

picked up the technic ferrari 488 gte from eastmallbuy and this set ended up being a lowkey clutch find.

- full box, stickers, and manual all 1:1 to retail
- pieces have the lego logo engravings so it doesn't look or feel off-brand
- plastic quality is on point, no weird colors or loose fits
- all parts included, nothing missing, build went smooth
- finished model looks identical to retail, stickers stick well and don't feel cheap

big shoutout to the first guy who reviewed this factory, man is goated for real. without that review i probably wouldn't have risked trying this one out.

overall solid pickup if you've been eyeing lego reps, especially at the price point.
