

Sims 2: List of Custom Coat Color Numbers

Here is a list I've compiled of known fur colors for pets and their corresponding coat color number. When creating a new custom color, please choose a coat color number that has not already been used or reserved by someone else. If you would like to have your custom coat color added to the list, please send me a link to the download and a message containing a list of the new furs' names and their corresponding coat color number you assigned to them. You can also reserve a coat color number in advanced, simply send me a message and I will add it to the list.

Coat Colors are listed in Hexadecimal, a 16-digit numbering system. The Sims 2 uses hexadecimals for coat colors in SimPE, so I listed them in hexadecimal as well. It's pretty easy to learn. The first numbers are 0-9, like normal, but then it goes A, B, C, D, E, and then F. Then it goes back to numbers 10-19, and then 1A, 1B, 1C, 1D, 1E, and 1F.

(P.S. If anyone knows of a better place to compile this list, possibly with mass editing capabilities without the risk of someone or something getting in and destroying it all, let me know.)

1-15. Maxis Colors

- 1. Maxis White
- 2. Maxis Black
- 3. Maxis Beige/Cream
- 4. Maxis Orange/Red
- 5. Maxis Silver
- 6. Maxis Yellow/Golden
