

Privacy Policy for Grok Usage Monitor

Last Updated: June 12, 2026

This Privacy Policy governs the software application **Grok Usage Monitor** ("Application"), a Chrome extension developed by Roni Gal.

The Application is designed to help users monitor their resource consumption and tier limits directly within the Grok web interface.

1. Data Collection and Usage

The Application operates strictly on the user's local machine within their browser context.

- **No Personal Data Collection:** The Application does not collect, harvest, or store any personally identifiable information (PII), email addresses, or user credentials.
- **No Remote Transmission:** All data extraction, scraping, and layout rendering are performed locally. The Application does not transmit any usage statistics, data quotas, or account details to any external or third-party servers.

2. Local Storage Usage

The Application utilizes secure local extension storage (`chrome.storage.local`) solely to preserve user-defined interface preferences, specifically:

- The floating widget's screen coordinates (X and Y position).
- The user's preference regarding whether the widget is minimized or expanded.

This data remains entirely on your local device and is never shared, synced globally, or analyzed.

3. Third-Party Access and Disclosures

Because the Application does not collect or store any data, no user information is ever sold, traded, disclosed, or shared with third parties under any circumstances.

4. Changes to This Privacy Policy

We may update our Privacy Policy from time to time. Any changes will be reflected by updating the "Last Updated" date at the top of this page. Users are advised to review this page periodically for any modifications.

5. Contact Information

If you have any questions regarding privacy while using the Application, please contact the developer directly through the Chrome Web Store support channels.
