Team History

At the end of the 2018-2019 season, the two FTC teams (14671 and 12986) from the Tulsa School of Arts and Sciences (TSAS) disbanded and several members decided to join new teams in Tulsa. However, there were a small number of students that wanted to keep the robotic program alive at TSAS, so in August of 2019, four students came together and restarted team 14671 with one of the previous year's mentors as coach.

Our team is comprised of 9 high schoolers, all in different grades and with varying sets of skills and experiences. It started as 4 members, and over time more people joined, and we have what we have now. Every person here has the things they excel at, and we all work together and do our part for our common goals to be accomplished. We strive to do well with hard work, passion, and having fun together as friends as well as teammates.
