SL: Zero testosterone-killing BS in this American-made soap!

SL2: Testosterone is a "controlled substance"

Dear FIRSTNAME,

By now, we all know that masculinity is under assault...

Well, I'm about to reveal one of the sneakiest ways your health is literally being poisoned.

HINT: it's in your shower right now!

You see, soap used to be made from healthy ingredients...

Nowadays, multinational corporations operating in communist countries have started replacing those ingredients with toxic chemicals to save a buck...

Chemicals that decrease testosterone and sperm count.

No wonder Americans spent over \$3.8B on testosterone replacement therapy in 2020!

The good news: We created a one-of-a-kind chemical-free soap for men!

It's got none of that testosterone-killing commie BS in it... and it smells exactly like FREEDOM & LIBERTY.

PLUS, we're running a 24-hour Blowout:
