

Ссылка: [Manchester Stations to Liverpool Lime Street via the Chat Moss](#)

Это отличный маршрут, который соединяет Манчестер и Ливерпуль не через нижнюю дизельную ветку, а через верхнюю электрифицированную.

Плюсы:

- Очень красивый маршрут.
- Большой потенциал для сценариев.
- Огромное число кастомных объектов, таких как станции, переезды, сигнализация, здания, мосты, тоннели, переходы и прочее.
- Очень приятная растительность.
- Маршрут довольно приятно проезжается из края в край.

Минусы:

- Некоторым длина маршрута покажется довольно малой.
- Платно.

Еще один очень приятный маршрут от ATS с большим числом детализированных объектов. Огромное множество сценариев не дадут заскучать ни при каких обстоятельствах.
