

Have a go at these problems with your maths
buddy...

1. The Kaupeka teachers order 100 pieces of fish for the end of term celebration, but on the day only 90 students arrive at school for the day.

- a) How many pieces of fish does each student get?
- b) How many are left over? (What is the remainder?)
- c) What is the remainder as a fraction, and a decimal?
- d) Can you figure out what the remainder is as a percentage?

2. There were 49 long skipping ropes available at St Francis of Assisi for lunchtime skipping. If 5 people need to be in a group for skipping, how many groups can you have at the most at one time?

- a) How many skipping ropes would remain?
- b) Try the remainder as a fraction and a decimal.
