Istation

Step 1: Logging in through Launchpad

Step 2: Work in Istation:

After logging in, your child will see the school's subscription page.

Seek guidance from the teacher for what your child should access and when.

Leander ISD uses Istation which is a computerized learning program used for Reading (K through 8th grade) and includes an integrated assessment. Istation provides students with engaging individualized learning paths, as well as online and print resources. The Istation's Indicators of Progress (ISIP™) assessment helps teachers understand how they can personalize your child's learning.

Istation's Parent Portal also provides lessons and games to support learning at home. This visual guide will assist you in setting up and using Istation Home.

The regular use of Istation and the ISIP monthly progress monitoring is encouraged. It is recommended that 30 minutes per week provides ample time for practice. An excessive amount of time in the instructional pathway is not recommended and can cause work in content beyond abilities.

If you have any questions about utilizing Istation at home, please contact your child's teacher or the Istation support team at support@istation.com or 866-883-7323, option 2.
