2	Do it all with Premiere Pro.  Simplify your workflows with AI. Premiere Pro is loaded with AI features — like Color Match, Auto Ducking, and Enhance Speech (beta) — saving you time and helping you unlock your creativity. Learn more  Create rough cuts fast with Text-Based Editing. Auto-generate your transcript, highlight text to add clips to your timeline — then refine, reorder, and trim clips just like you'd edit a text doc. And for further refinement, clear all awkward pauses with bulk deletion and use filler-word detection (beta) to remove unwanted filler words.
