MOBILE APPLICATION PRIVACY NOTICE
Version, April 10, 2019

The privacy of all our Users is very important to us. When you use our Service as an Application User, we (as an Application Publisher) process your Personal Data. This Privacy Statement explains how we protect and process your Personal Data. We recommend that you read it carefully.

1. What is stated in this Privacy Statement?

The sections in this Privacy Statement give you information about:

Types of Personal Data Processed,
Purposes of processing Personal Data,
Places where Personal Data are processed,
Security measures applied to protect Personal Data,
Liability limits for third parties,
View, change and delete your Personal Data,
Changes to this Privacy Statement;
What will you do if you have questions or clarifications?

2. Types of Personal Data Processed

A. Personal Data used by our Service
We use Anonymous Data to improve our service. This information will not be made public through the Service.

B. Automatically generated information
Like most other websites and online services, we collect and process automatically generated information about how you use the App. The information collected includes your ip address and / or your unique device ID.

The App may collect your geolocation information, especially if you choose to participate. In any case, you can prevent the receipt of your geographical information from the settings of your mobile device.

If you particularly prefer to access and collect information from your social network account, your basic personal information (such as your name and email address) in your social network account (as well as your name and email address), as well as the parameters related to your social network user ID (not your password) and the posts you share through the App. For more information about how you can set your account's privacy preferences to control the information that can be accessed and received, please refer to the social network's privacy policy.

This also happens with respect to automatically generated information about how you use the App. This type of information helps us better understand how the App is used and, as a user, to produce services tailored to your needs.

If you enable user authorization features within the application, the following additional information is stored:

Name,
Email,
Phone number (optional);
Additional profile information sent by an external provider such as Facebook, Twitter, Google+ or LinkedIn.

We also collect the following (unknown) information to inform the app owner about the use of the app:

• The moment you open the application,
• The screens you open in the application and the time you spend on these screens,
• The moment you leave the application.

Note: If user authorization features are enabled, we may associate anonymous information with your information when you log in.

If instant notification ads are active in the application, information about BleshSDK working integrated with the application is presented below.

Through BleshSDK, users' notification permission status, bluetooth status information, device information, advertisement identifier (IDFA), location, operator, installed application list information are accessed and necessary security measures are taken for the confidentiality of this information provided.

If the User wants to save the campaign image transmitted to him in the photo album, the photo album and camera of the User are accessed and the screen image is saved in the photo album.

The information is used safely and only for the required time within the scope of sending instant notifications through the Application to the extent permitted by the User. The information is shared only with third parties for the realization of these purposes, and publication and disclosure of the information is not permitted outside this scope.

C. Specific Information
You may be asked to apply with some activities such as loyalty card, newsletters, advertising; In this case, some personal information is requested. This information is stored in the database of our service (including third parties) and will be shared with us.

When you upload data, including photos in the application, this will be shared and will be visible to all other users of the application.

3. Purposes of Processing Personal Data

A. Objectives

The parties process the Personal Data for the following purposes:

To ensure that you can use the service,
To keep the information about our service up to date,
To improve and / or customize the service,
To identify you and / or customize the Service,
To recognize you and prevent fraud,
To provide support,
To transmit your Personal Data to third parties if you request it from us or if we are legally liable.

B. Transmission of Personal Data to third parties
Personal Data without prior permission from you
