BY ORDER OF THE OVERSEER COUNCIL

THIS DOCUMENT IS FOR THE EYES OF APPROPRIATE PERSONNEL ONLY

Involved parties:

Department of Research
Department of Medicine
MTF Alpha-1 "Red Right Hand" Unit

Location of Initiative:

Site 65

Aim of initiative:

The aim of this experiment is to investigate the potential effects of anomalous beings on members of Site Administration in the attempts to physically and mentally enhance them. Furthermore the experimentation and development of anomalous reality shifts with the thesis that this would further develop and create a greater understanding of reality bending abilities

THIS DOCUMENT IS FOR THE EYES OF APPROPRIATE PERSONNEL ONLY

Potential investigation interests:

- 1) Influence of reality bending and anomalous abilities
- 2) Finding out if these abilities can be replicated

Risks:

- 1) The SCP involved becoming negatively affected by the anomalous effects inflicted
- 2) The Operative could not be effected at all
- 3) could cause unforeseen changes in the Operatives, such as making them more violent than usual or **worsening its mental health, thus making it more unpredictable.**

Experimental Methodology:

Prior to the experiment, the personnel selected to the will be thoroughly briefed by the research team about the nature of the entity. The personnel will be informed that both entities are reality benders, and that they possess unique cognitive abilities that may make them resistant.

During the experiment, the research team will monitor the entities' vitals and observe any changes in their behaviour or cognitive functions. The team will observe the entities from outside the chambers. As well as this the operative shall be monitored by several medical officials to ensure the success of the cognitive abilities

Hypothesis

After careful consideration the main hypothesis is that the individual that is influenced by the anomalous reality bending abilities shall become enhanced and maintain the ability to utilise unique reality bending abilities after the effects of SCP-████ has completed the full cycle of events

[S E C U R E . C O N T A I N . P R O T E C T .]

BY ORDER OF THE OVERSEER COUNCIL

THIS DOCUMENT IS FOR THE EYES OF APPROPRIATE PERSONNEL ONLY

FINDINGS AND CONCLUSION

- 1) First trials via the utilisation of d class showed a lack of proper results with SCP-█████ Completing half of the cycle before the D class became incapacitated or BPM fell to 10 before dropping to 0 after it had been fully completed

2) After thorough testing with the utilisation of D class, D-3445 had completed the cycle successfully before being terminated by Alpha-1 "Red Right Hand" Operatives due to restraints becoming useless due to enhanced reality bending abilities occurring after the full cycle

3) Despite the potent nature of SCP-[REDACTED] Alpha-1 "Red Right Hand" Operative, code name "Fulcrum" was nominated via the SCP and had begun the full cycle of the anomalous effects. After several minutes with intensive monitoring via the medical consultants on hand the result was final

Conclusion

After conducting a thorough analysis and interpretation of the experimental data, it appears that with rigorous testing and analysis that it would become viable for further testing to be initiated with authorization on behalf of the O5 Council. Selection and retrieval of specific candidates for this project would need to be evaluated via both research and medical staff before proceeding.

Signed,

Assistant Marcus "Falcon" Wolfgang

Executive Researcher George Magnus
