How to Paraphrase and Avoid Plagiarism

(or How To Research Without Accidentally Stealing Someone Else's Ideas!)

1. Write down a type of plagiarism that surprised you or that most people wouldn't expect:
2. You do not need to cite information that is _____.
3. The only two ways to use evidence without plagiarizing are
 - a. _____
 - b. _____
4. **True** or **False**? (circle one): A **direct quotation** is using the author's exact words without changing anything, with quotation marks around it, and a citation.
5. **True** or **False**?: When you **paraphrase**, you take a sentence from a source and change some of the words to synonyms.
6. To judge whether someone has paraphrased well, ask yourself two questions:
 - a. Did they use _____ from the source? (*If yes, it's plagiarized!!*)
 - b. Is the *sentence structure* or the _____ the same? (*If yes, it's plagiarized!!*)
7. Write down 3 tips for paraphrasing well, preferably ones that were new to you:
 - a. _____
 - b. _____
 - c. _____
9. How often do I have to put a parenthetical citation in my paper?: Always cite *right after* _____, numbers, statistics, and dates, and after each chunk (about 3 sentences) of paraphrased text from the same source.
10. Write a parenthetical citation for this book. You used something from page 14: Wiesel, Elie. *Night*. New York: Bantam, 1982.

"Here would be the quotation from the book" ().
11. Write a parenthetical citation for this source:
