

Star and a Wish

- This activity is to be included in the Technology Circle at the end of the lesson. In addition to the specific virtues, it reinforces the powerful ideas of sequencing and algorithms.
- Children sit in a circle with a ball.
- The first child holds the ball and says one good thing that happened today. Then, the child rolls the ball to another child across the circle.
 - Children continue to repeat this activity (say one good thing that happened, roll the ball to another child) until the last child speaks.
- After the last child has said something good that happened, the child says one thing that he or she is looking forward to doing or learning next time. Then, they roll the ball to the child who previously rolled the ball to them.
 - Children continue to speak and roll the ball in the reverse of the previous order until the ball has returned to the child who spoke initially.
