

## Proposed agenda & Notes

- General updates:
  - Kris: Core issues that affect us
    - Nothing new
  - Kris: Status update on [page manager](#)?
    - EclipseGC: “Wizard is in, PM is kind of in a holding pattern until panels catches up”
      - <https://www.drupal.org/node/2697587>
  - Frega / David / aspilicious: Status update on [layout plugin](#)?
    - Put a patch on the core issue:
      - <https://www.drupal.org/node/2296423>
      - dsnopek has no time - timplunkett will help out!
  - Jakob / mortenson / DyanneNova / yanniboi: Status update on Panels / IPE port?
    - japerry: “I’m going to hop on and help on the wizard (panels backend) this week, we’re discussing panelizer defaults at the moment”
      - <https://www.drupal.org/node/2697587>
    - mortenson:
      - “I’ve got two issues in review around UX”
      - <https://www.drupal.org/node/2636490>
      - <https://www.drupal.org/node/2700703>
    - EclipseGC: “I’ll be back on these layout issues soon I hope”
      - <https://www.drupal.org/node/2699845>
      - <https://www.drupal.org/node/2699841>
    - DyanneNova: “I’m available for ux discussions, but pretty swamped with conference things coming up, so that’s it for me”
  - andrewbelcher: Status update on mini-Panels?
    - Andrewbelcher: “I’ve started working on the wizard integration. I’ve hit stoppers with tempstores in panels which are all using page manager tempstore ids :(“
    - No issue yet - andrewbelcher will create one tomorrow
    - EclipseGC is working on the above, because it also effects Panelizer defaults
    - Andrewbelcher and EclipseGC may collaborate on this tomorrow
  - David: Status updates on Panelizer?
    - Juampy has been working on Wizard integration to build admin UIs for editing defaults
      - <https://www.drupal.org/node/2664682>
    - EclipseGC:
      - “I’m working to enable multiple defaults and builder-picking.”
      - “juampynr had to do some not-fun things with contexts and I’m cleaning that up a bit to match panelizer expectations”

- “I think I’m REALLY close to getting a page rendering using the defaults built in the backend administration”
  - Kris / Jakob: Status update on CTools?
    - EclipseGC:
      - “CTools has been pretty stable as of late. I’m contemplating a couple code changes to the abstract class we use for block variant stuff. Currently PM has a class that subclasses that and adds a \_\_sleep method. We need to move that sleep method to ctools because panels subclasses it as well and needs the same behavior”
      - “also I have some failing tests for the core ContextHandler issue, and I should comment them out so that ctools isn’t needlessly failing tests”
      - “but otherwise, nothing to report. We have some outstanding issue that I need to take the time to review, but nothing critical”
- Discussion topics for this week (switch to hangouts?):
  - <https://www.drupal.org/node/2704859>

## Participants

- japerry
- dsnopek
- andrewbelcher
- mortenson
- DyanneNova
- EclipseGC
- 

## Log

12:00 PM <dsnopek> Hi Everyone!

12:00 PM <dsnopek> Here's the notes/agenda for today's meeting:

<https://docs.google.com/document/d/1yvFZtViAgiB76BsICUfpKTtL5d9WI1W0Ga-RY3ypY/edit?usp=sharing>

12:00 PM <japerry> hey hey!

12:00 PM <dsnopek> Who all is here for the meeting?

12:00 PM <andrewbelcher> hello!

12:00 PM <Druplicon> hola

12:00 PM <mortenson> dsnopek: here!

12:01 PM <DyanneNova> here!

12:01 PM <EclipseGc> here

12:01 PM <dsnopek> Awesome, thanks! Let's get started!

12:01 PM <dsnopek> Anything going on in core that affects us?  
12:01 PM <dsnopek> EclipseGc: ^  
12:01 PM <EclipseGc> no change  
12:02 PM <dsnopek> EclipseGc: Ok, thanks!  
12:02 PM <dsnopek> Page Manager status updates?  
12:02 PM <EclipseGc> Wizard is in, PM is kind of in a holding pattern until panels catches up  
12:03 PM <EclipseGc> Deelee: are you running a tagged release? or dev of PM?  
12:03 PM <EclipseGc> Deelee: please use a tagged release  
12:03 PM <dsnopek> EclipseGc: Is there an issue for the Panels catching up?  
12:03 PM <Deelee> how to test it  
12:03 PM <EclipseGc> dsnopek: <https://www.drupal.org/node/2697587>  
12:03 PM <Druplicon> <https://www.drupal.org/node/2697587> => Wizard API integration [#2697587] => 10 comments, 10 IRC mentions  
12:04 PM <EclipseGc> Deelee: just look at what version of the module you're running  
12:04 PM <dsnopek> EclipseGc: Awesome, thanks!  
12:04 PM <Deelee> EclipseGc, of panels or page manager?  
12:04 PM <dsnopek> Next is Layout Plugin...  
12:04 PM <EclipseGc> Deelee: both, only use released versions  
12:05 PM <dsnopek> Unfortunately, no change - I still have no time and Tim apparently hasn't either  
12:05 PM <Deelee> Panels 8.x-3.0-beta4 Page Manager 8.x-1.0-alpha23  
12:05 PM <dsnopek> japerry: mortenson: DyanneNova: Panels and IPE status updates?  
12:05 PM <dsnopek> And whoever else may be working on that :-)  
12:05 PM <dsnopek> I'm a little behind on who is doing what  
12:06 PM <japerry> dsnopek: I'm going to hop on and help on the wizard (panels backend) this week, we're discussing panelizer defaults at the moment  
12:06 PM <mortenson> dsnopek: I've got two issues in review around UX - <https://www.drupal.org/node/2636490> and <https://www.drupal.org/node/2700703>  
12:06 PM <Druplicon> <https://www.drupal.org/node/2636490> => IPE's cancel button is easy to mistake for a button to close the tray (rather than throw away all changes) [#2636490] => 5 comments, 1 IRC mention  
12:06 PM <Druplicon> <https://www.drupal.org/node/2700703> => Allow items to be searched in the Panels IPE CategoryView (Change Layout/Manage Content tabs) [#2700703] => 2 comments, 1 IRC mention  
12:06 PM <mortenson> One adds better focusable accessibility to the IPE, the other provides a search to the Layout/Content tabs.  
12:06 PM <japerry> dsnopek: which I guess is panelizer. don't wanna step ahead. but my work this next two weeks for panels will be focused on <https://www.drupal.org/node/2697587>  
12:06 PM <Druplicon> <https://www.drupal.org/node/2697587> => Wizard API integration [#2697587] => 10 comments, 11 IRC mentions  
12:06 PM <mortenson> This week I'm working on locking (still)  
12:06 PM <EclipseGc> dsnopek: I'll be back on these layout issues soon I hope: <https://www.drupal.org/node/2699845>

12:06 PM <Druplicon> <https://www.drupal.org/node/2699845> => Allow custom attributes to be assigned to layout regions [#2699845] => 6 comments, 4 IRC mentions

12:07 PM <EclipseGc> dsnopek: <https://www.drupal.org/node/2699841>

12:07 PM <Druplicon> <https://www.drupal.org/node/2699841> => Add public methods from the layout plugins to the interface [#2699841] => 2 comments, 3 IRC mentions

12:07 PM <DyanneNova> dsnopek: I'm available for ux discussions, but pretty swamped with conference things coming up, so that's it for me

12:07 PM <Deele> EclipseGc, Panels 8.x-3.0-beta4 Page Manager 8.x-1.0-alpha23, what needs to be done?

12:08 PM <EclipseGc> Deele: your layout won't update when you change it once looking at block placement?

12:08 PM <dsnopek> japerry: EclipseGc: DyanneNova: mortenson: Thanks!

12:09 PM <dsnopek> andrewbelcher: Any mini-Panels updates?

12:09 PM <andrewbelcher> I've started working on the wizard integration

12:09 PM <dsnopek> andrewbelcher: Awesome! Is there an issue for it?

12:09 PM <andrewbelcher> I've hit stoppers with tempstores in panels

12:09 PM <andrewbelcher> which are all using page manager tempstore ids :(

12:10 PM <andrewbelcher> no - no issue yet -I will create one tomorrow

12:10 PM <EclipseGc> andrewbelcher: the expectation of a page\_variant?

12:10 PM <Deele> EclipseGc, I'm in  
`/admin/structure/page\_manager/manage/p\_saakumlapa/variant/panels\_p\_saakumlapa` and changing Layout, when I select new one, Layout Settings is being updated to layout specific settings, ajax request is successfully made, then I click "Save" button, page reloads, but Layout is back "One column layout", that I selected while creating variant.

12:10 PM <EclipseGc> andrewbelcher: I'm digging through that space right now too, so I'll be smoothing that out some shortly

12:10 PM <andrewbelcher> EclipseGc: yes and also the assumption of page\_manager.page tempstore

12:10 PM <andrewbelcher> EclipseGc: juampynr said you were working on it, so I didn't want to delve too deep until I'd caught up with you

12:11 PM <EclipseGc> Deele: everything about panels integration to PM is kind of screwed up right now, we've been working to fix it. I'm not sure of a work around currently

12:11 PM <EclipseGc> andrewbelcher: I am indeed

12:11 PM <EclipseGc> andrewbelcher: because panelizer defaults needs it too

12:11 PM <andrewbelcher> EclipseGc: maybe ping me when you're around tomorrow and you can catch me up so we can work towards solving it

12:12 PM <EclipseGc> andrewbelcher: ok great

12:12 PM ← rvillan quit (~rvillan@wsip-70-166-12-153.sd.sd.cox.net) Quit: Leaving.

12:12 PM <andrewbelcher> that's all from me!

12:12 PM <dsnopek> andrewbelcher: Thanks!

12:13 PM <dsnopek> Next is Panelizer...

12:13 PM <dsnopek> I have no updates, but I know juampynr has been working on the wizard/defaults admin ui stuff

12:13 PM <dsnopek> Does anyone else have something to add?

12:13 PM <EclipseGc> working on panelizer defaults this week coming behind juampynr's great work and just trying to get it to a place where we can start doing reviews with an eye towards committing

12:13 PM <EclipseGc> <https://www.drupal.org/node/2664682>

12:13 PM <Druplicon> <https://www.drupal.org/node/2664682> => Implement admin UI for editing Panelizer defaults [#2664682] => 24 comments, 12 IRC mentions

12:14 PM <EclipseGc> I'm working to enable multiple defaults and builder-picking.

12:14 PM <EclipseGc> juampynr had to do some not-fun things with contexts and I'm cleaning that up a bit to match panelizer expectations

12:14 PM <EclipseGc> I think I'm REALLY close to getting a page rendering using the defaults built in the backend administration

12:14 PM <Deele> EclipseGc, how is PM meant to be used then?

12:15 PM → legolasbo joined (~legolasbo@hetkantoorvan.nedbase.nl)

12:15 PM <EclipseGc> Deele: oh you're doing it right, it's just that Panel's integration to it was needlessly complex due to some early choices we made, and it doesn't work as nicely as it could. I promise, we're all working to fix it

12:16 PM <dsnopek> EclipseGc: Thanks!

12:16 PM <dsnopek> Last but not least: Ctools updates!

12:16 PM <dsnopek> EclipseGc: ^?

12:16 PM <Deele> EclipseGc, I'm like doing project for client, half of page is already done with simple PM and Panels, what should I do now? Is there a way to punch values in database, if interface does not work, just to change layout?

12:17 PM <EclipseGc> CTools has been pretty stable as of late. I'm contemplating a couple code changes to the abstract class we use for block variant stuff. Currently PM has a class that subclasses that and adds a \_\_sleep method. We need to move that sleep method to ctools because panels subclasses it as well and needs the same behavior

12:17 PM <andrewbelcher> Deele: you can install config\_inspector and edit the config manually through the UI

12:18 PM <EclipseGc> also I have some failing tests for the core ContextHandler issue, and I should comment them out so that ctools isn't needlessly failing tests

12:18 PM <andrewbelcher> EclipseGc: ++ to that! :)

12:19 PM <EclipseGc> but otherwise, nothing to report. We have some outstanding issue that I need to take the time to review, but nothing critical

12:19 PM <EclipseGc> Deele: yeah, modify the configuration directly. That will suck, but should be workable and also valuable knowledge long term

12:20 PM <dsnopek> EclipseGc: Thanks!

12:20 PM ⇐ legolasbo quit (~legolasbo@hetkantoorvan.nedbase.nl) Ping timeout: 240 seconds

12:20 PM <dsnopek> So, that's all the status updates...

12:20 PM <EclipseGc> yay

12:20 PM <dsnopek> We have nothing on the agenda to discuss, but does any one have anything since we're all together?

12:20 PM — EclipseGc amazingly does not

12:21 PM <andrewbelcher> I've gotta shoot off, but thanks all :)  
12:21 PM <dsnopek> andrewbelcher: Thanks to you!  
12:21 PM <dsnopek> andrewbelcher++  
12:21 PM <EclipseGc> dsnopek++  
12:21 PM <EclipseGc> andrewbelcher++  
12:21 PM <andrewbelcher> dsnopek++  
12:21 PM <EclipseGc> japerry++  
12:21 PM <andrewbelcher> EclipseGc++  
12:21 PM <EclipseGc> mortenson++  
12:21 PM <japerry> EclipseGc++  
12:21 PM <EclipseGc> DyanneNova++  
12:21 PM <japerry> mortenson++  
12:21 PM <mortenson> EclipseGc++  
12:21 PM <japerry> DyanneNova++  
12:21 PM <EclipseGc> juampynr++  
12:21 PM <mortenson> japerry++  
12:21 PM <japerry> dsnopek++  
12:21 PM <DyanneNova> dsnopek++  
12:21 PM <mortenson> dsnopek++  
12:21 PM <EclipseGc> timplunkett++  
12:21 PM <mortenson> DyanneNova++  
12:21 PM <DyanneNova> japerry++  
12:21 PM <DyanneNova> EclipseGc++  
12:21 PM <japerry> timplunkett++  
12:21 PM <DyanneNova> mortenson++  
12:21 PM <dsnopek> Heh, I didn't mean to end it just then, only say good bye to andrewbelcher :-)  
12:22 PM <dsnopek> But since the karma party as started...  
12:22 PM <mortenson> andrewbelcher++  
12:22 PM <EclipseGc> residual karma ;-) )  
12:22 PM <dsnopek> japerry++  
12:22 PM <japerry> andrewbelcher++  
12:22 PM <andrewbelcher> :P I seem to have that effect  
12:22 PM <japerry> haha  
12:22 PM <dsnopek> mortenson++  
12:22 PM <dsnopek> DyanneNova++  
12:22 PM <DyanneNova> juampynr++  
12:22 PM <dsnopek> EclipseGc++  
12:22 PM <DyanneNova> andrewbelcher++  
12:22 PM <dsnopek> juampynr++ wasn't here but deserves it :-)  
12:22 PM <japerry> EclipseGc: can we do some followup defaults discussions? wonder if dsnopek would be interested in that  
12:22 PM <EclipseGc> sure

12:23 PM <dsnopek> japerry: EclipseGc: Hangouts or chat?  
12:23 PM <japerry> dsnopek: hangout?  
12:23 PM <EclipseGc> ok  
12:23 PM <japerry>  
[https://hangouts.google.com/hangouts/\\_/association.drupal.org/panels?hl=en&authuser=0](https://hangouts.google.com/hangouts/_/association.drupal.org/panels?hl=en&authuser=0)  
12:23 PM <dsnopek> I'm down for which ever  
12:24 PM → balsama\_ joined ↔ balsama nipped out

12:37 PM <Druplicon> <https://www.drupal.org/node/2664772> => Panelizer field should always contain a Panels display (even when on a default) [#2664772] => 7 comments, 2 IRC mentions  
12:42 PM → balsama and \_ACF\_ joined  
1:05 PM <yanniboi> EclipseGc: sorry I missed the meeting, its my local user group this evening. Quick update on what I was working on last week.  
1:05 PM <yanniboi> I started working on a mini-wizard to update a layout and reallocate the regions to the new layout for panels, but hit a few walls.  
1:05 PM <yanniboi> I will update the issue with what I've found tomorrow so someone else can comment on it  
1:07 PM <EclipseGc> yanniboi: ok cool!
