

Algebra 2

1. [Desmos Assignment](#)

(use the class code **Z6CZ3W** to begin the assignment)

Purpose: This assignment reviews some of the key points of the graph of a quadratic equation. Some questions may be harder or easier than others - try your best to answer all of them.

2. [Skills Review](#)

Purpose: These are some of the problems that we were working through during class before the COVID-19 shutdown. Try your best to complete them to make sure these skills are still fresh.

Completion of these 2 assignments will hopefully make the transition to online learning a little easier.
