BUSINESS NEWS – 8th JUNE 2022

Bristol Myers Squibb to Acquire Turning Point Therapeutics for $76.00 per share

“The acquisition of Turning Point Therapeutics further broadens our leading oncology franchise by adding a best-in-class, late-stage precision oncology asset,” said Giovanni Caforio, M.D., Board Chair and Chief Executive Officer, Bristol Myers Squibb. “With this transaction, we are continuing our strong track record of strategic business development to further enhance our growth profile.”

Repare Therapeutics Announces a Worldwide License and Collaboration Agreement with Roche for Camonsertib (RP-3500)

“Camonsertib has the potential to help cancer patients across numerous solid tumors as a monotherapy and possibly in combination with other agents," said Kim Seth, Ph.D., EVP and Head of Business & Corporate Development at Repare. “Given the encouraging data Repare has generated for camonsertib as a potentially best-in-class ATR inhibitor with a promising tolerability profile and patient selection insights in areas of high unmet medical need, and Roche’s leading global footprint and unique expertise in precision oncology, we are confident that Roche is the ideal partner for us to drive the broad global development and commercialization of camonsertib.”

Immatics and Bristol Myers Squibb Expand Strategic Alliance to Develop Gamma Delta Allogeneic Cell Therapy Programs

“The expansion of our collaboration with Bristol Myers Squibb significantly advances our allogeneic cell therapy development strategy,” commented Harpreet Singh, Ph.D., Chief Executive Officer and Co-Founder of Immatics. “We welcome opening another chapter of our work with a trusted partner and the expertise and capabilities both companies provide in cell therapy development to create novel medicines for cancer patients.”

Boehringer Ingelheim Enters Global Licensing Agreement To Develop And Commercialize Innovative Antibodies From A*Star For Targeted Cancer Therapies

“Boehringer Ingelheim believes that these promising antibodies in-licensed from A*STAR will help us advance potent therapeutic candidates against key molecular cancer targets,” says Clive R. Wood, Senior Corporate Vice President and Global Head of Discovery Research at Boehringer Ingelheim and continues: “We look forward to developing these assets for a broad range of cancers with the goal to deliver breakthrough opportunities for patients.”

Regeneron Purchases Sanofi's Stake in the Regeneron and Sanofi Collaboration on Libtayo® (cemiplimab), a PD-1 Inhibitor Approved for Multiple Forms of Cancer

"This strategic acquisition is a major step towards Regeneron's goal of becoming a global oncology leader, centered on Libtayo as an important choice in settings where PD-1 inhibitors can be used as monotherapy and, excitingly, in potential new combinations with our differentiated and diverse pipeline of oncology assets," said Leonard S. Schleifer, M.D., Ph.D., President and Chief Executive Officer of Regeneron. "In 2021, Libtayo was approved for two new monotherapy indications in the U.S. and EU and global net product sales increased 32% year-over-year, providing a strong foundation for our multi-faceted oncology strategy and helping to maximize the potential value of our pipeline."

Astellas and GO Therapeutics Enter into Strategic Research and License Agreement to Develop Novel Antibodies for Immuno-Oncology

"We are excited to collaborate with Astellas to develop a new class of Immuno-Oncology therapeutics," said Constantine Theodoropulos, co-founder and CEO of GO Therapeutics. "The combination of GO's targets and antibodies and Astellas' ACCEL technology promises to create a new generation of cancer treatments that have a greater therapeutic index. This will enable oncologists to increase the efficacy of antibody-based immunotherapies for solid tumors with less damage to healthy tissues."
