

Math Department Optional Summer Math Work

Dear Caregivers,

Below, you will find optional summer math practice sets designed to help students maintain and strengthen the skills they developed during the past school year. These assignments focus on learning objectives students worked on during the 2025-2026 academic year and will help them prepare for their math learning in 2026-2027.

If your child is going into

- Math 8, please find the practice sets here, [Rising Math 8 Summer Practice](#).
- Algebra 1, please find practice packets here, [Rising Algebra 1 Summer Practice](#) and recommended IXL practice here [Pre-Algebra IXL Topics for Review](#).

Please note - IXL may not be available before July 20th as we update our contract with them.

Lastly, if your child gets stuck while working on any of the above practice work, they can utilize online resources for video assistance. Khan Academy* in particular has well-organized, straightforward videos.

Thank you, and have an enjoyable and safe summer,
Ottoson Math Team and Arlington Math Department
