### **THINGS THAT MUST BE PREPARED BEFORE VISIT JAPAN**

What most people think when it comes to Japan is how hard it is to communicate with locals. There are (only) few people that know how to speak English decently.

Secondly, is the road you do not know. Obviously, It is a foreign country. To make things more complicated is the signboard showing the language and alphabet that are difficult to read.

### **COMFORT IN EVERY JOURNEY**

Mr. Chen almost lost himself because for almost 3 hours he was on the road and still not arriving at his destination.

He and his friends thought that they could navigate the foreign roads like Japan easily with just the help of Google Maps.

He tried to ask locals, but most people in Japan do not speak English fluently. Unfortunately, neither Mr.Chen and his friends. Now the language barrier took place.

Fortunately they knew how to use translation apps that they got from Google Play Store. Finally they got to the place they wanted to be with the help of some locals.

Certainly, it is not a comfortable journey but quite a challenging one. Perhaps they got something to tell their family members and friends when they went back home.

Osaka is such a beautiful place. The pass, the city, the people. You will be amazed.

What if I told you that our company offers a reasonable solution for your vacation?

But it is more convenient and comfortable when you chartered a vehicle with a driver that knows how to navigate any destination you want without any headache.
