

Privacy Policy for ACX Royalty Estimator Extension

This extension collects the following data from users:

- The names of audiobooks listed on the user's ACX Sales Dashboard page
- User-provided audiobook length data (in hours) input via the extension's popup interface

This data is stored locally on the user's computer using the Chrome extension storage API. The extension does not transmit any user data outside of the user's local browser environment.

Audiobook names are collected automatically when the user views their ACX Sales Dashboard page with the extension active. This is necessary for the extension to be able to display royalty estimates for each of the user's audiobooks.

Audiobook length data is input voluntarily by users via the extension's interface. This data is used to calculate price points and estimated royalties. Users are not required to enter book length information and can choose to have the extension calculate royalties based on default pricing assumptions instead.

All user data remains under the user's control and is not shared with the extension developer or any third parties. Users can view all data stored by the extension and can delete this data at any time by clicking the "Clear Data" button in the extension popup.

By using this extension, you agree to the collection and local storage of your audiobook names and any audiobook length data you choose to provide. If you do not agree to this data collection, please uninstall the extension.

This privacy policy may be updated from time to time. Users will be notified of any changes via the extension's Chrome Web Store page.

Contact 10kclub2019@gmail.com with any questions about this privacy policy or the ACX Royalty Estimator extension.
