

Akvelon Inc.

Position: Junior Software Development Engineer/DevOps

About us

Akvelon Inc (USA) works in the field of software engineering based on a variety of technologies. Our company is a member of the vendor program, which gives employees the opportunity to work with clients in the United States and other countries (**Microsoft, Facebook, Airbnb, Dropbox, Pinterest**, and many others). This is a great opportunity to learn from and work with leading engineers of world-renowned companies.

About project

Join our collaborative team dedicated to developing a cutting-edge solution that connects automakers and developers in the autonomous vehicle industry. As a junior level developer, you'll play a vital role in creating a seamless integration for software deployment to Azure, enabling efficient data handling from vehicle sensors.

If you're looking for an exciting project that allows you to work alongside a talented team and make a meaningful impact in the world of mobility, this is the perfect opportunity for you. Join us on this journey and be at the forefront of autonomous vehicle innovation.

Responsibilities

- Develop and maintain C# applications using .NET 6, adhering to best coding practices and industry standards.
- Collaborate with the team to design and implement solutions on the Azure cloud platform, considering scalability, security, and performance.
- Troubleshoot and resolve issues in existing applications, utilizing problem-solving skills to identify root causes and implement effective solutions.
- Assist in the integration of Azure cloud services into applications, ensuring seamless data flow and efficient utilization of cloud resources.
- Participate in code reviews to ensure code quality, maintainability, and alignment with coding standards.

- Contribute to the continuous integration and continuous deployment (CI/CD) pipeline, automating the build, testing, and deployment processes.

Requirements

- Proficiency in C# programming language and practical experience in developing applications using .NET 6 framework.
- Basic understanding of Azure cloud development principles, including familiarity with Azure services and their integration into applications.
- Strong problem-solving and troubleshooting skills, with the ability to analyze and resolve technical issues efficiently.
- Familiarity with continuous integration and continuous deployment (CI/CD) concepts, with hands-on experience in deploying applications using CI/CD pipelines.
- Ability to work collaboratively in a team environment, communicate effectively, and contribute to code reviews and discussions constructively.

We offer

- Entering a professional level equivalent to world standards.
- High wages (we are guided by the candidate's wishes and level).
- LCA with dentistry.
- An excellent team of high-level professionals one can learn from.
- Flexible working hours.

Please send your resume / questions to our mail (career@akvelon.com).

We will be glad to see you in our team!
