Toady I’m going to show you how I’m making 10k to 45k each month doing nothing!

It literally take you 5 minutes of your time to make that money, it all depends on you if you take action or not.

We are going to enter in the world of crypto and we are going to bank hard with this method as you can see bellow proof of my earnings and an example on how this method works + a 500$ bonus.

Before we start I just want to tell you guys that crypto saved my life and it’s the best thing that happened to my! I started daily trading, lending, arbitrage trading, triangular arbitrage, HODL 6 years ago and I can say that if you want to make money online on autopilot crypto is the best way to do it.

Let’s begin with the method!

We are going to use the Binance launchpad to make thousands of dollars every month for the rest of our life’s and you will not believe how simple this is just read the entire example bellow.

What is Binance lauchpad?

First I will explain what Binance is?

Binance Exchange is one of the world's most popular (and the largest) cryptocurrency exchanges. It offers some of the lowest transaction fees and highest liquidity among the leading exchanges in crypto space. Buyers who use its native utility token, BNB, get significant discounts on tradings, among other benefits.

The exchange features over 500 cryptocurrencies, notably Bitcoin (BTC), Ethereum (ETH), Cardano (ADA), Dogecoin (DOGE), and its very own Binance Coin (BNB)

Binance Launchpad is a Binance-owned crowdfunding platform that assists crypto-startups in raising funds by offering their tokens to Binance users. It is the pioneer of Initial Exchange Offering (IEO) mechanism, a widely popular method among crypto-startups to gather funds.

Qualifying for the Binance Launchpad platform has a lot of benefits like:

- **Such startups get featured on Binance, one of the top cryptocurrency exchanges by volume. It gives these projects exposure to millions of users from all over the world.**
- **Projects that are listed on Binance Launchpad eventually achieve high liquidity in several trading pairs.**

- **The newly listed cryptocurrency gets issued instantly to a huge user-base on Binance as it becomes a holder of that coin/token.**
- **Binance provides complete assistance and guidance to blockchain startups and helps them grow within the Binance ecosystem.**

The method:

First I advice everyone to make an account on Binance it's the only thing you need ☺))

Binance.com- Sign up page here

This link will give you a 10% kickback commissions also 500 BUSD= 500$ bonus if you verify your account, the money will arrive in your account in 7 days after you submit your verification (view the image above).

After you made an account you will need at least 0.1 BNB = 47$ in your wallet (spot or futures) to participate in the next token launch.

I will give as an example the project that launched just a few days ago and made a total of 16k in pure profits.

Calculation Period

As you can see above they launched the LAZIO Token on the Binance Launchpad.
1 LAZIO = 1 USDT
This projects usually appear in the middle of the month, so I had BNB in my wallet and submitted them to this project!
What does that mean?
You will lock your BNB for 7 days (don't worry you will get your BNB coins back after the launch is over) because you will get LAZIO tokens in return.

The more BNB you submit the more LAZIO tokens you will get.
I've been buying BNB since they were 8,5$ but not to worry you can multiply your BNB doing trading like I am.

So for example IF you submit 1 BNB and they will give you 40 LAZIO Tokens.

So you think by know that you will get only 40$ profit,right?
NO, NO, NO

You will make a bigger profit!

Why?

Because they will list LAZIO Token on Binance.com

Lets see how much does it cost on the day it gets listed:

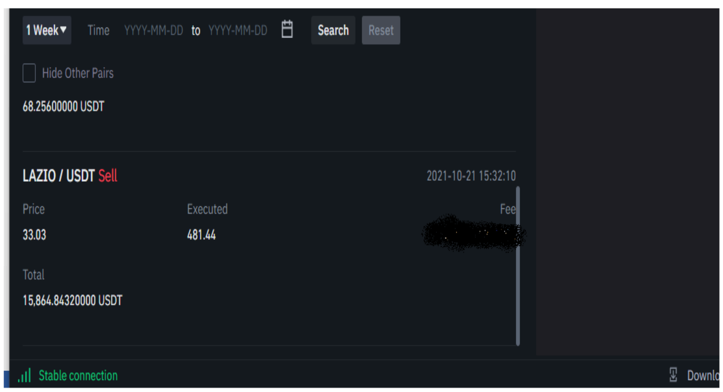
This screenshot was made the next day after the listing and you can see that the LAZIO Token is 21 USDT but when they listed the token the day before it was 38$ (38x) that means you made 38x40=1520$ profit by doing nothing.

I have received 481 LATZIO tokens and sold at 33 USDT and made 16k.



This is not the best examples because there are projects who make 50x 80x or even 100x depending on the project.

This was just an example on how the Launchpad works so do your own calculations before you start.

Short method:

Make an account with Binance.com.
Buy BNB coin and start trading to multiply it.
Wait for a new project to get on the Launchpad.
Submit your BNB for 7 days (min 0.1 BNB)
Wait to get your tokens and sell them on the exchange when they get listed with 30x 60x 90x etc.

If you guys have any questions send me a pm on this forum.
