

A significant crowd has gathered at the Germania Insurance Amphitheater at the Circuit of the Americas near Austin, DX. They're here for Representative alpal2214's campaign kickoff as he runs to represent DX-4 in the House. As alpal enters, a huge round of applause flies through the amphitheater.

GOOD EVENING AUSTIN! How is everyone tonight?

Huge cheers fly throughout the amphitheater.

Well, that's great. I'm doing awesome. We're here to begin an immense task. As many of you may know, this district was held by the Speaker of the House, APG_Revival. He did an awesome job representing both our district and the nation as a whole. Now, we have the incredible opportunity to keep his legacy of progress in our district and in the nation as a whole.

Now, what are we going to do to keep our district, our state, our nation moving forward? This is very simple. We're going to reform our immigration system so that it's easier to legally enter the United States, as well as provide a path to legal residence and citizenship for those that are in our nation illegally. Whether you like it or not, America was made by immigrants. We want to be welcoming to those that are like our founders.

Small round of cheers goes around the crowd.

Climate Change is very much real, as this area saw first-hand just a few months ago with Hurricane Nevra. Along with continual rebuilding, we're going to mitigate the steps so that this doesn't keep on happening. To those that are still rebuilding, I hear you, and I will keep pushing to help you with your rebuilding and not just that. I want to continue to push for national Climate Change legislation so that no one will have to go through constant rebuilding in the future.

A larger cheer builds, as people feel a lot more passionate about Climate Change here.

We're going to promote tourism to our state and to the district. We have many major tourist destinations, and by keeping people coming to our state, creating more jobs, bringing more money into our district, and creating great experiences for both our visitors and our residents alike.

Next, we're going to improve our transportation. As your Chief Financial Officer, I began a survey of the highways in our state. I want to continue to provide funding to our district's highways to keep us moving. I also want to continue providing more opportunities for rail travel, as well as expanding our airports. We're going to make this state accessible to everyone.

Huge cheer as alpal gets to his big statement.

You know, that's what this whole campaign is about. It's about bringing people together to make our district, our state, our nation the best it can be. I've served in Congress for longer than my opponent, who only has a 45% voting record compared to my 100%. I've written bills that directly affect all of my constituents and have tripartisan support, as compared to my opponent who has written vague legislation that is only for the good of his party, with only 1 bill with 1 sponsor that is not a member of the Republican Party. Although I've served in Lincoln and Sierra, Dixie is my home. I have the experience necessary to know our state, having served as the Chief Financial Officer for a whole term, which very few in Dixie can say.

Laughs through the crowd, as they know the troubles of their cabinet.

I've served in Congress for about a month now, so I know the ins and outs of Washington and getting stuff done. When we keep Texas and Dixie blue, build our majority in the House and flip the Senate, and elect Zero for President, America will be the best it can be. Now get out there, and let's win this thing! Thank you all!

Alpal exits to huge applause. After the speech, [this ad](#) and [this ad](#) are released on social media.

M: The ads are part of this event, and is to be graded as such. Thanks graders!
