

Bachelor of Science—Nutritional Sciences & Wellness
University of Arizona College of Agriculture Life and Environmental Sciences
Pima Community College Transfer Pathway

The B.S. in Nutritional Sciences & Wellness provides an interdisciplinary approach to learning about food, nutritional therapies and optimal well-being. You'll start your studies with a strong science core and then customize the coursework to your interests. For example, if you wish to pursue graduate school in the medical, dental or physical therapy fields, you can take additional math and science classes; if you are preparing for a career in food and nutritional management, you can incorporate accounting, economics or food services studies. Personalize your academic plan to reach your goals!

Pima Community College students looking to transfer into the U of A's Nutritional Sciences & Wellness program should use the following page as a recommended outline of courses. This information is provided by the [AZTransfer course equivalency guide](#) and is subject to change. Consult with your transfer admissions counselor and academic advisor to review specific courses and transfer pathways. After your official transcript is processed by the U of A, your coursework will be evaluated in preadmission for completion and grades (must receive C or higher).
