**Abstract** - The paper template is used as a guidance for submitting an scientific article publications in journals managed by Bina Sarana Informatika Journal. The author must follow the instructions such as limitation of abstracts maximal 100-250 words in English (italic) without equations, pictures and table. The font size should be Times New Roman - 10 points. The abstract contains the prologue of the problems from background of the research, rationality, purposes, research methodology and design, and results (hipotesis). The number of pages in manuscript is min. 5 pages used A4 paper size and single space.

Keywords: 3 words or frase

### 1. Introduction

The article has never been published in other media and no plagiarism. A plagiarism-free statement can be included in a document signed by the author and uploaded to the supplementary file (step 4), or it can also be attached to the results of a plagiarism check. Starting Issue 2024, **the manuscript should be in English.**

The writing format is 2 columns with equal width, 1 cm column distance using A4 paper size (21x29.7cm). Text margins from left and top are 3 cm, right and bottom are 2 cm. Manuscripts are written in Microsoft Word, single spaced, Times New Roman 10pt and a maximum of 12 pages. Paragraph settings with a distance of 10pt on the after spacing and do not use the First Line Indent.

The title of manuscript should describe the content and use the fewest possible words. Avoid using words that make too long such as "A Study of...", "Investigation of.....", "Implementation.....", "Observation on.....", "Effect.....", "Analysis.....", "Design...", etc. Article search depends on the accuracy of the title, the keywords also help in searching references.

The maximum number of words in the title is 14 words which refers to the Higher Education Accreditation rules.

The introduction should describe clear background, statement of the problem, literature relevant to the subject, the proposed approach or solution, and novelty of the research containing the innovation. (Birtha, Arifudzaki; Soemantri, Maman; Abdian, 2010)

Management and citation of bibliography made in APA style. Terms in foreign languages are written in italics. The articles are presented in a section structure: Introduction – Research Methods/

Algorithms (optional) - Results and Discussion - Conclusions. (Liza & Yupinti, 2012)

The literature review can be used by the author in the "Introduction" chapter to explain the difference between research and other articles, that writing is the latest innovation. (Han & Kamber, 2006)

If the research has high originality, which proposes a new method or algorithm, additional chapters after the "Introduction" and before the "Research Method" can be added to briefly explain the proposed method or algorithm. The Introductory Chapter may also contain supporting theories of proposed methods for solving a problem and/or the development of such methods, based on clear references (books, journals, proceedings and other scientific articles).

### 2. Research Methods

Describing the chronological research, including research design, research procedures (in the form of algorithms, Pseudocode or others), how to test and acquire data. The research program description should be supported by references; thus, the explanation can be accepted scientifically.

### 3. Results and Discussion

In this section, the research results are explained and at the same time given a comprehensive discussion. Results can be presented in numbers, graphs, tables, etc that make the reader understand easily. In this section emphasized the novelty of research that contains innovation, as well as its implications. Discussions can be made in several sub-chapters.

#### 3.1. Sub Chapter 1

Sub Chapter Contents.

3.2. Sub Chapter 2

Sub Chapter Contents.

Document Display Format

The abstract writing format is written in one paragraph and italicized. The manuscript from Introduction to Reference is made in a two-column model. Headings in Tables and Figures use table numbers 1, Table 2, etc. Or Figure 1, Figure 2, etc.

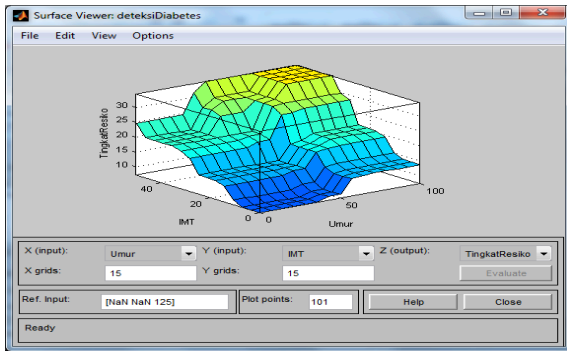

Table shapes use only horizontal line designs for each data fill (Marcoulides, 2005). An example can be seen in Table 1. The letters in the table use Times New Roman size 10, and each foreign word is italic.

Table 1. Title

No	xxx	xxx	xxxxx
1	0	5	xxxx
2	1	4,5	xxxx
3	-1	4	xxxx

Source: xxxxx (9999)

Provide an explanation that refers to the table number.

Source: xxxxx (9999)

Figure1. Title

Provide an explanation that refers to the table number.

If the image or table is difficult to place in the column please place it on the last page while still providing the image name or table title.

3.3. Equations and symbols

The equation is written in italic and numbered in parentheses. The citation of the equation must be in the form of "equation (2)". All symbols must be defined in the body of the manuscript. Here is an example of an equation and symbol used:

$$\text{Similarity}(p, q) = \frac{\sum_i f(p_i, q_i) \times w_i}{w_i} \quad (1)$$

Note:

p = New case  
 q = Saved case/  
 etc

Numbering

Use numbering that corresponds to numbering order in Microsoft Word and for mentions of items using two-dots without spaces:

Sequential item numbers, starting from mentions with numbers up to letters:

- a. First item (1, 2, 3, ...)
- b. Sub item below (a, b, c, ...)
- c. Sub sub item below (1), 2), etc

Header contains Journal's Name, Volume, ISSN and E-ISSN number. The footer contains journal website link and page number on right side.

4. Conclusion

Provide a statement which expected and stated in the "Introduction" may eventually result in "Results and Discussions", the end is compability. In addition, it can also be added the prospect of developing research results and the prospect of implementing advanced studies. Avoid Statistical Data and submit recommendations for future research based on sources.

References

The main references are international journals and national journals or ISBN-based books. All references should be the most relevant and the latest sources. References are written in APA style. Each quote must be written in ascending order (A-Z). There is no need to be grouped by book, journal, etc. References from the website / internet url can be obtained from reliable sources. References should be written using the help of a reference manager software such as Mendeley or others with a minimum number of 20 references.
