5- Plasma cells always have a role in immune response, while reticular fibers can, but not always. (b)
Reticular fibers are fixed, so they are “within connective tissue,” while plasma cells are transient. (d)
6- (a) is also correct, but I suppose that “the main characteristic” is the one that distinguishes it more.
35, 50- Not in the book, but I think it was said during the lecture.
36, 44, 51- Not in the book. Any type of cell other than CT proper is considered specialized.
