

Taxi Dispatch Budget Planner

Use this simple planner to estimate and compare your long-term costs between open source and proprietary taxi dispatch software. You can duplicate this table and input your own values.

Step 1: Estimate Your Upfront and Ongoing Costs

Cost Category	Open Source Software	Proprietary Software
Software License Fee	\$ _____	\$ _____
Developer Setup Cost	\$ _____	\$ _____
Time to Launch (in weeks)	_____	_____
Hosting and Server Costs (Monthly)	\$ _____	\$ _____
Monthly Maintenance and Bug Fixing	\$ _____	\$ _____
Customer Support (in-house or vendor)	\$ _____	\$ _____
Ongoing Feature Updates and Security	\$ _____	\$ _____
App or Platform Customization	\$ _____	\$ _____
Integration with Third-Party Tools	\$ _____	\$ _____
Staff Training or Onboarding	\$ _____	\$ _____
TOTAL Estimated Cost (Year 1)	\$ _____	\$ _____

Step 2: Analyze Long-Term Ownership Impact

Ask yourself:

- Which option gives me better control of my long-term budget?
- Can I manage unexpected costs without stress?
- Am I prepared to maintain technical infrastructure?
- Which option frees up my time to focus on business growth?

Pro Tip: Do not just compare the costs. Also compare the speed, support, and peace of mind that come with each option.
