

Installation Instructions

Windows 10 or 11

1. Download the Windows zip file from <https://galeforcegame.com/download/>
2. Right-click and extract or click on Extract All. Help with [Unzip here](#) if needed.
3. Double click to enter the unzipped folder. Double click on the folders to enter the Builds\StandaloneWindows64 folder.
4. Double click on “GaleForce.exe” file to start the game.
5. If you get a Windows Defender warning, click on “More Info” and then “Run anyway”.

6. If you get a Firewall message, click on “Allow Access”.

7. Enter an avatar name and the session id (e.g. VCHQG or a new id from [dashboard.galeforcegame.com](https://galeforcegame.com/dashboard)) for your group.
8. CTRL-Q quits the game.

Macs

1. Download Mac zip file from <https://galeforcegame.com/download/>
2. Double click to unzip. Open the Builds folder and then the StandaloneOSX folder.
3. Double click the “Galeforce” app to run the game.
4. Security permissions may prevent the game from opening. Follow these directions to run anyway: [security permissions](#) (Check which [MacOS version](#) you have and make sure it’s greater than version 10.1.)
5. Enter an avatar name and the session id (e.g. VCHQG or a new id from [dashboard.galeforcegame.com](https://galeforcegame.com/dashboard)) for your group.
6. Allow permission to access the Downloads folder or move it to another location before starting the game.
7. Allow permission to use the microphone if you want to use the voice chat feature.
8. Cmd-Q quits the game
