Bio: Shantae always wanted to grow up and be a hero after Sonic saved her from being robotized when Eggman took over Knothole (Princess Sally's Kingdom and she was only 10 years old when Eggman and Snivly took over and then grew up into a teenager when Eggman was beaten.), and she wanted to be a hero and fight the bad guys and do what Sonic does but she was captured again from the Deadly Six and their leader Zavok raped her for 5 days straight now she sees the world is a cruel place and Sonic didn't save her innocents in time ever since she always had a grudge on Sonic when he didn't save her in time from the torture she endured at the hands of Zavok and she even got more angry at Sonic for not killing Zavok and any of the villains that Sonic fights so she found the weapons that will do the job for her.

(JUST LOOK DOWN AND YOU'LL SEE THE WEAPONS THAT SHE USES FOR HER BATTLES SHE GETS INTO HERE!)

The Shredder this shotgun can blow just about anything in one shot but big enemies take multiple shots to kill her enemy she also carries these guns as well Micha's Revolvers yup she stole them off Micha's corpse after John Martson killed him and she is a very good crack shot with them better than Micha and she has Kain's Soul Reaver sword as her melee weapon if she runs out of ammo and she is very good at swinging the sword around and be very deadly with it making her a pro with it and lastly she has the Purple Dildo Bat from Saints Row series yup she loves this bat and she loves to make fun of her enemies when she kills them with it and she does use it as improved sex toy by stuffing it in her pussy all the way up to the balls of the rubber dick and she pulls her pants up to keep them locked and secured under her pants and she loves it when she fights and jumps around she feels the pleasure and it also vibrates (Sorry but I wanted to give her more weapons okay.)

She also found these guys because she sees the beauty in all creatures, even something as gross and scary as monsters

Meet her 1st pet The Gorgor a monster that can break through walls with its strength even metal doors and can pick up cars and throw them 50ft through the air at their enemies and can eat someone whole but they love to take chunks of flesh off making their enemies suffer so brutally they scream in pain bringing enjoyment to their victims suffering when their food tries to crawl away.

(AN: IGNORE THE GUY IN THE IMAGE AND FOCUS ON THE MONSTER INSTEAD.)

Next meet her next pet The Mauler and as you can see on what they look like and yup scary but Shantae sees the beauty in these creatures that god as made and she owns 900 of them but only takes 15 with her wherever she goes and has them as guard dogs to protect her from thieves and these dogs can keep up with Sonic, The Flash and Reverse Flash yup they can keep up with these guys and Sonic is not safe from these guys when he tries to run from them and they can sniff blood so don't think of hiding from them and they can regenerate their limbs and organs making them pretty hard to kill and they also keep Tails and Cosmo safe at the workshop and they also strike fear into Sonic's enemies and this how they sound when they growl.

Lastly meet Shantae's last pet her white banshee bat monster that flies in the sky to keep an eye out for any enemies and this monster can keep up with Tails's airplane The Tornado and carry people on it's back like If Shantae needs to fly somewhere and take to the skies for combat this creature can do that and on how it looks it can also move on the ground like a snake and fight like one and it has poison like a rattlesnake and the most toxin of the most deadly Spider Atrax Robustus yup that spider.

Powers: She has the same powers as Surge The Tenrec, Sonic The Hedgehog, Blaze The Cat, Mario, Shadow-Man (Aka Michael Leroi.), Turok (From all of the Turok games.), Solid Snake, Frank West, Chuck Greene and Nick (Yup she can combine anything and turn it into a weapon like the dead rising heroes.) she also has the mask of shadows stitched into her chest and lastly she has a super form when she absorbs the Sol Emeralds and she can grant wishes like a full fledged genie making her have cosmic powers to warp reality and she can talk to monsters and animals and she can run on rusty nails thumb tacks spikes broken glass thorns and molten rock without feeling any pain and if her feet look gross and injured she can heal with water since she has water powers as well like a goddess

(This is the mask of Shadows she has stitched into her chest giving her the powers of an immortal voodoo warrior The Shadow-Woman taker of souls walker between worlds and she can't die and she never told anyone she had this in her chest.)

Vehicles: She owns a purple and black dirtbike as her vehicle so she can drive around in it and she loves the bike and she always drives it because she gets tired sometimes when running and this is her dirtbike and what it looks like.

(Yup she drives this thing a lot when she doesn't feel like running.)

Combat Skills: Very skilled at setting traps like Solid Snake and Rambo put together skilled at using her sword like a pro and is a good shot with her guns she doesn't need to aim but she still aims because you can't just shoot by the hip most of the time and she is good at martial arts like Solid Snake, Batman, Robin, Chuck Norris, Master Splinter, Jackie Chan, DOOMSLAYER, Sub-Zero and Captain Falcon put together (Yup these guys taught her all of their moves and Batman taught her how to solve anything like he does.)

Flaws: She has extreme PTSD because she was raped alot when she was captured so when she sees someone else about to be raped she goes into a blood frenzy and kills anything around her and can't control her anger and she looses control of her powers making her unstable around others and she needs someone to calm her down someone she trusts (This is early seasons of her if she was a character in one of Sonic's cartoons) And her super form can make her tiered very easily if she uses to much of it and she becomes an easy target to capture from villains and she has a strong fear of labs like genetic research labs make her terrified when she sees them and she throws up and she also pissess herself in fear (There this is my Sonic OC and she belongs to me and no one else. Okay, you can use her in some of your stories but I have to give you permission to use her.)
