

Tips and Tricks

Have you ever wanted to be able to type an emoji or symbol? Maybe you want to put it in your username in [Kahoot](#) for fun? Instead of searching up the emoji or symbol you want to copy and paste in, you can press  +  + **space** whilst typing. Afterwards, you can search or click on an emoji/symbol that you would like to feature in your own literature. If you are not on a chromebook, you can press  + . Keep in mind, this keybind does not work on any mobile device, it only works on computers or laptops in my knowledge.

You can also look for hidden text encoded in messages by **highlighting the text**, revealing any text that blends into the background.
