Event Accessibility Guide

At the University of Texas at Austin

The following document was created by On the Moov and does not reflect the views of the University of Texas. Accessibility guidelines were created and measured by disabled members of On the Moov and may not align with ADA guidelines. Gentle reminder that being able to physically get into a space does not equal accessibility.

Accessibility Plan

Physical Accessibility

- Assign an individual from your team to handle accessibility needs, concerns, and communication
- Inspect the entrances, exits, and travel paths that participants will use. Evaluate the space for any barriers and address them before choosing the venue, during event planning, and on the day of the event.
- Take into account the anticipated placement and height of tables and seats. Ensure that all participants, including wheelchair users, have access to all aspects of the event, such as food, restrooms, and other amenities.
- If serving food, include an option for participants to request a particular diet or indicate any severe allergies. Additionally provide plastic straws for beverages and plastic utensils for food
- Designate seating areas for disabled people and provide ample space to accommodate participants with service animals.
- Designate an individual who can assist with serving food and consider including food options that do not require utensils.

Promotional materials

- Use the following (or a similar) tag in event announcements:
    - " This event is _____ (wheelchair accessible, ASL interpreted, CART captioned, etc.). Please contact _____ with accessibility requests."
- Ensure the method of communication (email, social media, flyers) is accessible.
- Provide written instructions and a map to identify accessible routes to access the event and to identify accessible parking and entrances/exits
- Notify participants whether the event will have flashing lights (e.g., strobe lights), loud music, or loud sounds.

Communication

- Consider offering American Sign Language (ASL) interpreters and/or Communication Across Real Time Translation (CART) for real-time communication. Allow for seating close to any interpreters

    - Alternative inexpensive option includes toggling captions in Google Slides and Powerpoint
- Use closed-captions for video footage
- Provide the presenters with microphones, and ensure that there are available microphones for participants to use during the event.
- Ensure event materials are accessible and can be provided in alternative formats, such as enlarged print (at least 18-point font), braille, and electronic formats.

Space Reservation

Space Reservation Website

If 10% or less of the space is not wheelchair accessible, it is marked as not wheelchair accessible. Accessibility includes participation and if a wheelchair user cannot access a large portion of the space, it is deemed not accessible by On the Moov. Additionally, even if a location is marked as most accessible, it may become inaccessible when considering travel distance.

- Indoor spaces with a note saying “ample seating” may require a request for chairs to be placed in the space.
- “Moveable chairs” refers to chairs that can be physically moved to accommodate mobility devices.
- “Non moveable chairs” refers to chairs that cannot be moved to accommodate mobility devices.
- Please note that some buildings may have a policy against moving furniture. Nonetheless, buildings must accommodate the need to move furniture for disabled individuals.
