

# Timeless Wallet Product Roadmap: 2022 - 2023

[link.timelesswallet.xyz/roadmap](https://link.timelesswallet.xyz/roadmap)

## Context:

Our 2023 plans include expanding our social utilities and giving the users a convenient entry point into Web3. Our success depends on aligning on a few things that matter — **more usage** through **deeper product engagement**.

As such, every feature must satisfy the toothbrush test, where all new products and features should be **socially engaging** and/or important enough that people will **use them at least twice a day**.

This document outlines our key focus areas and the features we're prioritizing, their current stage, and when they'll be available to testers and eventually to the larger Timeless community. As user feedback is gathered, the roadmap will be updated as necessary. *[Last updated Jan 9th, 2023]*

## 1H 2022: foundational primitives of a non-custodial wallet

- Secure enclave to abstract private keys/seed phrases
- 1-click smart contract wallet creation
- Multi-wallet support
- Harmony protocol support
- Wallet backup and recovery via Google Authentication
- Wallet transaction details
- Fiat on-ramp (simplex)
- Transaction history and visualization
- Chat functionality
- Send/Receive payment using a wallet-to-wallet chat
- 1-1 and Group Chat (Easy share via QR)
- Red packet

## 2H 2022: native modules for DeFi, NFT, dApps

- Externally-owned account (EOA) wallet creation
- Multichain EVM (Ethereum, Polygon, Binance, Avalanche, Binance )
- DNA3 dynamic NFT
- Multi-wallet profile system
- Token swap via DEX
- Fiat on-ramp (Wyre, Transak)
- Subscribable channels
- DeFi – Liquid Staking features
- NFT as an access pass
- WalletConnect
- Unstoppable domain
- MPC – Social recovery

## 1H 2023: social profiles, curated content feeds

- (p1) Social profile – a native identifier can be associated with any information or resource on the web2 or web3; including integration with the top self-sovereign identity providers (ENS, Unstoppable, CyberConnect, Lens)
- (p1) DNA3 Direct-to-avatar (DTA) marketplace
- (p1) Expand to the top 20 EVM chains (e.g., Cronos, Base)
- (p2) Group ownership of NFTs
- (p2) Event Management and event discovery – We. Here (PoAP)
- (p3) Going Dutch on-chain (1/n)
- (p3) [EIP 4361: Sign-In with Ethereum](#)

## 2H 2023: power tools for community building

- Non-EVM chain support (i.e., Near, Solana)
- DAO on Tap – Creation of DAO, on-chain voting, governance
- DAO Treasury management (i.e., Gnosis SAFE multi-sig)
- Scheduling and notifying DAO meetings or quick polling (Tally)

- Collecting DAO funds (JuiceBox)
- Self-sovereign digital identities
- Bill Split
- Distributing tokens to contributors (Superfluid)
- Less fragmented communication path for voting (Snapshot)
- Explore Zero-knowledge features (i.e., ZkSync)
- [EIP-4337: Account Abstraction](#)
