Review Process

Decision	Description
Accept	An accept decision means that an editor is accepting the paper with no further modifications. The paper will not be seen again by the editor or by the reviewers.
Reject	The manuscript is not suitable for the TechArt: Journal of Arts and Imaging Science publication.
Revision	The paper is conditionally accepted with some requirements. A revision means that the paper should go back to the original reviewers for a second round of reviews. We strongly discourage editors from making a decision based on their own review of the manuscript if a revision had been previously required.

Authors are strongly encouraged to use colors in figures, tables, and photos to enhance legibility and clearness.[5]

Appendix

Appendices, if needed, appear before the Acknowledgment.

Acknowledgement

The preferred spelling of the word “acknowledgment” in American English is without an “e” after the “g.” Use the singular heading even if you have many acknowledgments. Avoid expressions such as “One of us (S.B.A.) would like to thank” Instead, write “S.B.A. thanks”

Put sponsor acknowledgments, if any, in the footnote on the first page, not in the acknowledgments section.
