

Professional Licensure Disclosures

Nursing

The nursing programs offered at BHCLR are designed to prepare each student for a successful career in nursing. However, they require both successful completion of the program of study as well as successful completion of a national licensure examination before being able to practice in the field of nursing. Each state and territory have different professional licensure and certification requirements. Prospective students should keep in mind that moving or relocating during the course of a program to another state or territory could impact whether they can continue in the course, meet eligibility requirements of that particular state, and/or receive financial aid funding. Distance education students will be required to sit for the licensure exam within the state of Arkansas. However, Arkansas does participate in the Nursing License Compact (NLC) which allows nurses licensed in Arkansas to receive a compact license to practice nursing in other participating states. For more information on compact states, click [here](#). Students interested in obtaining a registered nursing license in another state should check with the applicable state licensing authority. Further information regarding the nursing programs at BHCLR or licensing can be directed to [Dr. Lindsey Gates](#).

State	Disclosure	License	State Licensing Authority/Board
Alabama	The AAS in Nursing and the BSN meet the educational requirements for licensure in this state.	Registered Nurse (RN)	Alabama Board of Nursing
