

9, 10 and 11 year old Scavenger Hunt
Can you find.....

A 4-digit number or a representation of one	2 numbers or piles of something that make a subtraction or division sum	Something that represents half of 26
3 things that show different quadrilateral shapes	Something symmetrical	Something that is perpendicular
Something that you estimate to be 75cm tall or long	Something that is smaller than 1cm. Can you estimate how many mm it is?	Something that is really, really heavy but also really, really small
Something that you can measure liquid in. How many cups of liquid do you think it can hold? Can you now estimate how many ml you think it will hold?	A pile of something that has about 40 objects in	A fraction of something (not a half or quarter)
An obtuse angle. Can you estimate how big you think it is?	An acute angle. Can you estimate how big you think it is?	An irregular shape. What is it?
