> Technicians note:
Site Inspection told me to put in some weird fucked up codey-shit, so, this means something I guess...?

> IMPORTANT ADDENDUM: [LOGGED BELOW IN PERSONNEL DESCRIPTION]

==========

==========

Psychological Profile:

- Cognitive Capacity: High
> Capable of complex research and problem-solving.
> Addendum #01: Time as a Director of Research shows ability to manage policies & site personnel

- Emotional Range: ~~Average~~ Wide
> ~~Displays the average emotions, possibly a tad bit eccentric with his~~
~~kindness and up-beat personality.~~
> Emotional Range Update: Changed from when he originally transferred to Site-65, he originally had more of an average emotional range. Nowadays, he freely expresses himself, and many people note that he has eccentric but fantastical tastes.

==========

==========

Personnel Description:

Having joined the Foundation in his mid 20s,
Desmond quickly had proved himself through his discipline and pragmatic approach to high-stakes situations.

His work often places him at the intersection of science and the unknown, where his firm demeanor acts as a way for garnering trust within his peers.

A rather eccentric but kind person, Desmond commands respect from colleagues and subordinates alike.

His leadership style is defined by clarity, consistency,
and an uncompromising demand for excellence.

He was transferred from Site-56 into Site-65 to be instated as the Director of Research

<u>Addendum #01:</u>

Desmond has become more of a relaxed and up-beat personnel after a
few months within his position here at Site-65. He has more emotional
warmth now, and is easily approachable by friends and colleagues alike.

He has become more lax when it comes to handing out strict

punishments and doesn't jump the gun when it comes to them, carefully
understanding what course of action should be taken.

Addendum #02:

Promotion:
Director of Research -> Site Advisor

Addendum #03:

He has attempted to take his own life. Due to several stress factors. He did this by triggering the nanobots within his blood stream to attack his brain, ending in several infections actively allowed to brew within him, and consequently attacking him from the inside; till eventually he was bleeding out inside Medbay. Cameras show he went to Medbay and requested a check-up...
Reasons why is unknown, however during his rest period within Medbay, surrounded by Consultants a coded message was displayed on his Class-A tablet:
";5)7 15608† = 4ǂ); 506¶8"

> Technicians note:
Dude I don't get paid enough to decode whatever the fuck that means?

Addendum #04:

Promotion:
Site Advisor -> Site Manager

> Technicians note #01:
Holy shit Site Inspection,
you guys are getting me to
input some weird-ass
shit that yall wrote
to me, probably after
smoking some good shit!

> Technicians note #02:
Did some boredom-digging,
I tried to decode whatever
this was cause why not
however I still don't
know what it says...
Though I found
an old backlog that
says somethings that
may point to how to decode
It:
"All internal communications are
shifted by standard protocol up to a
gradient of negative seven.."
And,
"Final records are stored in a
common digital encoding."
Maybe that means something,
who knows...
