeline graph view)
 - Won't be streamed, but summaries will be shared
 - Each breakout leader will summarize the breakout results in a 5 minute presentation
 - Updates from SIG leaders and officers
 - Breakout sessions for group work on Jenkins
- Blog posts
 - [Google Summer of Code call for mentors](#)
 - GSoC 2025 officially announced by Google
 - [Build retooling of jenkins.io](#)
 - Goal to have versioned docs site
 - Continuation of project from GSoC 2023
 - [2024 year in review](#)
 - Thanks to Roxanne from CDF for sponsor image & header images
 - Thanks to Mark and Governance board for helping ensure all the sponsors were included
 - Thanks to everyone for their contributions and input on the content of this post
 - Announcement of [Jenkins Design Library 3](#)
 - Thanks to Jan Faracik for putting this together and everyone who worked on this to bring it to life
 - [Jenkins & Alpha-Omega December Update](#)
 - Initial CSP project completed
 - Thanks to Shlomo Dahan and Yaroslav Afenkin for all of their work on this
 - Thanks to Bruno Verachten and Basil Crow for their leadership and guidance
 - Looking forward to hopefully working with Alpha-Omega again in the near future
- LTS 2.479.3 released successfully

- [Changelog & Upgrade guide available](#)
- LTS 2.492.1 to be released on February 5 2025
 - Release candidate is available now, testers are welcomed
 - [PR for Changelog & upgrade guide](#)
 - Included a Windows test update in the “Changes since 2.492” section to circumvent a rendering issue that was found in Kevin’s local testing (needs further investigation/testing)
 - Kevin to potentially create an issue if the problem seems more involved/deeper
- Weekly 2.493 and 2.494 released without any issues
 - 2.495 looks to be on track as expected
- Alpha Omega documentation project idea - improving open source security for Jenkins users - Mark Waite
 - Further discussions at Jenkins Contributor Summit - 31 Jan 2025
 - Create multiple tutorials or documentation pages that show how to use specific security tools with Jenkins
 - Generating an SBOM with Jenkins - [Darin Pope video](#) as a starting point
 - Java SBOM
 - JavaScript SBOM
 - Python SBOM
 - Golang SBOM
 - ...
 - Signing files with sigstore
 - SLSA compliant builds with Jenkins
 - creating a new Maintainer tutorial
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- [Chinese documentation site](#) and [Chinese localization plugin](#)
 - Planned to retire it, but there are 58000 installations of the [Chinese localization plugin](#)
 - Removing Chinese docs site does not block Chinese Jenkins users, but ...
 - Add a banner that the Chinese material is out of date
 - Alternately add a banner that invites users to answer a survey or to contribute
 - Alternatively add a banner that warns the site will be removed and invites a vote to keep it
 - Alternative - add google analytics and watch the results

- Should we consider a Jenkins project funded translation to Chinese?
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - [Blue Ocean plugin development](#) docs removed to avoid encouraging users from doing so
 - [Blue Ocean tutorials moved to bottom of page](#) along with adding a status note
 - [First attempt to remove Blue Ocean from Docker installation guide](#) - instruction needs to be replaced with Docker compose instructions before Blue Ocean can be removed as there are far more references to Blue Ocean than the PR suggests.
 - Needs discussion around what has to be done to incorporate docker compose into the installation guide.
 - Barriers to replacing the Docker installation guide with Docker Compose instructions
 - Changing the Docker installation guide to be more Production focused than more tutorial/smaller scale installation, this would require more doc rework than what my initial suggestion would involve
 - Refer to tutorials for what that might look like
 - May need to revisit Kubernetes install guide as well
 - Bigger than just Blue Ocean deprecation
 - What to do with small references within documentation
 - Copy and paste into a separate page for historical retention?
 - Update the instructions to just remove these pieces if they are no longer relevant?
 - For Blue Ocean section of documentation, not everything will have a 1:1 replacement, so what to do with pages that are not redirected
 - Create some sort of archived docs folder in the repo that doesn't get included in the site
 - Add a "deprecated" tag/text to the main page header to indicate that these functionalities are deprecated
 - What to replace some things with (Pipeline Graph View plugin, Branch API plugin, etc)
 - Pages like [Dashboard](#) & [Activity View](#) appear to be Blue Ocean specific, so these would not necessarily make sense to keep around or even redirect (unless there is a suitable replacement for them via another plugin)
 - The plugins replacing these functionalities do not necessarily have extensive documentation (like the current Blue Ocean docs) so what would be the best course of action to incorporate those pieces of information

- Plan further for documentation updates/removal in the UI more than full deletion/removal

2025-01-09

Attendees:

- Kevin Martens
- Kris Stern
- Mark Waite
- Bruno Verachten
- Meg McRoberts
- Soham Juneja

Agenda

- Contributor Spotlight
 - Currently featuring [James Nord](#)
 - First spotlight of 2025 will be with Kohsuke Kawaguchi
 - Change up the publication cadence with historical spotlights
- Jenkins Contributor Summit - 31 Jan 2025 in Brussels, Belgium
 - Mark Waite has proposed prioritized list of Contributor Summit attendees to have travel funded by Software in the Public Interest
 - Bruno Verachten has [shared the work in progress agenda](#)
- Blog posts
 - [Google Summer of Code call for mentors](#)
 - Still waiting for Google to announce GSoC (bit behind/late than usual)
 - Don't want to start and then have to stop suddenly
 - Unsure of when/if this might happen
 - [Build retooling of jenkins.io](#)
 - Goal to have versioned docs site
 - Continuation of project from GSoC 2023
 - Upcoming blog post: [2024 recap](#)
 - Thanks to Roxanne from CDF for sponsor image & header images
 - Sponsor image needs approval from Governance Board before this can be merged (determine whether sponsors are categorized properly)
 - If there is anything that should be highlighted but is missing, please share that feedback so that it can be added to the blog
 - Upcoming blog post: Announcement of [Jenkins Design Library 3](#)
 - Thanks to Jan Faracik for putting this together and everyone who worked on this to bring it to life

- Already reviewed/approved, will be published tomorrow
- Jenkins elections
 - [Election results](#)
 - The results are in, and we welcome Valentin Delaye & Alex Earl to the board.
 - We also welcome back Alexander Brandes as a returning member of the governance board.
 - The officers will remain in and continue their roles for another term, thanks to all of them for their work and commitment to the project.
 - Thanks to all the participants who submitted nominations, registered, and voted.
- LTS 2.479.3 released successfully
 - [Changelog & Upgrade guide available](#)
- Next LTS to be released on February 6 2025
 - Current baseline discussion is in favor of 2.492
 - 2.492 contains backports and fixes that would have been necessary to incorporate after the fact if 2.491 was used.
 - Kevin to start compiling changelog & upgrade guide over the next week
- Weekly 2.490, 2.491, and 2.492 released
 - 2.491 done off schedule to revert a regression/update introduced in 2.490
- Alpha Omega documentation project idea - improving open source security for Jenkins users - Mark Waite
 - Create multiple tutorials or documentation pages that show how to use specific security tools with Jenkins
 - Generating an SBOM with Jenkins
 - Java SBOM
 - JavaScript SBOM
 - Python SBOM
 - Golang SBOM
 - ...
 - Signing files with sigstore
 - SLSA compliant builds with Jenkins
 - creating a new Maintainer tutorial
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Recent work done on jenkins.io
 - Work done by Stephane Merle to restore deploy preview & adjust some recent updates

- [ruby alignment](#) & [base64 dependency](#)
 - [Platform SIG content update](#) - Mark Waite
 - [Added documentation about FilePath](#) - Stefan Spieker
 - Also removes the WIP status
 - [Polish some GSoC 2025 documentation](#) - Kris Stern
 - [Add Plugin Modernizer tool project idea](#) - Valentin Delaye
 - [Adjustments to Linux installation docs](#) - Mark Waite
 - [Recommend Maven 3.9.6 or newer](#) - [KalleOlaviNiemitalo](#)
 - Update to developer docs for Plugin BOM consistency
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - [Blue Ocean plugin development](#) docs removed to avoid encouraging users from doing so
 - [Blue Ocean tutorials moved to bottom of page](#) along with adding a status note
 - [First attempt to remove Blue Ocean from Docker installation guide](#) - instruction needs to be replaced with Docker compose instructions before Blue Ocean can be removed as there are far more references to Blue Ocean than the PR suggests.
 - Needs discussion around what has to be done to incorporate docker compose into the installation guide.
 - Barriers to replacing the Docker installation guide with Docker Compose instructions
 - Changing the Docker installation guide to be more Production focused than more tutorial/smaller scale installation, this would require more doc rework than what my initial suggestion would involve
 - Refer to tutorials for what that might look like
 - May need to revisit Kubernetes install guide as well
 - Bigger than just Blue Ocean deprecation
 - What to do with small references within documentation
 - Copy and paste into a separate page for historical retention?
 - Update the instructions to just remove these pieces if they are no longer relevant?
 - For Blue Ocean section of documentation, not everything will have a 1:1 replacement, so what to do with pages that are not redirected
 - Create some sort of archived docs folder in the repo that doesn't get included in the site
 - Add a "deprecated" tag/text to the main page header to indicate that these functionalities are deprecated
 - What to replace some things with (Pipeline Graph View plugin, Branch API plugin, etc)

 - The plugins replacing these functionalities do not necessarily have extensive documentation (like the current Blue Ocean docs) so what would be the best course of action to incorporate those pieces of information
- Plan further for documentation updates/removal in the UI more than full deletion/removal

2024-12-12 (EU/US)

Attendees:

- Kevin Martens
- Kris Stern
- Mark Waite
- Bruno Verachten
- Meg McRoberts
- Soham Juneja

Agenda

- Contributor Spotlight
 - Currently featuring [James Nord](#)
 - Discussed in previous Advocacy & Outreach meeting that the spotlight will join rest of Jenkins project in 2 week break at end of year, so this will be the last spotlight for 2024
 - Discussed in Advocacy & Outreach about potential “other” type of posts for the contributor spotlight
 - Top Advice
 - Jenkins first impressions vs now
 - Jenkins historical contributors (have shared list of potential candidates with Alyssa for connecting and scheduling)
- Blog posts
 - [Alpha-Omega progress report 2](#)
 - Thanks to Bruno Verachten for writing this up.
 - Thanks to Basil Crow for guiding the work on this project
 - Thanks to Shlomo Dahan and Yaroslav Afenkin for all of their continued efforts in improving CSP in Jenkins.

- Lots of amazing work continuing the progress, working from the top down (in regards to installations), biggest plugins and components have already been addressed
 - This work is also helping plugin maintainers understand what work needs to be done in the future to keep up with CSP
 - [Pull request titles show directly in Jenkins](#)
 - Thanks to Jan Faracik for doing the work in the Branch API plugin to make this possible.
 - Comes from a user request in [this Jenkins JIRA ticket](#)
 - Another case of migrating functions from Blue Ocean to other locations (Pipeline Graph View, etc)
- Jenkins elections
 - [Election results](#)
 - Voting has concluded and counted
 - The results are in, and we welcome Valentin Delaye & Alex Earl to the board.
 - We also want to welcome back Alexander Brandes as a returning member of the governance board.
 - The officers will remain in and continue their roles for another term, thanks to all of them for their work and commitment to the project.
 - Thanks to all the participants who submitted nominations, registered, and voted.
- LTS 2.479.2 released successfully
 - [Changelog & Upgrade guide available](#)
 - Part of the security advisory on Nov 27, 2024
- 2.479.3 to be released on January 8 2025
 - Kris Stern is release lead
 - [PR for changelog & upgrade guide](#)
 - RC: looking alright but there may be more backports as we move forward
- Weekly 2.488 & 2.489 released
 - Work done by Alex Earl, that was reverted, is coming back with the issue resolved
 - Windows users, ran into issues with “upgrade now” button
 - Windows registry is not updated with the current Jenkins version
 - What needs to be done to match the controller
 - 2.490 will be last weekly release of 2024
 - Weekly & LTS releases will be paused for 2 week end of year break
- [Jenkins security advisory for Nov 27, 2024](#)
 - Includes Jenkins core and Plugins
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience

- What would be the best way to address this?
 - Improve a plugin tutorial helps, but does not address the developer documentation directly
- Blue Ocean Deprecation
 - Work to remove Blue Ocean from documentation has begun
 - [Blue Ocean plugin development](#) docs removed to avoid encouraging users from doing so
 - [Blue Ocean tutorials moved to bottom of page](#) along with adding a status note
 - [First attempt to remove Blue Ocean from Docker installation guide](#) - instruction needs to be replaced with Docker compose instructions before Blue Ocean can be removed as there are far more references to Blue Ocean than the PR suggests.
 - Needs discussion around what has to be done to incorporate docker compose into installation guide.
 - Barriers to replacing the Docker installation guide with Docker Compose instructions
 - Changing the Docker installation guide to be more Production focused than more tutorial/smaller scale installation, this would require more doc rework than what my initial suggestion would involve
 - Refer to tutorials for what that might look like
 - May need to revisit Kubernetes install guide as well
 - Bigger than just Blue Ocean deprecation
 - What to do with small references within documentation
 - Copy and paste into a separate page for historical retention?
 - Update the instructions to just remove these pieces if they are no longer relevant?
 - For Blue Ocean section of documentation, not everything will have a 1:1 replacement, so what to do with pages that are not redirected
 - Create some sort of archived docs folder in the repo that doesn't get included in the site
 - Add a "deprecated" tag/text to the main page header to indicate that these functionalities are deprecated
 - What to replace some things with (Pipeline Graph View plugin, Branch API plugin, etc)
 - Pages like [Dashboard](#) & [Activity View](#) appear to be Blue Ocean specific, so these would not necessarily make sense to keep around or even redirect (unless there is a suitable replacement for them via another plugin)
 - The plugins replacing these functionalities do not necessarily have extensive documentation (like the current

- Blue Ocean docs) so what would be the best course of action to incorporate those pieces of information
 - Plan further for documentation updates/removal in the UI more than full deletion/removal
- Recent work done on jenkins.io
 - Updated GSoC 2025 documentation
 - Thanks to Kris Stern for all of their work updating the GSoC documentation for next year.
 - This includes updating the project ideas and other information regarding 2025's planned GSoC involvement
 - Preparation for GSoC 2025 well under way
 - [Update Docker Groovy script path documentation](#)
 - Thanks to [Birajit Saikia](#) for his work and incorporating the feedback provided by Damien Duportal and others
 - Also working on [archiving the older LTS changelogs](#)
 - [Compress image check has been fixed](#)
 - Thanks to Tim Jacomb for the work on updating the image compression check and removing unexpected errors from the pr checks.
- Stats.jenkins.io dark mode is available now!
- Jenkins Contributor Summit - 31 Jan 2025 in Brussels, Belgium
 - Mark Waite has proposed prioritized list of Contributor Summit attendees to have travel funded by Software in the Public Interest
- Alpha Omega documentation project idea - improving open source security for Jenkins users - Mark Waite
 - Create multiple tutorials or documentation pages that show how to use specific security tools with Jenkins
 - Generating an SBOM with Jenkins
 - Java SBOM
 - JavaScript SBOM
 - Python SBOM
 - Golang SBOM
 - ...
 - Signing files with sigstore
 - SLSA compliant builds with Jenkins
 -

2024-11-15 (Asia)

Attendees:

- Mark Waite
- Meg McRoberts

Agenda

- [Hacktoberfest Recap blog post](#)
- Jenkins elections
 - [Voter registration announcement](#)
 - Voter registration is open again
 - Voting is in progress
 - Have over 50% participation from registered voters
 - Voting ends 30 Nov 2024
 - Results announced early December
- Plugin BOM new maintainers
 - Plugin BOM now scheduled to build once a week
 - Mark will release tomorrow
 - Bruno Verachten release lead for the following two weeks
 - Kris Stern is release lead for two weeks after that
 - How to rotate assignment
 - Have a proposed rotation
 - Tutorial on plugin BOM
 - [documentation improvement issue](#)
- Shall we continue meeting at this time?
 - Combine Docs Office Hours into one session?
 - Can always convene a session or restart sessions if there is interest
 - Decided - Mark remove from calendar

2024-11-14 (EU/US)

Attendees:

- Kevin Martens
- Kris Stern
- Mark Waite
- Bruno Verachten

Agenda

- Contributor Spotlight
 - Currently featuring [Jesse Glick](#)
 - Next will be [Vincent Latombe](#)
 - December spotlight will feature James Nord
 - Discussed in previous Advocacy & Outreach meeting that the spotlight will join rest of Jenkins project in 2 week break at end of year, so this will be the last spotlight for 2024
 - Discussed in Advocacy & Outreach about potential “other” type of posts for the contributor spotlight
 - Top Advice
 - Jenkins first impressions vs now
 - Jenkins historical contributors

- [Hacktoberfest Recap blog post](#)
 - Thanks to all the contributors for all of their work!
 - Contribution stats:
 - Total number of PRs created in jenkinsci and jenkins-infra orgs: 1,174
 - Total Hacktoberfest PRs: 243 by 67 contributors
 - Total validated Hacktoberfest PRs: 223
 - [List of issues in Jenkins JIRA](#)
 - Refined by Darin, Basil, Mark, and Bruno
 - Video series with Darin (and Mark) on [various developer topics](#)
 - Include a new section in developer docs for maintaining a plugin
- Blog posts
 - [Brownout for Update Center](#)
 - Incredibly helpful for Infra team
 - Resolved issues found
 - Update center migration to take place in the next week or so
 - [Revamping Jenkins Tutorials: Simplicity and Inclusivity](#) by Bruno Verachten
 - Video overview of what the previous tutorials were, the challenges they presented, what has been done to update them and include Docker Compose, and the contributors/partnership of GSoC
 - Thanks so much Bruno for the work done on this and the thorough explanation
 - [Alpha-Omega progress report](#)
 - Thanks to Bruno Verachten for writing this up.
 - Thanks to Basil Crow for guiding the work on this project
 - Thanks to Shlomo Dahan and Yaroslav Afenkin for all of their continued efforts in improving CSP in Jenkins.
 - Lots of amazing work and a furious sprint to start the progress, working from the top down (in regards to installations), biggest plugins and components have already been addressed
 - This work is also helping plugin maintainers understand what work needs to be done in the future to keep up with CSP
- Jenkins elections
 - [Voter registration announcement](#)
 - Voter registration is open again
 - Thanks to Oleg Nenashev for starting the discussion to re-open voter registration & governance board for opening it back up
 - Voter registration will be open until voting closes on November 30 2024.
 - Includes list of candidates, contributing information/guide, and timeline for registration, voting, and election results
 - Join [election-voter-2024](#) group to ensure that you are eligible to vote

- 78 registered voters at this time, be sure to share with others if they have contributed to Jenkins in any way over the last year.
 - Voting will take place between Nov 1, 2024 and Nov 30, 2024
 - Results will be announced on December 1st or 2nd 2024
 - Any questions, reach out to [the election committee](#)
- [Candidate statements](#)
 - Statements included for all candidates of governance board & release officer
 - Includes contributor spotlights where applicable
 - Positions with only 1 nominee will not include candidate statements as there will not be voting for those positions
- LTS 2.479.1 released
 - Release went well, no major issues or hiccups
 - [changelog](#) & [upgrade guide](#) for 2.479.1
 - Major changes including Java 17 requirement and upgrade to Spring Security 6/Spring Framework 6/Jakarta EE 9
 - Upgrade guide goes into detail on Java 17, including information shared by Basil Crow in [the pinned comment of JENKINS-60891](#)
 - Be sure to update all plugins before & after upgrading Jenkins
 - Instructions included for LDAP & CAS plugins
 - [Servlet container support policy](#) page updated to reflect latest LTS
 - Basil Crow has added Reverse Proxy Auth and Windows Negotiate SSO upgrade instructions to the upgrade guide and noted these changes in the changelog
- Next LTS 2.479.2
 - Set to release on November 27 2024
 - [Changelog & upgrade guide PR submitted](#)
- Weekly 2.484 & 2.485 released without issue
- [Jenkins security advisory for Nov 13, 2024](#)
 - Plugin advisory only, no Jenkins core security issues in this advisory
- Plugin Developer documentation
 - Topic brought by Antoine Neveux at previous office hours
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
- Recent work done on jenkins.io
 - [Alauda added](#) to the [adopters page](#)
 - Thanks to yuzp1996 for the submission
 - Currently working with the contributor to sort out an authentication error for submitting a success story
 - Updated GSoC 2025 documentation
 - Thanks to Kris Stern for all of their work updating the GSoC documentation for next year.

- Might need some time to update some content
- Adding documentation for [interesting labels in developer guide](#)
 - Thanks to Hervé le Meur for their submission
- Adding documentation about [untrusted libraries](#)
 - Thanks to Jesse Glick for adding this information to the developer docs
- Updating [examples in the developer docs](#)
 - Thanks to Jesse Glick for this addition as well
 - Welcome addition to documentation, helps align with Java 17 functionalities
- Adding [st:bind to inline JS guidelines](#)
 - Thanks to Daniel Beck & Yaroslav Afenkin for spotting this gap and filling it in
- Updating changelog & Upgrade guide to [include Windows Negotiate SSO update instructions](#)
 - Thanks to Basil Crow for adding the documentation for this and providing instructions on how to update
- Updating changelog & upgrade guide to [add Reverse Proxy Auth upgrade instructions](#)
 - Thanks to Basil Crow for adding this documentation as well
- Stats.jenkins.io to have dark mode coming soon!

2024-10-31 (EU/US)

Attendees:

- Bruno Verachten
- Kevin Martens
- Antoine Neveux

Agenda

- Happy Halloween!
- Contributor Spotlight
 - Currently featuring [Devin Nusbaum](#)
 - Next will be [Jesse Glick](#)
 - Kevin has interviewed several contributors for future spotlights
 - There will be enough to publish to end of year (including 2 week break at end of December for holidays, discussed during Advocacy & Outreach meeting earlier today)
 - Discussed in Advocacy & Outreach about potential “other” type of posts for the contributor spotlight
 - Top 5/10 Advice

- Jenkins first impressions vs now
 - Possibly others as well as time goes on
- [Hacktoberfest blog post](#) & [Hacktoberfest page](#)
 - Hacktoberfest's last day is today
 - Good activity from contributors
 - [Update UI screenshots in Pipeline Documentation](#) - [ShrushtiDesai](#)
 - [Update screenshots for in-process script approval and change system time zone](#) - [gitclonengaurang](#)
 - [Remove duplicate callouts for code example](#) - [Vidya-2004](#)
 - [Update scaling Jenkins on Kubernetes screenshots](#) - [yashpal2104](#)
 - [Update Jenkins Viewing Logs screenshots](#) - [yashpal2104](#)
 - [Update Executor Starvation screenshot](#) - [MadalinaM22](#)
 - [Update Changing Time Zone screenshots](#) - [biancaAlexandru](#)
 - Thanks to all the contributors for all of their work!
 - Current stats:
 - Total number of PRs created in jenkinsci and jenkins-infra orgs: 1018
 - Total Hacktoberfest PRs: 193 (by 50 contributors)
 - Total validated Hacktoberfest PRs: 186 (by 46 contributors)
 - [List of issues in Jenkins JIRA](#)
 - Refined by Darin, Basil, Mark, and Bruno
 - Video series with Darin (and Mark) on [various developer topics](#)
 - Mondays & Wednesdays
 - Using Openrewrite
 - Extension of the "Improve a plugin" tutorial
 - [Maintain a plugin tutorial](#)
 - Source code formatting
 - Enabling Jenkins security scan
 - Frequency of updating the parent pom
 - Frequency of updating plugin BOM
 - [Modernizing Jenkins plugins](#)
- Blog posts
 - [Brownout for Update Center](#)
 - Incredibly helpful for Infra team
 - Discovering issues that need to be addressed before migrating update center
 - Probably one more, if not two
 - [Revamping Jenkins Tutorials: Simplicity and Inclusivity](#) by Bruno Verachten
 - Video overview of what the previous tutorials were, the challenges they presented, what has been done to update them and include Docker Compose, and the contributors/partnership of GSoC
 - Thanks so much Bruno for the work done on this and the thorough explanation

- Alpha-Omega progress report coming soon, thanks to Bruno for writing this up and sharing the work already completed and what the future plans are.
- Jenkins elections
 - [Voter registration announcement](#)
 - Open until Oct 31, 2024 (Today is the last day!)
 - Includes list of candidates, contributing information/guide, and timeline for registration, voting, and election results
 - Join [election-voter-2024](#) group to ensure that you are eligible to vote
 - 74 registered voters at this time, be sure to share with others if they have contributed to Jenkins in any way over the last year.
 - Voting will take place between Nov 1, 2024 and Nov 30, 2024
 - Results will be announced on December 1st or 2nd 2024
 - Any questions, reach out to [the election committee](#)
 - [Candidate statements](#)
 - Statements included for all candidates of governance board & release officer
 - Includes contributor spotlights where applicable
 - Positions with only 1 nominee will not include candidate statements as there will not be voting for those positions
- LTS 2.479.1 released yesterday Oct 30, 2024
 - Release went well, no major issues or hiccups
 - Mark Waite was release lead
 - Kevin created the [changelog](#) & [upgrade guide](#) for 2.479.1
 - Major changes including Java 17 requirement and upgrade to Spring Security 6/Spring Framework 6/Jakarta EE 9
 - Upgrade guide goes into detail on Java 17, including information shared by Basil Crow in [the pinned comment of JENKINS-60891](#)
 - Be sure to update all plugins before & after upgrading Jenkins
 - Instructions included for LDAP & CAS plugins
 - [Servlet container support policy](#) page updated to reflect latest LTS
- Plugin Developer documentation
 - Lots of warning signs in the documentation saying “work in progress”
 - How can this be updated/enhanced and provide a more confident experience
 - What would be the best way to address this?
- Recent work done on jenkins.io
 - [Automatic image compression in pull requests](#) - Alex Brandes
 - Alex has implemented an action that [compresses images within the PR once they are added](#).
 - Non-blocking error if the image is not compressed
 - Appears as though it is dependent on where the pull is coming from (forked vs main repo)
 - Still encourage users to compress images prior to submission

- This is to catch anything that is not already compressed or that can be compressed further
 - Thanks Alex for implementing this!
- [Banner in 2.462.3 LTS changelog for EOL of Java 11](#) - Mark Waite
 - Mark added a banner to the [2.462.3 changelog](#) to inform users that it is the last LTS to support Java 11.
 - Includes Java 17 and 21 as the usable Java versions after the October LTS release.
 - Also includes the [2+2+2 Java support plan](#)
 - Thanks to Mark Waite & Darin Pope for this!
- [Additional updates for Jenkins instance usage](#)
 - Last handful of pages that needed updates from “instance” to “controller” or something similar
 - [Security updates](#) reviewed, Kevin to close out issue
- [Add documentation on @Restricted annotation](#) - [Daniel Beck](#)
 - Additional documentation added to developer extensibility guide, thanks to Daniel Beck for providing this.
- [Add reference to Semgrep overview of XXE](#) - Daniel Beck
 - Thanks to Daniel for adding the link to this overview into the Security documentation.
- [Websocket configuration for Apache reverse proxy](#) - [Allan Burdajewicz/Dohbedoh](#)
 - Looks to resolve an [issue](#) to update the documentation
 - Merged
- [Issue: Changelog displayed 2.479.1 before the release](#)
 - This issue was created by Mark Waite and resolved by Daniel Beck, where the changelog was displaying the 2.479.1 changelog prior to the actual release

2024-10-18 (Asia)

Attendees:

- Mark Waite
- Kris Stern

Agenda

- Hacktoberfest progress report
 - Screenshot updates are arriving for [documentation good first issues](#)
 - Also seeing some submissions on the docs.jenkins.io site
 - Some good, others less effective
 - Added dark mode to Contributor Spotlight and confirmed it works
 - Kris taught Mark to enable on his Windows computer
- Plugin BOM new maintainers

- Plugin BOM now scheduled to build once a week
 - Friday at 11:00 AM UTC
 - Darin and Mark will do the release tomorrow
 - Darin will do the release next week
 - Will be looking for the next person to release for 2 weeks
- How to rotate assignment
 - One idea, put it in the Jenkinsfile as a comment with the time of the build
- Tutorial on plugin BOM
- [documentation improvement issue](#)

2024-10-17 (EU/US)

Attendees:

- Bruno Verachten
- Kevin Martens

Agenda

- Contributor Spotlight
 - Currently featuring [Adrien Lecharpentier](#)
 - Next will be [Devin Nusbaum](#)
 - Kevin interviewing several contributors for future spotlights
 - There will be enough to publish to end of year (including 2 week break at end of December for holidays, discussed during Advocacy & Outreach meeting earlier today)
- [Hacktoberfest blog post](#) & [Hacktoberfest page](#)
 - Hacktoberfest in progress
 - Good activity from contributors
 - [Remove duplicate callouts for code example](#) - [Vidya-2004](#)
 - [Update scaling Jenkins on Kubernetes screenshots](#) - [yashpal2104](#)
 - [Update Jenkins Viewing Logs screenshots](#) - [yashpal2104](#)
 - [Update Executor Starvation screenshot](#) - [MadalinaM22](#)
 - [Update Changing Time Zone screenshots](#) - [biancaAlexandru](#)
 - Thanks to all the contributors for all of their submitted & ongoing work!
 - [List of issues in Jenkins JIRA](#)
 - Refined by Darin, Basil, Mark, and Bruno
 - Video series with Darin (and Mark) on various developer topics
 - Mondays & Wednesdays
 - Using Openrewrite
 - Extension of the “Improve a plugin” tutorial
 - [Maintain a plugin tutorial](#)
 - Source code formatting
 - Enabling Jenkins security scan
 - Frequency of updating the parent pom

- Frequency of updating plugin BOM
 - [Modernizing Jenkins plugins](#)
- Blog posts
 - [Alpha-Omega foundation Content Security Policy grant](#)
 - Thanks to Alpha-Omega for their grant
 - Thanks to Shlomo Dahan and Yaroslav for joining the project to work on these improvements
 - Thanks to Basil Crow & Bruno Verachten for leading and guiding the project so that CSP can be improved
 - Progress reports will be shared with Alpha-Omega and potentially blog posts for jenkins.io
 - Shared in a GitHub repo, 1 PR a month for progress reports
 - Using ATH as the first low-hanging fruit/progress test
 - Report only mode 62 failures out of 370 tests which makes 81% after one week
- Jenkins elections
 - [Voter registration announcement](#)
 - Open until Oct 31, 2024
 - Includes list of candidates, contributing information/guide, and timeline for registration, voting, and election results
 - Join [election-voter-2024](#) group to ensure that you are eligible to vote
 - 70 registered voters at this time, be sure to share with others if they have contributed to Jenkins in any way over the last year.
 - Any questions, reach out to [the election committee](#)
 - [Candidate statements](#)
 - Statements included for all candidates of governance board & release officer
 - Includes contributor spotlights where applicable
 - Positions with only 1 nominee will not include candidate statements as there will not be voting for those positions
- Automated changelog generator had issues this week
 - 2.481 changelog had a little content, but was missing most of the changes and comments
 - Had to be done manually this week by Kevin & Mark
 - 2.482 automated changelog looks to be generated, will monitor for any potential issues
 - Thanks to [shenxianpeng](#) for the fix
- LTS 2.479.1 will release on Oct 30, 2024
 - Mark Waite is release lead
 - Kevin has created the [changelog & upgrade guide for 2.479.1](#)
 - Major changes including Java 17 requirement and upgrade to Spring Security 6/Spring Framework 6/Jakarta EE 9
 - Both backporting tickets included in changelog

- Upgrade guide goes into detail on Java 17, including information shared by Basil Crow in [the pinned comment of JENKINS-60891](#)
- [Revamping Jenkins Tutorials: Simplicity and Inclusivity](#) by Bruno Verachten
 - Video overview of what the previous tutorials were, the challenges they presented, what has been done to update them and include Docker Compose, and the contributors/partnership of GSoC
 - Thanks so much Bruno for the work done on this and the thorough explanation
- Recent work done on jenkins.io
 - [Automatic image compression in pull requests](#) - Alex Brandes
 - Alex has implemented an action that [compresses images within the PR once they are added](#).
 - Non-blocking error if the image is not compressed
 - Still encourage users to compress images prior to submission
 - This is to catch anything that is not already compressed or that can be compressed further
 - Thanks Alex for implementing this!
 - [Banner in 2.462.3 LTS changelog for EOL of Java 11](#) - Mark Waite
 - Mark added a banner to the [2.462.3 changelog](#) to inform users that it is the last LTS to support Java 11.
 - Includes Java 17 and 21 as the usable Java versions after the October LTS release.
 - Also includes the [2+2+2 Java support plan](#)
 - Thanks to Mark Waite & Darin Pope for this!
 - [Additional updates for Jenkins instance usage](#)
 - Last handful of pages that needed updates from “instance” to “controller” or something similar
 - [Security updates](#) still need review from security team
 - [Websocket configuration for Apache reverse proxy](#) - [Allan Burdajewicz/Dohbedoh](#)
 - Looks to resolve an [issue](#) to update the documentation
 - Has been reviewed but could use someone with more Apache experience/knowledge to confirm everything is correct
- Should [upgrading to Java 11 documentation](#) be removed after the October release?
 - End of October LTS will require Java 17, users will need to upgrade their Java versions prior to upgrade

2024-10-11 (Asia) - Canceled

Attendees:

- Mark Waite

Agenda

- Hacktoberfest progress report

- Screenshot updates are arriving for [documentation good first issues](#)
- Plugin BOM new maintainers
 - Plugin BOM now scheduled to build once a week
 - Friday at 11:00 AM UTC
 - Darin and Mark will do the release tomorrow
 - Darin will do the release next week
 - Will be looking for the next person to release for 2 weeks
 - How to rotate assignment
 - One idea, put it in the Jenkinsfile as a comment with the time of the build
 - Tutorial on plugin BOM
 - [documentation improvement issue](#)
- Request to review a PR for versioned docs at docs.jenkins.io: <https://github.com/jenkins-infra/docs.jenkins.io/pull/71>

2024-10-03 (EU/US)

Attendees:

- Bruno Verachten
- Kevin Martens

Agenda

- Contributor Spotlight
 - Currently featuring [Shivay Lamba](#)
 - Next will be [Adrien Lecharpentier](#)
 - Kevin interviewing several contributors for future spotlights
 - There will be enough to publish through November/into December
- [Hacktoberfest blog post](#) & [Hacktoberfest page](#)
 - Darin, Mark, and Bruno are planning for Hacktoberfest
 - Include Kris in the planning (copy the documents, etc.)
 - [List of issues in Jenkins JIRA](#)
 - Refined by Darin, Basil, Mark, and Bruno
 - Video series with Darin on various developer topics
 - Extension of the “Improve a plugin” tutorial
 - Maintain a plugin tutorial
 - Source code formatting
 - Enabling Jenkins security scan
 - Frequency of updating the parent pom
 - Frequency of updating plugin BOM
- Blog posts
 - [Brownout notice from end of September](#)
 - Regarding migration of updates.jenkins.io
- Jenkins elections
 - [Voter registration announcement](#)

- Open until Oct 31, 2024
 - Includes list of candidates, contributing information/guide, and timeline for registration, voting, and election results
 - Join [election-voter-2024](#) group to ensure that you are eligible to vote
 - Any questions, reach out to [the election committee](#)
- [Candidate statements](#)
 - Statements included for all candidates of governance board & release officer
 - Includes contributor spotlights where applicable
 - Positions with only 1 nominee will not include candidate statements as there will not be voting for those positions
- Weekly 2.479 and LTS 2.462.3 as security release
 - [Security advisory 2024-10-02](#)
 - Security release, handled by Jenkins Security team
 - Thanks for their work on this
 - Changelogs & upgrade guide available
- Next LTS baseline looks to be 2.479
 - Mark Waite is release lead
 - Kevin is creating changelog & upgrade guide for 2.479.1
 - Major changes including Java 17 requirement and upgrade to Spring Security 6
 - By choosing 2.479 this will include the security update that would need to be backported anyway
- GSoC 2024 officially wraps up
 - Last (the 5th) project's final review submitted by lead mentor
 - Completed Philip Glanz project with Alex Brandes as mentor
 - All contributors passed successfully this year
 - On to preparing for GSoC 2025 for Jenkins
 - Mentor recruitment
 - Project ideas brainstorming
 - Use Hacktoberfest as a starting point for GSoC candidates
 - Mark and Bruno are **deeply** grateful for [stats.jenkins.io](#)
- Should [upgrading to Java 11 documentation](#) be removed after the October release?
 - End of October LTS will require Java 17, users will need to upgrade their Java versions prior to upgrade

2024-09-27 (Asia)

Attendees:

- Mark Waite
- Meg McRoberts
- Kris Stern

Agenda

- Hacktoberfest blog post and page changes
 - Darin, Mark, and Bruno are planning for Hacktoberfest
 - Include Kris in the planning (copy the documents, etc.)
 - Review current Hacktoberfest page (new image, better queries, etc.)
 - Announce to Jenkins developer mailing that they need to add
 - link to the blog post in the developer mailing list
 - Mention Google Summer of Code in the blog post
 - Mark to complete within the next day or two
 - Video series with Darin on various developer topics
 - Extension of the “Improve a plugin” tutorial
 - Maintain a plugin tutorial
 - Source code formatting
 - Enabling Jenkins security scan
 - Frequency of updating the parent pom
 - Frequency of updating plugin BOM
- Hacktoberfest preparation (1 - 31 Oct 2024)
 - Registration has opened on the Hacktoberfest site
 - Identifying good first issues in Jenkins GitHub repositories
 - Kris will create some good first issues in both docs.jenkins.io and stats.jenkins.io repos
 - Identifying [good first issues](#) in Jenkins documentation (currently 4)
 - Criteria
 - Useful to Jenkins
 - Well suited to a new contributor
 - Need to review the issues and assign “good first issue” label
 - Kevin is reviewing further to find other good first issues
 - Identifying [friendly issues](#) in Jenkins Jira (currently 50)
 - Criteria
 - Useful to Jenkins
 - Well suited to a new contributor
 - Part of an actively maintained component
 - Not up for adoption
 - If a new contributor submits to an unmaintained plugin, their pull request is ignored
 - Part of a component that has the hacktoberfest topic
 - Some samples that have lots of work that can be spread widely
 - Test coverage improvement
 - [JENKINS-70464](#) - Embeddable build status plugin
 - [JENKINS-69756](#) - Node label parameter plugin
 - [JENKINS-69757](#) - Priority sorter plugin
 - New site docs.jenkins.io and its [issue list](#)
- Plugin BOM new maintainers
 - Plugin BOM now scheduled to build once a week

- Friday at 11:00 AM UTC
 - Darin and Mark will do the release tomorrow
 - Darin will do the release next week
 - Will be looking for the next person to release for 2 weeks
- How to rotate assignment
 - One idea, put it in the Jenkinsfile as a comment with the time of the build
- Tutorial on plugin BOM
- [documentation improvement issue](#)
- GSoC 2024 officially wraps up
 - Last (the 5th) project's final review submitted by lead mentor
 - Completed Philip Glanz project with Alex Brandes as mentor
 - All contributors passed successfully this year
 - On to preparing for GSoC 2025 for Jenkins
 - Mentor recruitment
 - Project ideas brainstorming
 - Use Hacktoberfest as a starting point for GSoC candidates
 - Mark Waite is deeply grateful for stats.jenkins.io
- Request to review a PR for versioned docs at docs.jenkins.io: <https://github.com/jenkins-infra/docs.jenkins.io/pull/71>

2024-09-20 (Asia)

Attendees:

- Mark Waite
- Kris Stern

Agenda

- Contributor spotlight: [Olivier Lamy](#) (September 10, 2024)
 - Next contributor is already in the queue
- Jenkins election announcement blog post
 - Nominations are closed
 - 6 nominees for 3 positions on the Jenkins governance board
 - Voter registration is now open
 - Mark submit the pull request (likely tomorrow)
- Diagnose the email notification of the Jenkins release candidate
 - Debugging together
 - Diagnosis resulted in a [documentation change](#)
- Plugin BOM new maintainers
 - Darin Pope
 - Kris Stern
 - Tutorial on plugin BOM
 - [documentation improvement issue](#)
- Spring Security 6.x Update

- Jenkins weekly 2.475 and 2.476 use Spring Security 6
 - Switches from Spring Security 5 to 6
 - Switches from Java EE 8 to Jakarta EE 9
 - Switches from Jetty 10 to Jetty EE 9
 - Maintains compatibility (mostly)
 - Few plugins like LDAP that must be lockstep upgrade
- Next LTS baseline selected 18 Sep 2024
 - 2.477, 2.476, or 2.475 all possible candidates (no major issues)
- Hacktoberfest preparation (1 - 31 Oct 2024)
 - Identifying [good first issues](#) in Jenkins documentation (currently 4)
 - Criteria
 - Useful to Jenkins
 - Well suited to a new contributor
 - Need to review the issues and assign “good first issue” label
 - Kevin is reviewing further to find other good first issues
 - Identifying [friendly issues](#) in Jenkins Jira (currently 50)
 - Criteria
 - Useful to Jenkins
 - Well suited to a new contributor
 - Part of an actively maintained component
 - Not up for adoption
 - If a new contributor submits to an unmaintained plugin, their pull request is ignored
 - Part of a component that has the hacktoberfest topic
 - Some samples that have lots of work that can be spread widely
 - Test coverage improvement
 - [JENKINS-70464](#) - Embeddable build status plugin
 - [JENKINS-69756](#) - Node label parameter plugin
 - [JENKINS-69757](#) - Priority sorter plugin
 - New site docs.jenkins.io and its [issue list](#)

2024-09-19 (EU/US)

Attendees:

- Kevin Martens
- Mark Waite

Agenda

- Docs office hours back to more regular schedule
 - Moving to every other week so that it aligns with other SIG meeting schedules
 - Ask Mark if he can update the calendar accordingly
- Contributor spotlight: [Olivier Lamy](#) published September 10, 2024)
 - Shivay Lamba next after Olivier (to be published Sep 24, 2024)

- Spring Security 6.x Update
 - Jenkins weekly 2.475, 2.476, and 2.477 use Spring Security 6
 - Switches from Spring Security 5 to 6
 - Switches from Java EE 8 to Jakarta EE 9
 - Switches from Jetty 10 to Jetty 12
 - Maintains compatibility (mostly)
 - Few plugins like LDAP that must be lockstep upgrade
 - Next LTS baseline selected 18 Sep 2024
 - 2.477 suggested as possible candidate
 - Kevin starting work on compiling upgrade guide/changelog for 2.47*.1 release
- LTS 2.462.3 scheduled for 2 October 2024
 - [Link to changelog & upgrade guide](#)
- Blog posts & Election updates
 - GSoC blog recaps
 - [Enhancing an Existing LLM Model](#)
 - [Manage jenkinsci GitHub permissions as code](#)
 - [Using OpenRewrite Recipes for Plugin Modernization](#)
 - Thanks to all of the contributors for their work on their respective projects!
 - Recent brownouts
 - [September 11 - 12 Brownout](#)
 - [6 & 9 September](#)
 - Goal is to ensure the changes for Jenkins Update Center are not disruptive to services. Ideally this would go unnoticed for users.
 - Jenkins Governance Board & Officers
 - [Voter registration](#) is now open until October 31 2024
 - Join [voter registration group](#)
 - 6 nominees for Board positions
 - 2 nominees for Release Officer
 - 1 nominee for other officer positions
- Documentation issue updates
 - [Remove usage of instance](#)
 - Basil advocating for more clear/concise wording for Jenkins controller & agents in the docs
 - In need of review: Security, Developer documentation, tutorials
 - Merged: [Pipeline docs](#), [Installing docs](#), [Scaling docs](#), [Managing docs](#)
- Hacktoberfest preparation (1 - 31 Oct 2024)
 - Identifying [good first issues](#) in Jenkins documentation (currently 4)
 - Criteria
 - Useful to Jenkins
 - Well suited to a new contributor
 - Kevin is reviewing further to find other [good first issues](#)

- Added some in for UI screenshot updates to align with Manage Jenkins changes
- Identifying [friendly issues](#) in Jenkins Jira (currently 50)
 - Criteria
 - Useful to Jenkins
 - Well suited to a new contributor
 - Part of an actively maintained component
 - Not up for adoption
 - If a new contributor submits to an unmaintained plugin, their pull request is ignored
 - Part of a component that has the hacktoberfest topic
 - Some samples that have lots of work that can be spread widely
 - Test coverage improvement
 - [JENKINS-70464](#) - Embeddable build status plugin
 - [JENKINS-69756](#) - Node label parameter plugin
 - [JENKINS-69757](#) - Priority sorter plugin
- [DevOps World Virtual](#) - Sep 17, 2024
 - Mark to posted the announcement and invitation to a [brief user interface survey](#) to
 - Community site
 - User mailing list
 - Jenkins board and Jenkins officers spoke at the conference along with a Q&A after.

2024-09-13 (Asia)

Attendees:

- Mark Waite
- Meg McRoberts

Agenda

- Contributor spotlight: [Olivier Lamy](#) (September 10, 2024)
- Spring Security 6.x Update
 - Jenkins weekly 2.475 and 2.476 use Spring Security 6

 - Join us for a status report plus question and answer

2024-08-23 (Asia)

Attendees:

- Mark Waite
- Meg McRoberts
- Kris Stern

Agenda

- Kevin Martens is back
 - Returned to the office this week
 - Preparing the Jenkins 2.462.2 changelog and upgrade guide
 - Reviewing jenkins.io pull requests
 - Pull request reviews upcoming for docs.jenkins.io (hope next week)

- Reviewing the site for functionality gaps
- Contributor spotlight: [Alyssa Tong](#) ((July 30, 2024)
 - 3 more contributors are in the queue
- Jenkins 2.462.2 LTS release candidate is available
 - Alex Brandes is the release lead
 - Last LTS version that will support Java 11
 - Testing is welcomed
- Spring Security 6.x Update
 - 4 phases of the project
 - File upload 2.x included in Jenkins 2.459
 - Require Java 17 included in Jenkins 2.463
 - Jetty 12 EE 8 included in Jenkins 2.472
 - Goal: 3 Sep 2024 include Jetty 12 EE 9
 - Compatibility layer that allows existing plugins behave as expected
 - Mark's been using in his test environment for months
 - Basil Crow, Adrien Lecharpentier, and others
 - Testing is welcomed, container image is available
 - Thanks to Bruno for the container image
- Google Summer of Code
 - 4 of 5 projects completed at the end of this week
 - Submit code products by 26 Aug 2024
 - 1 of 5 projects has extended to 30 Sep 2024
 - Final presentations are next Thursday
 - Are any of the GSoC contributors interested JavaScript and Jenkins and Java and Content Security Policy
 - Considering a major push for CSP implementation in Jenkins
 - Some funding may be possible
 - Concluding soon, looking very good
- Hacktoberfest preparation
 - Identifying [good first issues](#) in Jenkins documentation (currently 0)
 - Criteria
 - Useful to Jenkins
 - Well suited to a new contributor
 - Need to review the issues and assign "good first issue" label
 - Identifying [friendly issues](#) in Jenkins Jira (currently 108)
 - Criteria
 - Useful to Jenkins
 - Well suited to a new contributor
 - Part of an actively maintained component
 - If a new contributor submits to an unmaintained plugin, their pull request is ignored
 - Some samples that have lots of work that can be spread widely

- Test coverage improvement
 - [JENKINS-70464](#) - Embeddable build status plugin
 - [JENKINS-69756](#) - Node label parameter plugin
 - [JENKINS-69757](#) - Priority sorter plugin
 - New site docs.jenkins.io and its [issue list](#)
 - Mark and Darin are considering a video series
 - Maintain a plugin
 - Patterns to simplify plugin maintenance
- DevOps World Virtual - Sep 17, 2024
 - Jenkins board and Jenkins officers are speaking at the conference
 - Join us for a status report plus question and answer

2024-08-16 (Asia)

Attendees:

- Mark Waite
- Murali
- Kris Stern

Agenda

- Contributor spotlight: [Alyssa Tong](#) ((July 30, 2024)
 - Published on time
 - Created by [Alyssa Tong](#)
 - Found several new candidates for contributor spotlight
- Jenkins [2.452.4](#), [2.462.1](#), and [2.471](#) released with [critical security fixes](#)
 - Security fixes the big story
 - Several user experience improvements in addition to the security work
 - GZip improved performance
 - Startup time reduced by ~5 seconds with a JSON performance fix
- Retiring the Chinese documentation site
 - A Chinese site that Mark Waite discovered <https://www.jenkins-zh.cn/>
 - Goal: Redirect all the existing Chinese language pages to their English equivalent
 - Basil Crow has offered to help with the redirect and the nginx / Apache mod_rewrite changes
- Other Chinese language resources
 - <https://github.com/jenkins-zh> organization including a user site and update center references and more
- Simplifying plugin maintenance - a case study (primary focus of this meeting)
 - Review current state of an [example plugin](#)
 - Outdated minimum Jenkins version (based on [plugin installation data](#))
 - 90% of installs of the most recent release are on Jenkins 2.426.3 or newer

- Upgrade minimum Jenkins version to 2.426.3 (no more Java 8)
- Use Jenkinsfile from the Jenkins archetype (test Java 21, stop testing Java 11)
- Non-standard source code formatting automation
 - Enable `spotless.check.skip` true in pom.xml file, remove IntelliJ format settings
 - Format with `mvn spotless:apply` match with other plugins
- Outdated wiremock test library
 - Replaced with most recent wiremock library release
- Dependabot updates daily are too frequent
 - Process them weekly and keep current enough
- No automated release when relevant changes arrive
 - [Setting up automated releases](#) describes the process
- Move changelog to GitHub releases
 - Enable release drafter (part of automated releases)
 - Move outdated changelog from documentation to point to an already tagged release
- Remove branches that are already part of a newer branch
 - Cluttered ci.jenkins.io hinders maintainers
 - for branch in `$(git branch -a | sed 's,^,,g')`; do `git branch --contains $branch | grep -s -q -F '* master' && echo === ${branch#remotes/origin/}`; done
- Enable GitHub automerge
 - Refer to the [workshop document](#)
- Add scripted Pipeline tests?
 - Already some indications in [PR-19](#)
- Add declarative Pipeline tests?
- Review the [improve a plugin tutorial](#) for other candidates?
- Review the [Contributing to open source](#) document for other candidates?
- Question and answer

2024-08-15 (EU/US)

Attendees:

- Mark Waite

Agenda

- Jenkins [2.452.4](#), [2.462.1](#), and [2.471](#) released with [critical security fixes](#)
 - Security fixes the big story
 - Several user experience improvements in addition to the security work
 - GZip improved performance
 - Startup time reduced by ~5 seconds with a JSON performance fix
- Spring Security 6.x Upgrade project

- Phase 1 - Use Apache File Upload 2 - done
- Phase 2 - Require Java 17 in Jenkins weekly - 2.459 weekly done
- Phase 3 - Use Jetty 12 with EE 8 - 2.472 weekly done
- Phase 4 - Use Jetty 12 with EE 9 & Spring 6 - TBD
- Retiring the Chinese documentation site
 - A Chinese site that Mark Waite discovered <https://www.jenkins-zh.cn/>
- Preparing for Hacktoberfest
 - Simplifying plugin maintenance - a case study
 - Identifying good first issues
 - Content security policy issues
 - Others

2024-08-09 (Asia)

Attendees:

- Mark Waite
- Kris Stern

Agenda

- Contributor spotlight: [Darin Pope](#) ((July 30, 2024)
 - Published on time
 - Created by [Alyssa Tong](#)
 - Found several new candidates for contributor spotlight
- Jenkins [2.452.4](#), [2.462.1](#), and [2.471](#) released with [critical security fixes](#)
 - Security fixes the big story
 - Several user experience improvements in addition to the security work
 - GZip improved performance
 - Startup time reduced by ~5 seconds with a JSON performance fix
- Retiring the Chinese documentation site
 - A Chinese site that Mark Waite discovered <https://www.jenkins-zh.cn/>
 - Goal: Redirect all the existing Chinese language pages to their English equivalent
 - Basil Crow has offered to help with the redirect and the nginx / Apache mod_rewrite changes
- Other Chinese language resources
 - <https://github.com/jenkins-zh> organization including a user site and update center references and more
- Simplifying plugin maintenance - a case study
 - Review current state of an [example plugin](#)
 - Outdated minimum Jenkins version (based on [plugin installation data](#))
 - 90% of installs of the most recent release are on Jenkins 2.426.3 or newer
 - Upgrade minimum Jenkins version to 2.426.3 (no more Java 8)

- Use Jenkinsfile from the Jenkins archetype (test Java 21, stop testing Java 11)
- Non-standard source code formatting automation
 - Enable `spotless.check.skip` true in `pom.xml` file, remove IntelliJ format settings
 - Format with `mvn spotless:apply` match with other plugins
- Outdated wiremock test library
 - Replaced with most recent wiremock library release
- Dependabot updates daily are too frequent
 - Process them weekly and keep current enough
- No automated release when relevant changes arrive
 - [Setting up automated releases](#) describes the process
- Move changelog to GitHub releases
 - Enable release drafter (part of automated releases)
 - Move outdated changelog from documentation to point to an already tagged release
- Remove branches that are already part of a newer branch
 - Cluttered ci.jenkins.io hinders maintainers
 - for branch in `$(git branch -a | sed 's,^,,g'); do git branch --contains $branch | grep -s -q -F '* master' && echo === ${branch#remotes/origin/}; done`
- Enable GitHub automerge
 - Refer to the [workshop document](#)
- Add scripted Pipeline tests?
 - Already some indications in [PR-19](#)
- Add declarative Pipeline tests?

2024-08-02 (Asia)

Attendees:

- Mark Waite
- Meg McRoberts

Agenda

- Google Summer of Code projects - 26 Aug 2024
 - [improve infra stats site](#)
 - [Infrastructure stats site](#) project is currently in the [infra-statistics repository](#)
- Contributor spotlight: [Darin Pope](#) ((July 30, 2024))
 - Published on time
 - Created by [Alyssa Tong](#)
 - Looking for volunteers that can write the next several spotlights
- Jenkins 2.462.1 [LTS changelog and upgrade guide](#) are ready for review
 - Release candidate 24 July 2024, release 7 Aug 2024

- Mark Waite is release lead
- Jeremie Payout will be shadowing Mark as the 2.426.1 release lead
 - Add him as a release lead in the future
- Are there screenshots that need to be updated based on 2.462.1 or previous
- Simplifying plugin maintenance - a case study
 - Review current state of an [example plugin](#)
 - Outdated minimum Jenkins version (based on [plugin installation data](#))
 - 90% of installs of the most recent release are on Jenkins 2.426.3 or newer
 - Upgrade minimum Jenkins version to 2.426.3 (no more Java 8)
 - Use Jenkinsfile from the Jenkins archetype (test Java 21, stop testing Java 11)
 - Non-standard source code formatting automation
 - Enable `spotless.check.skip true` in `pom.xml` file, remove IntelliJ format settings
 - Format with `mvn spotless:apply` match with other plugins
 - Outdated wiremock test library
 - Replaced with most recent wiremock library release
 - Dependabot updates daily are too frequent
 - Process them weekly and keep current enough
 - No automated release when relevant changes arrive
 - [Setting up automated releases](#) describes the process

 - Add declarative Pipeline tests?
-

2024-07-26 (Asia) - no recording

Attendees:

- Mark Waite
- Meg McRoberts

2024-07-19 (Asia)

Attendees:

- Mark Waite
- Kris Stern

Agenda

- Kevin Martens out of office
- Jenkins [board and officer elections process](#) starts soon
 - 1 Aug 2024 - accept nominations
 - 16 Sep 2024 - voter registration begins
 - 1 Nov 2024 - voting begins
 - 1 Dec 2024 - results announced
- Google Summer of Code projects
 - [improve infra stats site](#)
 - [Infrastructure stats site](#) project is currently in the [infra-statistics repository](#)
 - We're in the clean and optimize phase, but have a few ideas running at the moment (like the [compare statistics trends](#))
- Contributor spotlight: [Markus Winter](#) and [Rajiv Singh](#)
 - Published on time
 - Created by [Alyssa Tong](#)
 - Have also received responses Darin Pope, whose videos are great, and spread over many documentation pages
 - Looking for volunteers that can write the next several spotlights
- Versioned docs project
 - The [docs.jenkins.io](#) site is running
 - Vandit will help with bug fixes
 - Kris has taken responsibility for syncing the content from the official site
 - Plans to update monthly
 - Updates are on hold while Kevin is out of the office
 - Waiting for reviews before merging additional changes
- Jenkins 2.426.1 LTS changelog and upgrade guide are ready for review
 - Release candidate 24 July 2024, release 7 Aug 2024
 - Mark Waite is release lead
 - Jeremie Ployart will be shadowing Mark as the 2.426.1 release lead
 - Add him as a release lead in the future

2024-07-18 (EU/US)

Attendees:

- Bruno Verachten

- Mark Waite

Agenda

- We have switched to a monthly meeting cadence
 - Kevin Martens is still out for 3-4 weeks
 - Take a “summer break” for weekly office hours
- Weeklies [2.464](#), [2.466](#), [2.467](#), and [2.468](#) were built and delivered
- Jenkins weekly has been requiring Java 17 since June 18, 2024 ([2.463](#))
 - Basil Crow created a [blog post to announce it](#)
 - An agreement was found to choose [2.462](#) as the next LTS baseline on Jul 8, 2024
 - The next LTS line will support Java 11 as it will be based on [2.462](#) (the last weekly to support Java 11)
 - Java 11 support in LTS ends Oct 30, 2024
 - Mark is the release lead
 - Jun, July, Aug, Sep LTS releases all continue to support Java 11
 - Oct 30 is the new line, drop Java 11 support
 - See the [JVM graph](#) for the latest data
 - Java 11 container images for weekly will not be updated
 - AlmaLinux controller container is at its end-of-life
- LTS releases
 - [2.452.3](#) has been released on Jul 10, 2024
 - Kris Stern was the release lead
 - Mark and Darin hosted [a live stream](#) with an overview
 - 2.462.1 is coming
 - Release candidate is scheduled to be available on Jul 24, 2024
 - Mark will create the changelog and upgrade guide, and will be the release lead for the 2.462.1
- Contributor spotlight: [Markus Winter](#) and [Rajiv Singh](#)
 - Published on time
 - Created by Alyssa Tong
 - Have also received responses Darin Pope, whose videos are great, and spread over many documentation pages
 - Looking for volunteers that can write the next several spotlights
 - Adding a new feature to the site
 - Contributor data collection by Jean-Marc Meessen
 - Leveraging some of the data to highlight a random contributor
 - [Thank random contributors based on recent GitHub data](#)
 - Similar to the thanks that are shown on the Eclipse Adoptium
 - Using the Pipeline code from Jean-Marc Meessen
 - Data provider has been implemented by Jean-Marc Meessen

- The repositories are currently being migrated to the Jenkins infra organization
 - It has now been merged.
- Google Summer of Code projects
 - Repository permissions updater automation from two projects
 - Phillip Glanz switching Groovy to Java
 - Danyang automating additional items
 - Hope to simplify tasks for RPU maintainers
 - Jenkins and LLM - AI bot that uses Jenkins knowledge to help Jenkins users
 - Using information from
 - Jenkins.io
 - Community.jenkins.io
 - Stack Overflow
 - Model not yet trained
 - [improve infra stats site](#)
 - [Infrastructure stats site](#) project is currently in the [infra-statistics repository](#)
 - We're in the clean and optimize phase, but have a few ideas running at the moment (like the [compare statistics trends](#))
 - Major improvements on new.stats.jenkins.io
 - How many controllers?
 - How many plugins?
 - Distribution of JVM use?
 - Jenkins plugin dependency graph
 - There is a big part to tackle with Jenkins Plugins [Dependency graph](#).
 - OpenRewrite to modernize plugins
 - Many improvement candidates
 - Use Java 17
 - Add a Jenkinsfile
 - Replace mocking framework
 - Other automation of plugin maintenance
 - Inspired by the "Improve a plugin" tutorial
 - Pull request phrasing needs improvement
 - Allow users to experiment with a list of plugins
 - Recipe selection
 - Pull requests
 - The coding period is running well
 - Contributors are now fully involved
 - July 11 mid-term presentations went well
 - August 26 is the of GSoC 2024 (extensions are possible)
- Jenkins.io
 - [\[donors\] Update the list of Jenkins donors](#) from [LFX crowdfunding](#)
 - [Update durability wording](#)
 - [Use Jenkins.get\(\) instead of deprecated method](#)

- Versioned docs project
 - The docs.jenkins.io site is running
 - Vandit will help with bug fixes
 - Kris has taken responsibility for syncing the content from the official site
 - Plans to update monthly
 - Enable recent as the default (use the most recent version)
 - Versioning is done manually
 - Report issues to the [jenkins-infra/docs.jenkins.io repository](https://jenkins-infra/docs.jenkins.io/repository)
 - Still, some work to do before it is integrated with jenkins.io
 - Confirmed that the new content is visible on the new site
- Jenkins switch from Jetty 10 to Jetty 12 EE 8 - [JENKINS-73120](#)
 - Hoped to be ready in Jenkins weekly in August
 - Running on branches named “prototype” in Jenkins core and many components
 - Uses javax.servlet imports
 - Don't fear that change, many are in Jenkins plugins
 - Help by updating a plugin with a pull request
- Jenkins switch from Jetty 12 EE 8 to Jetty 12 EE 9 - [JENKINS-73255](#)
 - Running on branches named “jakarta”
 - Moving from javax.servlet to jakarta.servlet
 - Hoped to be ready in August or early September
 - Bruno has created a sample that builds a docker container with the prototype inside
 - Mark has it running and it works
 - See the [quickstart-tutorials project](#) on GitHub
 - Checkout the spring-security branch
 - Mark built his own with
 - `docker compose -f build-docker-compose.yaml --profile maven up -d`
 - Can use already built version with:
 - `docker compose --profile maven up -d`
 - Stop the experiment with:
 - `docker compose --profile maven down -v --remove-orphans`
 - Needs lots of exploratory testing
 - Watch for any form that accepts data but does not retain the next time it is opened
 - Watch for stack traces in the Jenkins log output
 - Mark has been running versions of it for about 2 weeks
 - Special thanks to Basil Crow and Adrien Lecharpentier for their work

2024-07-12 (Asia)

Attendees:

- Mark Waite
- Meg McRoberts

Agenda

- Weekly [2.467](#) built and delivered
- Jenkins weekly has been requiring Java 17 since June 18, 2024 ([2.463](#))
- LTS releases
 - 2.452.3 released Jul 10, 2024
 - Mark and Darin hosted a live stream with an overview
- The next LTS baseline is 2.462 - last Java 11 LTS line
 - Need a release lead for 2.462.1
- Contributor spotlight: Markus Winter
- Google Summer of Code projects
 - Mid-term presentations were today - 5 projects
 - [improve infra stats site](#)
- Jenkins switch from Jetty 10 Java EE 8 to Jetty 12 Jakarta EE 8 - [JENKINS-73120](#)
 - Hoped to be ready in Jenkins weekly in July
 - Uses javax.servlet imports
- Jenkins switch from Jetty 12 EE 8 to Jetty 12 EE 9 - [JENKINS-73255](#)
 - Hoped to be ready in August or early September
 - Uses jakarta.servlet
- Transition of Martin d'Anjou old content to AsciiDoc
 - GSoC mentor for multiple needs to move content from his Google Docs
 - Make them asciidoc and store them on [www.jenkins.io](#)

2024-06-21 (Asia)

Attendees:

- Mark Waite
- Meg McRoberts

Agenda

- Skip next two meetings?
 - Mark at a conference next week (21 Jun 2024)
 - Mark out of office following week (5 Jul 2024)
 - Approved, skipping, Mark delete from calendar
- Weekly [2.463](#) built and delivered
- Jenkins weekly has been requiring Java 17 since June 18, 2024 ([2.463](#))
 - Basil Crow created a [blog post to announce it](#)
 - An agreement that the next LTS baseline will be before June 18, 2024

- The next LTS line will support Java 11 as it will be based on [2.462](#) (the last weekly to support Java 11)
 - Java 11 support in LTS ends Oct 30, 2024
 - Jun, July, Aug, Sep LTS releases all continue to support Java 11
 - Oct 30 is the new line, drop Java 11 support
 - See the [JVM graph](#) for the latest data
 - Java 11 container images for weekly will not be updated
 - AlmaLinux controller container is at its end-of-life
- LTS releases
 - 2.452.3 is scheduled to be released **Jul 10, 2024**
 - Kris Stern has volunteered to be the release lead
 - Release candidate scheduled to be available **June 26 2024**
 - Mark will create the changelog and upgrade guide
 - The next LTS baseline is to be decided by **Jun 26, 2024** as well.
 - Needs to be proposed next Wednesday, likely [2.462](#)
- Contributor spotlight: [Harsh Pratap Singh](#)
 - Published on time thanks to Kris merge of the pull request
 - Created by Kevin Martens
 - Have also received responses from Rajiv Singh
 - Next will be published in 2 weeks (need volunteer submitters)
 - Suggest adding Darin Pope, whose videos are great, and spread over many documentation pages
 - Suggest adding Jean-Marc Meessen
 - Looking for volunteers that can write the next several spotlights
 - Next will be published in 2 weeks (need volunteer submitters)
 - Adding a new feature to the site
 - Contributor data collection by Jean-Marc Meessen
 - Leveraging some of the data to highlight a random contributor
 - [Thank random contributors based on recent GitHub data](#)
 - Similar to the thanks that are shown on the Eclipse Adoptium
 - Using the Pipeline code from Jean-Marc Meessen
 - Data provider has been implemented by Jean-Marc Meessen
 - The repositories are currently being migrated to the Jenkins infra organization
 - The [preview](#) is live, but the status is changing rapidly, as we migrate
 - Pull request not yet merged, but in progress
 - Data is now available from an official Jenkins repository
- Google Summer of Code projects
 - [improve infra stats site](#)
 - [Preview](#) is available for the PRs now.
 - [Infrastructure stats site](#) project is currently in the [infra-statistics repository](#)

- The coding period is running well
- Contributors are now fully involved
- July 11 for mid-term presentations
- Jenkins.io
 - Automatic dependencies update in the tutorials
 - The updatecli action was [not working anymore](#) because of changes in the tutorials (removal of docker images in the agents, mostly).
 - We [fixed it](#), and got two automatic PRs since
 - [The hudson.model.DirectoryBrowserSupport.allowAbsolutePath escape hatch is obsolete](#)
 - [Platform Information - add line for Java 17 requirement in weekly to support table](#)
 - [Re-order cd releasing page](#)
- Versioned docs project
 - The [docs.jenkins.io](#) site is running
 - Vandit will help with bug fixes
 - Kris has taken responsibility for syncing the content from the official site
 - Plans to update monthly
 - Enable recent as the default (use the most recent version)
 - Versioning is done manually
 - Report issues to the [jenkins-infra/docs.jenkins.io repository](#)
 - Still, some work to do before it is integrated with jenkins.io
 - Confirmed that the new content is visible on the new site
- Jenkins switch from Jetty 10 to Jetty 12 EE 8 - [JENKINS-73120](#)
 - Likely be delayed until July
 - 3 blocking issues in Jenkins Jira resolved
 - ~~[JENKINS-73127](#) Jetty 12 test failure in Security3030Test~~
 - ~~[JENKINS-73128](#) Jetty 12 test failure in PluginTest on Windows~~
 - ~~Mark is working it, though it needs more study to address Basil's questions~~
 - ~~[JENKINS-73129](#) Jetty 12 test failures in DirectoryBrowserSupportTest~~
 - ~~Mark is working it, [pull request](#) submitted to Jenkins core~~
 - Don't fear that change, many are in Jenkins plugins
 - Help by updating a plugin with a pull request
- Jenkins switch from Jetty 12 EE 8 to Jetty 12 EE 9 - [JENKINS-73255](#)
 - Moving from javax.servlet to jakarta.servlet
 - Date not yet known - running in test environments, but has known issues
 - Bruno has created a sample that builds a docker container with the prototype inside
 - Mark has it running and it works
 - See the [quickstart-tutorials project](#) on GitHub
 - Checkout the spring-security branch
 - docker compose --profile maven up -d
 - Stop the experiment with:

- docker compose --profile maven down -v
--remove-orphans
- Needs lots of exploratory testing
 - Watch for any form that accepts data but does not retain the next time it is opened
 - Watch for stack traces in the Jenkins log output
 - Mark has been running versions of it for about 2 weeks
- Special thanks to Basil Crow and Adrien Lecharpentier for their work

2024-06-20 (EU/US)

Attendees:

- Bruno Verachten
- Mark Waite

Agenda

- Switching to a monthly meeting cadence beginning today
 - Kevin Martens is out for 6-8 weeks
 - Take a “summer break” for weekly office hours
 - Approved by Bruno and Mark - Mark update the Jenkins calendar
- Weekly [2.463](#) built and delivered
- Jenkins weekly has been requiring Java 17 since June 18, 2024 ([2.463](#))
 - Basil Crow created a [blog post to announce it](#)

2024-06-14 (Asia)

Attendees

- Mark Waite
- Meg McRoberts

Agenda

- [Blog post from Damien Duportal thanking mirror sponsors](#)

- Nice to show appreciation to our mirror sponsors as they provide a different type of sponsorship than others
- Weekly 2.462 built and delivered
- Jenkins weekly will require Java 17 beginning June 18, 2024 (2.463)
 - Basil Crow created a [blog post to announce it](#)
 - Next LTS baseline will continue to support Java 11
 - Java 11 support in LTS ends Oct 30, 2024
 - Jun, July, Aug, Sep releases all continue to support Java 11
 - Oct 30 is the new line, drop Java 11 support
 - See the [JVM graph](#) for latest data
- LTS releases
 - LTS 2.452.2 released yesterday (June 12 2024)
 - Kris Stern is release lead
 - Mark Waite backport pull request merged for two recent issues
 - [JENKINS-73047](#) - Strokes in weather icons are too wide on enlarged Safari views
 - [JENKINS-73252](#) - Silence security scanners by updating bundled bouncycastle API plugin
 - These were added to the changelog by Mark (thanks very much)!
 - 2.452.3 scheduled to be released **Jul 10, 2024**
 - Kris Stern is release lead
 - Release candidate scheduled to be available **June 26 2024**
 - Next LTS baseline to be decided by **Jun 26, 2024** as well.
- Contributor spotlight: [Vandit Singh](#)
 - Have also received responses from Harsh Singh and Rajiv Singh
 - Suggested to add Darin Pope, videos are great, spread in many doc pages
 - Adding a new feature to the site
 - Contributor data collection by Jean-Marc Meessen
 - Leveraging some of the data to highlight a random contributor
 - [Thank random contributors based on recent GitHub data](#)
 - Similar to the thanks that are shown on the Eclipse Adoptium
 - Using the Pipeline code from Jean-Marc Meessen
 - Data provider has been implemented by Jean-Marc Meessen
- Google Summer of Code project - [improve infra stats site](#)
 - [Infrastructure stats site](#) project as currently in the [infra-statistics repository](#)
 - Coding period has started
 - Contributors are still in examinations, not yet fully involved
 - Logistics on data fetching still needs to be discussed with Herve Le Meur
 - July 11 for mid-term presentations
- Versioned docs project
 - The [docs.jenkins.io](#) site is running

- Vandit will help with bug fixes
 - Kris has taken responsibility to sync the content from the official site
 - Plans to update monthly
 - Enable recent as the default (use most recent version)
 - Versioning is done manually
 - Report issues to the [jenkins-infra/docs.jenkins.io repository](https://jenkins-infra/docs.jenkins.io/repository)
 - Still some work to do before it is integrated with jenkins.io
 - Confirmed that the new content is visible on the new site
- Spring Security 5.x is end of life 31 Aug 2024
 - Jenkins uses Spring Security 5.x heavily
 - Spring Security 6.x requires
 - Jakarta EE 9 (jakarta.servlet instead of javax.servlet)
 - Java 17
 - Jetty 12
 - Commons File Upload 2
 - Basil Crow and Adrien Lecharpentier
 - Mark is running it in a test setup
 - Enormous work over the
- Jenkins switch from Jetty 10 to Jetty 12 EE 8
 - Likely delayed until July
 - 3 blocking issues in Jenkins Jira that need to be resolved
 - [JENKINS-73127](#) - Jetty 12 test failure in Security3030Test
 - Resolved by Basil Crow
 - [JENKINS-73128](#) - Jetty 12 test failure in PluginTest on Windows
 - Mark is working it, though it needs more study to address Basil's questions
 - [JENKINS-73129](#) - Jetty 12 test failures in DirectoryBrowserSupportTest
 - Mark is working it, [pull request](#) submitted to Jenkins core
- Jenkins switch from Jetty 12 EE 8 to Jetty 12 EE 9
 - Date not yet known
 - Bruno has created a sample that builds a docker container with the prototype inside
 - Mark has it running and it works
 - See the [quickstart-tutorials project](#) on GitHub
 - Checkout the spring-security branch
 - Mark built his own with
 - `docker compose -f build-docker-compose.yaml --profile maven up -d`
 - Can use already built version with:
 - `docker compose --profile maven up -d`
 - Stop the experiment with:
 - `docker compose --profile maven down -v --remove-orphans`

- Needs lots of exploratory testing
 - Watch for any form that accepts data but does not retain the next time it is opened
 - Watch for stack traces in Jenkins log output
 - Mark has been running versions of it for about 2 weeks
- Special thanks to Basil Crow and Adrien Lecharpentier for their work

2024-06-13 (EU/US)

Attendees

- Kevin Martens
- Bruno Verachten
- Mark Waite
- Kris Stern

Agenda

- Weekly 2.462 built and delivered
- Jenkins weekly will require Java 17 beginning June 18, 2024 (2.463)
 - Basil Crow created a [blog post to announce it](#)
 - Agreement that the next LTS baseline will be before June 18, 2024
 - Next LTS line will support Java 11
 - Java 11 support in LTS ends Oct 30, 2024
 - Jun, July, Aug, Sep releases all continue to support Java 11
 - Oct 30 is the new line, drop Java 11 support
 - See the [JVM graph](#) for latest data
 - Java 11 container images for weekly will not be updated
 - AlmaLinux controller container is end of life
- LTS releases
 - LTS 2.452.2 released yesterday (June 12 2024)
 - Kris Stern is release lead
 - Mark Waite backport pull request merged for two recent issues
 - [JENKINS-73047](#) - Strokes in weather icons are too wide on enlarged Safari views
 - [JENKINS-73252](#) - Silence security scanners by updating bundled bouncycastle API plugin
 - These were added to the changelog by Mark (thanks very much)!
 - 2.452.3 scheduled to be released **Jul 10, 2024**
 - Kris Stern has volunteered to be release lead
 - Release candidate scheduled to be available **June 26 2024**
 - Next LTS baseline to be decided by **Jun 26, 2024** as well.
- Contributor spotlight: [Vandit Singh](#)

- Published a bit later than usual
 - Have also received responses from Harsh Singh and Rajiv Singh
 - Suggested to add Darin Pope, videos are great, spread in many doc pages
 - Adding a new feature to the site
 - Contributor data collection by Jean-Marc Meessen
 - Leveraging some of the data to highlight a random contributor
 - [Thank random contributors based on recent GitHub data](#)
 - Similar to the thanks that are shown on the Eclipse Adoptium
 - Using the Pipeline code from Jean-Marc Meessen
 - Data provider has been implemented by Jean-Marc Meessen
- [Blog post from Damien Duportal thanking mirror sponsors](#)
 - Nice to show appreciation to our mirror sponsors as they provide a different type of sponsorship than others
- Google Summer of Code project - [improve infra stats site](#)
 - Coding period has started
 - Contributors are still in examinations, not yet fully involved
 - Logistics on data fetching still needs to be discussed with Herve Le Meur
 - [Infrastructure stats site](#) project as currently in the [infra-statistics repository](#)
 - July 11 for mid-term presentations
- Versioned docs project
 - The [docs.jenkins.io](#) site is running
 - Vandit will help with bug fixes
 - Kris has taken responsibility to sync the content from the official site
 - Plans to update monthly
 - Enable recent as the default (use most recent version)
 - Versioning is done manually
 - Report issues to the [jenkins-infra/docs.jenkins.io repository](#)
 - Still some work to do before it is integrated with jenkins.io
 - Confirmed that the new content is visible on the new site
- Jenkins switch from Jetty 10 to Jetty 12 EE 8
 - Likely delayed until July
 - 3 blocking issues in Jenkins Jira that need to be investigated and resolved
 - [JENKINS-73127](#) - Jetty 12 test failure in Security3030Test
 - [JENKINS-73128](#) - Jetty 12 test failure in PluginTest on Windows
 - Mark is working it, though it needs more study to address Basil's questions
 - [JENKINS-73129](#) - Jetty 12 test failures in DirectoryBrowserSupportTest
 - Mark is working it, [pull request](#) submitted to Jenkins core
- Jenkins switch from Jetty 12 EE 8 to Jetty 12 EE 9
 - Moving from javax.servlet to jakarta.servlet
 - Date not yet known - running
 - Bruno has created a sample that builds a docker container with the prototype inside

- Mark has it running and it works
- See the [quickstart-tutorials project](#) on GitHub
 - Checkout the spring-security branch
 - Mark built his own with
 - docker compose -f build-docker-compose.yaml --profile maven up -d
 - Can use already built version with:
 - docker compose --profile maven up -d
 - Stop the experiment with:
 - docker compose --profile maven down -v --remove-orphans
- Needs lots of exploratory testing
 - Watch for any form that accepts data but does not retain the next time it is opened
 - Watch for stack traces in Jenkins log output
 - Mark has been running versions of it for about 2 weeks
- Special thanks to Basil Crow and Adrien Lecharpentier for their work

2024-06-07 (Asia)

Attendees

- Mark Waite
- Kris Stern
- Meg McRoberts

Agenda

- Weekly 2.461 built and delivered
- Jenkins weekly will require Java 17 beginning June 18, 2024
 - Basil Crow creating a blog post to announce it

 - Data provider has been implemented by Jean-Marc Meessen
 - Example: Bottom of <https://adoptium.net/blog/2021/12/eclipse-temurin-linux-installers-available/>
- [Blue Ocean Deprecation project](#)
 - Some tasks created with context/necessary actions but this will be expanded upon
 - Trying to get the tasks we know that will be needed
 - Tasks can always be changed/updated
 - Will include tasks/links/examples of work necessary
 - Kevin is still filling out the description/content of some tasks.
- Docs Office Hours (Asia) happens in 9.5 hours

2024-05-23 (EU/US)

Attendees

- Kevin Martens
- Bruno Verachten
- Kris Stern

Agenda

- Weekly 2.459 built and delivered
 - Changelog is published
- LTS release 2.452.1 released May 15, 2024
 - Release looks good thus far
 - [Live stream available as recorded video](#)
- Next LTS release 2.452.2 scheduled Jun 12, 2024
 - Kris Stern is release lead for the release
 - Started the release preparation
 - Release candidate in about 10 days May 29, 2024

- Final release June 12, 2024
 - Kevin Martens will create changelog and upgrade guide
- Versioned docs project
 - The docs.jenkins.io site is running
 - Need Vandit to return to assist
 - Enable recent as the default (use most recent version)
 - Versioning is done manually
 - Report issues to the [jenkins-infra/docs.jenkins.io repository](https://github.com/jenkins-infra/docs.jenkins.io)
 - Still some work to do before it is integrated with jenkins.io
- Recently merged work
 - <https://github.com/jenkins-infra/jenkins.io/pull/7325>
 - Add plugin distribution process to developer docs - Mark Waite
- Google Summer of Code project - [improve infra stats site](#)
 - Just started the project a few weeks ago
 - All projects are on track
 - Coding starts next week on Monday (May 27)
 - [Infrastructure stats site](#) project as currently in the [infra-statistics repository](#)
 - Uses React.js and Typescript in the current prototype
 - RPU meetings have not started yet, will start next week when Alex is available
 - Potentially have contributors collaborate write a blog post about the bonding period
- Contributor spotlight: [Jan Faracik May 22 2024](#)
 - Alyssa Tong next
 - Have also received responses from Harsh Singh, Vandit Singh, and Michelle Martineau
 - Suggested to ask Rajiv Singh for his story as well
 - Adding a new feature to the site
 - Thank random contributors based on recent GitHub data
 - Similar to the thanks that are shown on the Eclipse Adoptium
 - Using the Pipeline code from Jean-Marc Meessen
 - Working on the design, think it will be easy to implement
 - Example: Bottom of <https://adoptium.net/blog/2021/12/eclipse-temurin-linux-installers-available/>
- [Blue Ocean Deprecation project](#)
 - Some tasks created with context/necessary actions but this will be expanded upon
 - Trying to get the tasks we know that will be needed
 - Tasks can always be changed/updated
 - Will include tasks/links/examples of work necessary
 - Kevin is still filling out the description/content of some tasks.
- This week's Asia office hours canceled

- Mark's birthday, he'll spend the day doing "bike your age"
- Cancel the Asia office hours May 31, 2024
 - Mark out of the office, traveling

2024-05-17 (Asia)

Attendees

- Mark Waite
- Kris Stern
- Jay Reddy

Agenda

- Weekly 2.458 built and delivered
 - Changelog is published
 - Had some regressions that still need to be resolved
 - Likely Mark will propose to revert one change
- LTS release 2.452.1 released May 15, 2024
 - Release looks good
 - Live stream today to introduce it
- Next LTS release 2.452.2 scheduled Jun 12, 2024
 - Krist Stern is release lead for the release
 - Started the release preparation
 - Release candidate in about 10 days May 29, 2024
 - Final release June 12, 2024
 - Kevin Martens will create changelog and upgrade guide
- Versioned docs project
 - The docs.jenkins.io site is running
 - Need Vandit to return to assist
 - Enable recent as the default (use most recent version)
 - Versioning is done manually
 - Report issues to the [jenkins-infra/docs.jenkins.io repository](https://jenkins-infra/docs.jenkins.io/repository)
- Google Summer of Code project - [improve infra stats site](#)
 - Just started the project a few weeks ago
 - All projects are on track
 - Coding starts next week
 - [Infrastructure stats site](#) project as currently in the [infra-statistics repository](#)
 - Uses React.js and Typescript in the current prototype
- Contributor spotlight: Kevin Martens May 8, 2024
 - Alyssa Tong next week (May 22, 2024)
 - Jan Faracik has agreed to share his response when he's back from vacation
 - A request has been sent to Vandit Singh
 - Suggested to ask Rajiv Singh for his story as well
 - Adding a new feature to the site

- Thank random contributors based on recent GitHub data
 - Similar to the thanks that are shown on the Eclipse Adoptium
 - Using the Pipeline code from Jean-Marc Meessen
 - Working on the design, think it will be easy to implement
- Cancel next week's Asia office hours?
 - Mark's birthday, he'll spend the day doing "bike your age"
 - Approved
- Cancel the office hours May 31, 2024
 - Mark out of the office, traveling

2024-05-10 (Asia)

Attendees

- Mark Waite
- Kris Stern
- Meg McRoberts
- Jagruti Tiwari

Agenda

- Weekly 2.457 built and delivered
 - Changelog is available, no issues with the release
- Next LTS release 2.452.1 will happen on May 15, 2024 (next Wednesday)
 - Alex Brandes is the release lead
 - [Checklist available](#)
 - Release Candidate is due May 1 2024 - [backport candidates](#)
 - [Changelog merged and ready for release publication](#)
- Versioned docs project
 - The [docs.jenkins.io](#) site is running
 - Report issues to the [jenkins-infra/docs.jenkins.io repository](#)
 - CSS styling from Jan Faracik is needed
 - Content updates from the existing [www.jenkins.io](#) site
 - Navigation issues (Mark to submit the issues he detected)
- Google Summer of Code project - [improve infra stats site](#)
 - [Infrastructure stats site](#) project as currently in the [infra-statistics repository](#)
 - Uses React.js and Typescript in the current prototype
- Migrating plugin documentation from Wiki to GitHub
 - Choosing a plugin with docs to migrate from the [plugin migration progress report](#)
 - [JDK parameter plugin](#)
 - [m2releae plugin](#)
 - [Xvfb plugin](#)
- [PR-4666](#) reviewed and merged - credentials page in the "Securing Jenkins" chapter
- Contributor spotlight: Kevin Martens
 - Alyssa Tong after that

- Jan Faracik has agreed to share his response when he's back from vacation
- More to come, Alyssa is helping with getting in touch with contributors

2024-05-09 (EU/US)

Attendees

- Mark Waite
- Bruno Verachten

Agenda

- Weekly 2.457 built and delivered
 - Changelog is available, no issues with the release
- Next LTS release 2.452.1 will happen on May 15, 2024 (next Wednesday)

2024-05-02 (EU/US)

Attendees

- Kevin Martens
- Bruno Verachten
- Kris Stern

Agenda

- Weekly 2.456 built and delivered
 - Changelog automation continues to work well - [2.457 draft changelog](#) is in progress
 - One entry was missing, Basil Crow caught and updated it accordingly (Thanks!)
- Next LTS release 2.452.1 will happen on May 15, 2024
 - Alex Brandes is the release lead
 - [Checklist available](#)
 - Release Candidate is due May 1 2024 - [backport candidates](#)
 - [Changelog merged and ready for release publication](#)
- [Security Advisory \(May 2 2024\)](#)
 - Script Security plugin must be updated to resolve vulnerabilities
 - Other plugins included: [Git server plugin](#), [Subversion Partial Release Manager plugin](#), and [Telegram Bot plugin](#)
- [Blog from Alyssa Tong on GSoC acceptance and project announcement](#)
 - Google announced their selections on May 1, 2024
 - Jenkins is a participating organization with 5 projects!

- Next step is the community bonding period (already started in gitter/IRC chat)
 - Thanks to all who submitted proposals/applications
 - Looking forward to what comes next!
- Next contributor spotlight: Kevin Martens
 - Alyssa Tong after that
 - Jan Faracik has agreed to share his response when he's back from vacation
 - More to come, Alyssa is helping with getting in touch with contributors
- Versioned docs project
 - Waiting for the new location docs.jenkins.io that can host the versioned site
 - Working on the Gatsby
 - Infra team have agreed to bring the versioned docs site work into an upcoming milestone
 - Waiting for the conversion before moving docs
- Recently merged/in progress work for jenkins.io
 - [Update main OpenGraph image \(merged\) - Jan Faracik](#)
 - [Add dark mode \(in progress\) - Jan Faracik](#)
 - [Add concept of test pyramid with examples \(merged\) - Stefan Spieker](#)
- Docs office hours Asia canceled for later
 - Removed from the Jenkins calendar
- Deprecation of Blue Ocean & documentation tasks
 - Good use case for versioned documentation. The Jenkins core release that deprecates Blue Ocean should redirect from Blue Ocean to the replacement pages
 - Update status/note at top of page
 - Look for potential replacement documentation (extended pipeline graph view documentation, other documentation)
 - Unless it's best to just remove/redirect away from it
 - Potentially move the blue ocean documentation to a different area
 - Would the version documentation take care of this problem for us if it is not part of 'latest'?
 - Quite a few tutorials & documentation linked to Blue Ocean
 - Things that were written recently have had the Blue Ocean reference removed in favor of Pipeline Graph View
 - Basic usage of Pipeline Graph View covers what Blue Ocean offers. There are some things Blue Ocean can do specifically, but this does not necessarily mean the Pipeline Graph View is not enough.
 - Infra still uses it as well at this time, so it is very clear how important Blue Ocean is for some users
 - New users should start with Pipeline Graph View (for a better experience)
 - Kevin exploring (new) GitHub Projects as a way to capture all the work needed for this
 - Old project function used previously, however this has changed since

- Act as a central location for all the tasks necessary as we start to plan this out
